ANNUAL REPORT

OF THE

MANAGERS

OF THE

Western Pennsylvania Hospital,

FOR 1890.

To the Honorable President and Members of the Board of Public Charities of Pennsylvania; and the State Board of Lunacy:

GENTLEMEN:—On behalf of the BOARD OF MANAGERS OF THE WESTERN PENNSYLVANIA HOSPITAL, I have the honor to lay before you a statement of its affairs for the year ending on the 1st day of October, 1890:

The Hospital—the Department for the Insane at Dixmont, and the Medical and Surgical Department in Pittsburgh—has been maintained in that highest standard of excellence which has in previous years characterized the Institution. More patients have been cared for than ever before in its history.

I will refer to the departments in order.

At the beginning of the year there were 704 patients in the Insane Department and at its close 733. The increase has been constant—and the institution is over-crowded. It has capacity to accommodate 580 patients—the excess (153 patients) within its walls is a menace to the health and safety of the inmates. Most of the patients now being forced upon the Hospital come from jails and almshouses and are generally chronic insane, and frequently arrive in dying conditions from exhaustion and disease. The curative results are thereby reduced, and the tables of mortality increased. The Hospital was established for the treatment and cure of insanity—it is fast becoming

an Asylum for the refuge of incurables. The facts justify the expectation that the State will soon provide another institution for the insane in this populous locality.

The Hospital continues to be a model of cleanliness and neatness, and repairs are always going on in the building and on the premises. The large and attractive brick building called the "Annex" has been completed and occupied, and accommodates 125 male patients.

The old boilers were condemned several years ago, and, at the general meeting of the Contributors and Board last January, the Executive Committee was instructed to replace them by new ones. A contract was accordingly made with the Babcock & Wilcox Company, for three of their boilers. These have been placed in the stone building on the river bank which was extended and adapted for them; steam pipes communicating with the buildings have been laid, a bridge across the railroad tracks to carry the pipes built, and a new smoke-stack is being erected. The change and improvement will cost quite \$20,000. Many other items which come into the account of "Extraordinary Expenses," have been made, but it is not necessary to specify them in this report.

No special appropriation from the Commonwealth will be asked of the Legislature for this department—but it is expected that the law providing for the maintenance of the indigent insane will be retained.

The Executive Committee deserve the commendation and thanks of the Board for their faithfulness in the performance of their gratuitous labors. It has met weekly at Dixmont throughout the year, often at very great inconvenience to the individual members composing it, and every portion of the department has been inspected, looked after, supplies for maintenance ordered, accounts carefully audited, and, when found to be correct, settled by warrants signed by three members, and promptly paid by the Treasurer. In fact their labors have been arduous, and the Hospital is to be congratulated for its good fortune in having on its Board such philanthropic men to promote its interests. I sincerely thank the Executive Committee. And to the Superintendent, Dr. Hutchinson, and the assistant physicians, Drs. Graham, Ewing and Anglin, and the other employes of the Institution, I extend my thanks for their zeal and attention to duties.

I refer to the Treasurer's Report, which accompanies this, for information of the financial affairs of the Institution, condensed and pre-

sented in concise and businesslike manner, and to the Reports of the Executive Committee and the Superintendent for fuller information, details and statistics of the operation of the Hospital.

The Medical and Surgical Department has more than eclipsed its record of good works for the alleviation of sickness and suffering. Never before has it been called upon to care for more patients. They crowd to its doors from all classes of society, and no worthy or fit cases for hospital treatment have ever been turned away. The wards and rooms have been full constantly; extemporized beds on floors and cots had to be provided, forty being the average of such accommodations in use nightly throughout the year.

The cost of maintaining the patients in the Hospital was 93 cents per diem for each patient.

Notwithstanding the strictest economy and the closest collections from patients who were willing and able to pay for their care and treatment, the debts of the department have accumulated, and now are about \$80,000. Included in this amount is the loan from the Pennsylvania Railroad Company of \$50,000, which was incurred five years ago and used for maintenance of patients during previous years. This indebtedness would have been liquidated had Governor Beaver seen fit to sign the appropriation bills which were passed by both houses of the Legislature at its last two sessions.

The Hospital has asked, through the Board of Public Charities, for a renewal of this appropriation of \$50,000, and confidently expects it to be granted at the next session, and made available for the purpose of removing this incubus. It has also asked for \$32,000 for shortage in maintenance during the past two years, and for \$90,000 more for the next two years. In all it asks for \$172,000. A large sum—but this amount of money is required to keep up the Hospital and do the work expected from it by the community.

The capacity of the Hospital has been increased about one-fourth by the extension of the eastern wing and the erection of a new mansard roof over the building.

The former improvement, or the extension of the woman's ward, was paid for by the proceeds, (amounting to \$5,304 $\frac{91}{100}$;) of a series of entertainments given at Old City Hall in December, 1888, by ladies of Pittsburgh and Allegheny; and towards payment for the new roof individual donations and the earnings of a military exhibition and a concert given last July, have been and will be applied. The amount realized from this source was \$6,006 $\frac{25}{100}$; but it does not appear in the

Treasurer's statement, as it came into his hands from the committee in charge of the entertainments too late to be included in his report for the year.

For the preservation of the inmates and buildings from the danger of fire, \$1,710 were contributed by friends and applied for the purchase of fire apparatus that was approved by the fire department of the city. At present the Hospital is believed to be thoroughly protected. Many repairs and betterments have been made in the building, so that it compares favorably with any similar institution in the country for neatness, convenience and comfort of patients.

The Executive Committee has my earnest thanks for its supervision of the affairs of the Hospital.

The Superintendent, Mr. Cowen, is an officer who takes an interest and a pride in the duties of his office. In the general management of the establishment, the industry and activity displayed by him are most commendable, rendering his services invaluable, and, on behalf of the Board and for myself, I especially thank him.

The Medical and Surgical staff, together with the resident physicians, must not be forgotten nor the recognition of their services overlooked.

For statement of receipts and expenditures of this branch of the institution, I refer to the Report of the Treasurer accompanying. The Executive Committees', the Superintendents', the Physicians' and Surgeons' Reports, with tables and statistics, contain much information and many details necessarily omitted by me.

The Endowment Funds now aggregate \$233,067⁸¹/₁₀₀. During the year they have been slightly increased by a stock dividend of the Monongahela Navigation Company. The investment in the bond and mortgage of the Mercantile Library Hall Company has been changed, by direction of the Board, into the consolidated loan of that company represented by 100 bonds of \$1,000 each, bearing interest at the rate of 5 per centum, payable semi-annually and running twenty years from April, 1890.

The Trust Funds are unchanged. From their earnings coal has been purchased and distributed among the "worthy poor" by the committee in charge, whose report is herewith submitted. This fund is so large that no person in this community need suffer from cold. The fuel provided by it is freely and liberally given to every one entitled, by the terms of Mr. Brewer's and Mr. Crawford's wills, to receive it.

In Memoriam.

REUBEN MILLER, JR.,

Who became a member of the Board in 1862, and afterwards a Life Manager, died August 13th, 1890, at the advanced age of 85 years. He was born in Philadelphia County, Pa., and, since his early manhood, was identified with the business and manufacturing interests of Pittsburgh. He was a man of great decision of character, honesty and benevolence. For many years he served the Hospital on the Executive Committee of the Department at Dixmont, and was one of the most useful and efficient managers the institution ever had, and, till his death, continued to be a good friend, which he proved in a substantial manner by constant contributions of money and presents to the Hospital and its unfortunate inmates.

The preceding part of this report was in the hands of the printer, when information of the death of

ROBERT C. LOOMIS

reached me. His death was not unexpected and occurred after a long and very serious illness, on Sunday, December 7th, 1890. He was born near Hartford, Conn., on October 31, 1805, and, like his colleague, Mr. Miller, who preceded him, was a venerable man of 85 years of age. At an early age he went to Charleston, S. C., where he resided for some years, and in 1830 came to Pittsburgh and engaged in mercantile pursuits. He was one of the original contributors to the Hospital, very few of whom survive him; was chosen a member of the Board of Managers in 1865, and later became a Life Manager and one of the Vice-Presidents of the Institution. He has served upon the Executive Committee of the Department at Dixmont continuously, acting as its Secretary, and in that capacity fully and accurately recording in its minutes its transactions.

Mr. Loomis was a very good man—a loveable man, honest, charitable, a sincere friend, a loyal citizen and an exemplary Christian gentleman.

All of which is respectfully submitted.

By order of the Board,

DECEMBER, 1890.

JOHN HARPER, *President.*

Report of the Executive Committee

OF THE

Department for the Insane at Dixmont.

TO JOHN HARPER, ESQ.,

President of the Western Pennsylvania Hospital:

DEAR SIR:—The Executive Committee of the Insane Department at Dixmont, begs leave to submit a brief report of its operations and observations for the past year.

Owing to the continued increase in the number of patients, involving a corresponding increase in the number of nurses and attendants, also an increase of the facilities for properly providing for the same, a large expenditure of money has been required.

The provisions for cooking, laundrying, and heating, originally provided for four hundred patients were found to be entirely inadequate, when nearly double that number were in the institution,—the average number being at this time seven hundred and forty. To meet this increased demand, a new and improved cooking range and fixtures and an additional range has, during the year, been provided.

The steam boilers on the hill having been condemned by the inspector of boilers, it was necessary to procure others; after careful examination of various kinds and profiting by the experience of competent judges, a contract was made with the Babcock & Wilcox Company for three of their boilers. The new ones have been placed at the pump-house, the object being to generate at that point all the steam necessary for the engines, cooking and heating and to convey all that may be necessary in properly protected pipes to the buildings on the hill, thus obviating the necessity of a considerable expense in conveying fuel to that point.

The foundation for the smoke-stack is first-class masonry, resting on the rock twenty-seven feet below the surface, and is twenty feet square until near the surface of the ground. The stone work is carried to a point above high water, and on this is placed the brick stack eighty feet in height.

Two new mangles have been procured for the laundry, sufficient, it is believed, for the purpose required.

Infirmary No. 2 has been much improved and is now occupied by 32 female patients.

Contracts have been made for the erection of a bridge across the track of the railway to support the steam pipes ; also for the steam pipes for conveying the steam from the boilers to the main buildings.

To the great disappointment of the committee, gas well No. 3 may be considered a failure, though producing a small amount of gas, the intention being to return to the use of coal as soon as the arrangements can be made.

Many ordinary and extraordinary repairs have been made during the year, among which are new floors in many of the wards and rooms, and as will be seen by the financial report more than fifteen hundred dollars has been expended in repairing the roofs of the old buildings. The grounds have had the usual attention, but owing to the magnitude of the other improvements and betterments not as much as was desirable.

Dr. Hutchinson, Superintendent, with his assistants, Drs. Graham, Ewing and Anglin, deserve the thanks of the Managers for the care and attention with which they have discharged their duties, as also the various officials within the building, and Messrs. Knoderer, Gray and Kunkle, who have never failed in theirs. It is unnecessary to repeat what will be given in detail in the other reports.

W. P. TOWNSEND,
Chairman of Committee.

Western Pennsylvania Hospital.

GENTLEMEN:

We have examined and counted the securities belonging to the Endowment Funds of the Western Pennsylvania Hospital in the possession of the Treasurer, Mr. John A. Harper, and found the same to be correct.

These consist of securities belonging to—

The Department for the Insane at Dixmont.

One Bond of the Allegheny Valley Railroad Company.....	\$ 1,000 00
Nine Bonds of \$1,000 each, of the Borough of McKeesport Water Improvement Loan.....	9,000 00
Thirteen Bonds of \$1,000 each, of the Pittsburgh Junction Railroad Company.....	13,000 00
	\$23,000 00

Securities belonging to—

The Medical and Surgical Department of the Hospital.

100 Bonds of \$1,000 each of the Mercantile Library Company of Pittsburgh.....	\$100,000 00
Bond and Mortgage John F. Cluley on property on Smithfield St., Pittsburgh.....	16,000 00
Registered Bond of the City of Pittsburgh Water Extension Loan..	57,000 00
Two Bonds of \$1,000 each, of the Allegheny Valley Railroad Company.....	2,000 00
Two Bonds of \$1,000 each, of the Federal Street and Pleasant Valley Railroad Company, cost.....	2,080 83
Six Bonds of \$1,000 each, of the Pittsburgh Traction Company, (5 per cent.,) cost.....	6,213 49
Six Bonds of \$1,000 each, of the Citizens Traction Company, (5 per cent.,) cost.....	6,393 49
Loan to the Isabella Furnace Company, of Pittsburgh.....	15,000 00
Loan to S. S. Marvin & Co., secured by collaterals.....	10,000 00
	\$214,687 81

Amount brought over.....\$214,687 81

BANK OF PITTSBURGH STOCK:

One hundred and forty-five shares at the rate, say of \$69 per share. 10,000 00

MONONGAHELA NAVIGATION COMPANY STOCK:

One hundred shares, at par.....\$5,000 00

Twenty-six shares purchased at \$80 per share..... 2,080 00

Twenty-six shares, being stock dividends at par..... 1,300 00

\$,380 00

\$233,067 81

All of which is respectfully submitted.

GEORGE A. BERRY,
CHRISTOPHER ZUG,
ALEXANDER NIMICK,
JOHN W. CHALFANT,

Trust Funds.

To the Board of Managers of the

Western Pennsylvania Hospital.

GENTLEMEN :

We have examined the Trust Funds in possession of the Treasurer, Mr. John A. Harper, and find the same to be correct.

These consist of securities belonging to—

THE BREWER FUEL FUND.

City of Pittsburgh 5 per cent. Compromise Bonds.....	\$13,400 00
City of Pittsburgh 4 per cent. Compromise Bonds.....	11,000 00
City of Pittsburgh 7 per cent. Water Loan Bonds.....	17,000 00
Note of the Isabella Furnace Company.....	10,958 96
Bond and Mortgage, Paul H. Hacke, property Fifth Avenue and Market Street.....	20,000 00
Five Bonds of \$1,000 each, Peoples Park Passenger Railway Com- pany, cost.....	5,008 34
	<hr/>
	\$77,367 30

Securities belonging to—

THE CRAWFORD FUEL FUND.

City of Pittsburgh 7 per cent. Water Loan Bonds.....	\$12,000 00
--	-------------

All of which is respectfully submitted.

GEORGE A. BERRY,
CHRISTOPHER ZUG,
ALEXANDER NIMICK,
JOHN W. CHALFANT,

Auditing Committee.

Brewer Fuel Fund.

*To the President and Board of Managers
of the Western Pennsylvania Hospital.*

GENTLEMEN :

During the past year ending October 15th, 1890, the Committee having charge of the "Brewer Fuel Fund," have given orders for 49,400 bushels coal, for which warrants have been drawn to the amount of \$3,686.47.

The following statement of receipts and disbursements is herewith submitted.

D.R.

Balance on hand October 15th, 1889.....	\$	6,074 72
Receipts to October 15th, 1890.....	4,222 94	
		\$ 10,297 66

C.R.

By Warrants for coal.....	\$	3,686 47
By Warrants for advertising.....	4 00	
		3,690 47
Balance on hand October 15th, 1890.....	\$	6,607 19

Respectfully submitted,

GEO. A. BERRY,
WM. THAW, JR.,
W. ROSEBURG,
Committee.

Crawford Fuel Fund.

*To the President and Board of Managers
of the Western Pennsylvania Hospital.*

GENTLEMEN :

I herewith present a report of the receipts and disbursements of the "Crawford Fuel Fund," for the year ending October 15th, 1890.

DR.

Balance on hand October 15th, 1889.....	\$	2,882 67
Receipts to October 15th, 1890.....		840 00
		\$ 3,722 67

CR.

By Warrants for coal.....		384 00
Balance on hand October 15th, 1890.....	\$	3,338 67

The amount of coal distributed was 5,500 bushels.

Respectfully submitted,

W. A. HERRON,
Committee.

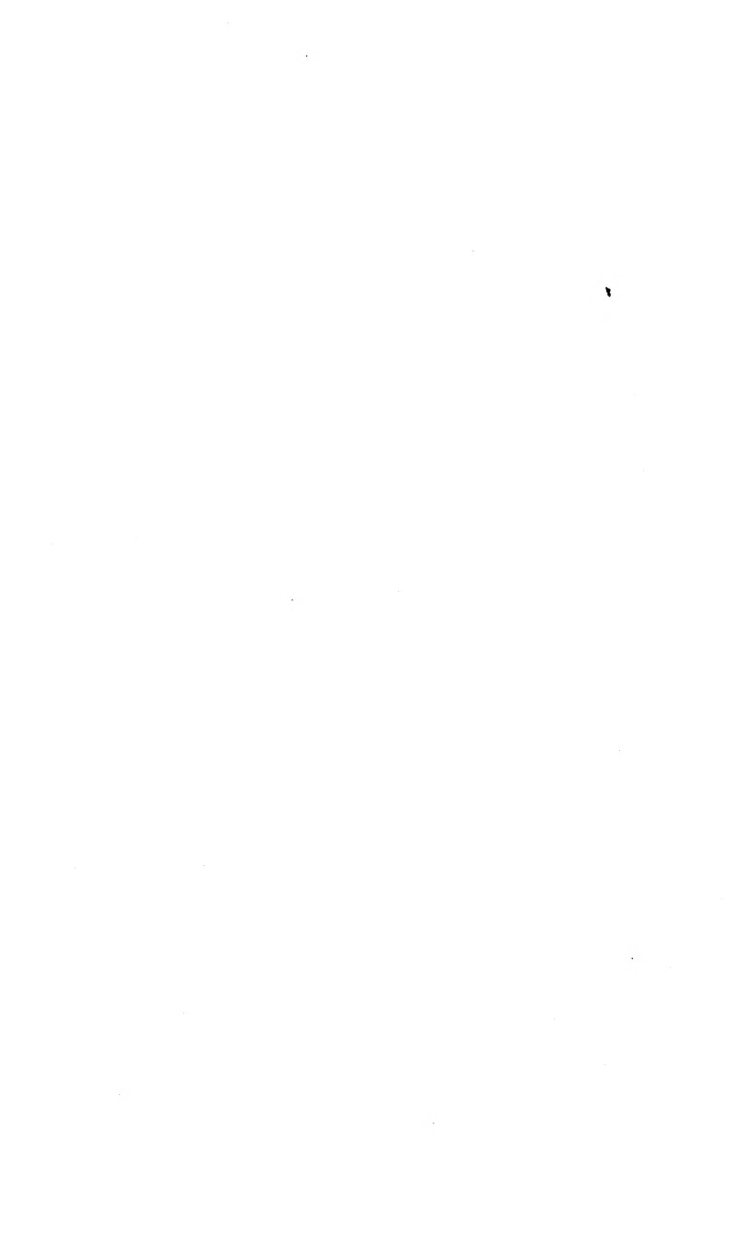

INSANE DEPARTMENT,
Dixmont, Penn'a.

REPORT

OF THE

Physician and Superintendent.

REPORT
OF THE
Physician and Superintendent
OF THE
HOSPITAL FOR THE INSANE AT DIXMONT.

To the President and Board of Managers :

GENTLEMEN :—I have the honor to present the following report of the operations of this department of the Western Pennsylvania Hospital for the year ending September 30th, 1890.

From the statistical tables you will observe one hundred and forty-three males and one hundred and thirteen females, or a total of two hundred and fifty-six patients have been received during the year.

Of the total number of nine hundred and sixty persons under treatment during that period, fifty-five men and thirty-seven women were discharged restored, twenty-two men and thirty-three women as improved, five men and four women as unimproved and forty-four men and twenty-seven women died. From these figures it is ascertained the percentage of recovery of the entire number treated is nine-and-one-half per cent.; the percentage of deaths of the number under treatment is slightly in excess of the previous year, being seven-and-one-third.

From a comparison of the other large Hospitals of the State, drawn from the statistics as presented in the last Annual Report of the State Committee on Lunacy, however, I find the percentage of cures higher in this Hospital, and the mortality the same as in two Hospitals and lower than that in the others.

These facts plainly indicate this Hospital is doing a work fully as well as any other similar institution in the Commonwealth,

and it is a subject in which I feel a just pride when the cases, many of them whom we receive, come from our jails, lockups, almshouses and other places of detention, where no proper treatment of their individual case has been given them whatever, until admitted to our doors, when they are often in a dying condition, or broken down in mind and body, and dirty and even filthy in the extreme. Though so much has been written the last few years upon the importance of the early treatment of the insane, very much remains yet to be done before this subject is fairly understood and fully appreciated by those into whose care these unfortunate people may be cast in the incipency or acute stage of their alienation.

Again, referring to the tables it is noted we had an average number of seven hundred and fourteen patients in the house, while the highest number attained in any single day was seven hundred and thirty-nine, and the lowest number six hundred and ninety-four.

That the Hospital is crowded greatly in excess of its capacity is here shown, when it is remembered five hundred and eighty-five persons are all that can be provided with that degree of comfort and security their condition demands, and especially is this crowding noticeable in the female department, where we have three hundred and twenty-one patients and room for but two hundred and thirty. As a consequence many of our milder cases are compelled to sleep upon cots, and upon beds placed on the floors. That this overcrowding not only seriously embarrasses the Hospital in the accomplishments of its high purposes, and in provoking an increased death rate, I have no doubt.

At present there are under our care twenty-one insane criminals committed by courts from the Riverside Penitentiary and jails ; these patients fortunately are males, and occupy a ward set apart for their especial care and custody, the limit or capacity of which has now been reached. How to provide for their accommodation therefore in the future, should we receive additional cases of this character, is a problem not easily solved. That the Hospital should be made a jail as in one sense, the reception of these patients makes it, and the officers, jailers is not your intention, neither is it your desire our patients should be compelled to mingle and associate with this class. To overcome this difficulty it has been suggested a building properly equipped, should be erected by the State, in connection with penitentiaries, and in which all such persons should be detained and cared for.

Of these admitted fifteen were between the ages of ten and twenty years, fifty-five were from twenty to thirty years, eighty-one were from thirty to forty years of age, sixty-eight were between the ages of forty and fifty and thirty-seven were fifty years or older.

Ninety patients sought admission whose mental disease has already existed for a period not longer than six months, and in the common acceptance of the term are regarded as acute cases, fifty-seven whose malady had existed from six months to two years, thirty-six had been insane from two to five years, thirty-eight for a longer period than five years, and one old man who had been insane over thirty years. Owing to the unreliability of the history obtained in many cases and very often the fact that the person accompanying the patient knew nothing of the history whatever, our records are rendered incomplete, and as a result in forty-four cases the duration of their insanity prior to admission to the Hospital was put down as unknown.

Fifty-eight patients were admitted upon the formal request of their friends, one hundred and nine by request of the directors or overseers of the poor, and eighty-nine by order received from the courts.

With one exception, that of an insane criminal who formerly resided in Mercer County, and committed to the Hospital from the Western Penitentiary, no patient was received who was not a resident of this Asylum district, though applications for admission, many of them coming from persons residing in adjoining and distant States were received, the requests were not granted, as it was deemed imprudent under the present crowded condition of our wards.

During the year four little boys were admitted, the younger of them being ten and the elder aged twelve years, two were received upon the certificates of physicians and two by order of court. While these children may have been insane, I am of the opinion an institution of this character for most excellent reasons was not the proper place for them, and as they possessed a fair amount of intelligence and were capable of being interested in games and amusements, and also of acquiring, perhaps, some trade or occupation, the commissioners to whom they were chargeable were induced to remove them to the school for the feeble-minded at Elwyn, this State.

Of the seventy-one deaths occurring within the year, in twenty-five cases it resulted from phthisis, in eight instances from apoplexy, seven

men and one woman died from paresis; the exhaustion of chronic mania, melancholia and dementia furnished twelve cases, two patients committed suicide by hanging and fourteen patients died as the result of either epilepsy, pneumonia, heart disease, malarial fever or old age. Twenty-nine were over twenty years of age at the time of death, twenty were over forty years, twelve died beyond the age of fifty years, five were sixty years of age, four were seventy years or over, and one eighty years and over.

In every instance of prolonged or sudden illness of patients their relatives were informed, thus enabling them to visit the Hospital and remain with the sick if they so desired, when no friends were known or could not be found, the authorities committing the patient were notified. In case of sudden death the friends were informed by telegraph or letter as speedily as possible.

Autopsies were held in all cases where the friends of the deceased would permit, and a number proved very interesting and instructive, It is to be hoped this branch of Hospital work will receive more attention and greater stimulus in the future, in the erection of a building constructed for the sole purpose of conducting these examinations and where valuable specimens can be prepared and preserved together with their pathological histories.

During the year your institution has received official visits from the State Board of Charities, the Committee of Lunacy, and the gentlemen comprising the Legislative Committee; on several occasions also we were glad to welcome Boards of Trustees and Superintendents from other Hospitals. Upon all these occasions the inspections were conducted very thoroughly and the visitors accorded free access to every department of the Hospital, and granted every facility and opportunity for the purpose of meeting and conversing with patients, and familiarizing themselves with the management of the Hospital. Over three thousand persons also visited the Hospital for the purpose of seeing some relative or friend or merely as "sight-seers."

The lectures delivered before our nurses by the medical staff have been productive of much good to all concerned. By plain, practical teaching during the two winters since their inauguration, the standard of efficiency on the part of our nurses has been raised to that degree intelligent and skillful nursing demands. A fact most agreeable and noteworthy also is that few changes have taken place among our attendants, especially is this true in the female

department, where, in a few exceptions, the persons proved a decided inaptitude for the work assigned them, the nurses are the same, and many of them, I am glad to say, have been engaged in the Hospital a number of years. In the male department more changes were necessary throughout the year, but I most cheerfully recognize the interest and zeal on the part of all who remain with us to do their utmost in the performance of the duties assigned them.

For years past it has been the policy of the Hospital to engage as many of its patients as possible in some suitable and agreeable occupation, the men have been variously employed in farm work, and assisting in the making of out-door improvements, etc., while the women have sought occupation in performing household duties in sewing, quilting, patchwork, rug making and fancy articles. The good accomplished for our household in these means of diversion is witnessed not only in their improved condition of health and affording to all good appetites, and sound rest at night, but it has further served to make all so occupied contented, happy and their time to pass quickly and pleasantly, especially may this be said of those among them who are nervous and excitable, the improvement in this class of our patients is sometimes wonderful.

During the present year, therefore, our efforts to secure as many of the patients of all classes as could possibly go out resulted in the employment of a larger number than ever before in labor of different kinds, and with most gratifying results. Much of the work in the several improvements taking place was performed almost entirely by patients, many were regularly engaged upon the farm and garden and others in keeping the yards and lawns in order and repairing roads, excavating, etc. The female patients were pleasantly occupied in housekeeping, in the kitchen, laundry, sewing, making mats, etc., and the homelike appearance of our wards is, in large measure, due to their taste and handiwork.

In this connection I may refer to the amusements provided for our people, during the winter evenings we were frequently entertained by musical and literary societies from the city coming down and giving us most excellent concerts and plays. As these young people were so generous in contributing of their time and talents, to record and individually thank them all in this report, would be quite impossible.

The holidays were appropriately observed, each day being given up to pleasure-seeking entirely.

On the evening of the Fourth of July we witnessed a beautiful and patriotic display of fireworks, a gift to the patients from friends and those interested in the Hospital. On Thanksgiving, Christmas and New Year's days the good things of the season were enjoyed to the full, and on Christmas morning each patient received some little remembrance that was either sent from loving friends at home, or from the abundance of pretty things kindly sent to the Hospital by firms in the city. The wards and halls were also beautifully adorned by festoons of evergreen, laurel and bunting and presented a most pleasing appearance.

On a number of occasions we were also entertained by readings and lectures, as well as by our own regular weekly dances and magic lantern exhibitions. Out-door games were substituted in the warmer seasons of the year, and the delightful summer evenings in walking by those who were able or cared to be out. While the Pittsburgh Exposition was in progress eighty of our patients visited it, where they remained the entire day sight-seeing.

Throughout the year, in response to a circular letter asking for contributions of reading material, our wards were furnished with an abundant supply of papers, magazines, periodicals, etc., that enabled those who care to read to pass many an hour profitably as well as pleasantly.

From contributions of money received from several friends of the Hospital, we purchased a number of volumes for our libraries. I regret to say our libraries are small, and very inferior, and do not by any means fulfil our requirements. The United Presbyterian Board of Publication and the Allegheny County Bible Society very kindly presented us with two hundred Bibles and Psalm books for immediate distribution in the wards. Religious services were held regularly in our chapel Sunday afternoon and evening, and frequently those of our patients, who so desired, were permitted to attend morning service with their nurses in the neighboring churches.

The permanent improvements continually going on in every department of a large institution as Dixmont, it is unnecessary for me to enumerate, as they will be fully detailed in the reports of the President and Executive Committee from the itemized statement furnished from the books of the Hospital. The buildings and grounds have been kept in good repair, however, and look well, and I trust will merit your approbation.

I desire to express our appreciation of the work done by the Allegheny County Commissioners in the erection of a beautiful and substantial stone bridge on the Beaver road as it crosses Tom's run. The bridge is a decided improvement to our property at this point, and takes the place of an old dilapidated wooden structure that for years has been a menace to the safety of all who passed over it.

The financial exhibit, as shown in the statement of the Treasurer, displays the amounts of moneys variously received and how disbursed, also the total cost of maintenance, which is considerably less than last year, owing to the fact that many of the important improvements undertaken are still in progress; for like reason it may be stated the weekly cost per patient is correspondingly reduced, being the past year four dollars and thirty-one cents. It may, with propriety, be here stated, while the strictest economy prevails in the management of all our departments, it has not been the wish of your Board in the least degree to restrict the household in anything that would afford every comfort necessary to the welfare of its inmates, for this reason we have not therefore reduced the cost of maintenance to the smallest possible sum consistent with simply holding mind and body together, but on the other hand provided our patients with an abundance and a free and liberal dietary. The "Expenditure List" presents in detail the quantities or amount of all articles purchased, together with their cost, also the sums expended in the different departments and for what purpose, to both of these interesting reports I ask your attention.

The year has been a busy and progressive one, and I feel our patients have enjoyed many advantages, constant effort, advanced ideas, and a well-defined purpose to produce the best results afford. The possibilities for doing good in a Hospital for the Insane are almost boundless, and he who is alive to the requirements of the duty before him, is he who shall attain the greatest good.

I am glad to report the gentlemen upon the medical staff and the heads of the several departments are the same as last year, and to them I am deeply indebted for their, at all times, untiring efforts to promote the best interests of the institution and prompt and cordial assistance to me in the discharge of my many duties.

To you, gentlemen, President and members of the Board of Managers and of the Executive Committee, I desire to renew my expressions of thankfulness for your continued confidence, forbearance and

counsel so freely accorded me in our official relations throughout another year, and to express the hope that by greater earnestness in the performance of my duties the year upon which we now enter, I may be a more worthy recipient of your favor.

In closing this report it is with an abiding faith in an all-wise Providence to guide and direct our steps and watch over us in the future.

HENRY A. HUTCHINSON.

Admission of Patients to Insane Department.

1. Preparatory to the admission of a patient, unless when committed by order of a court, the Superintendent shall be furnished with the certificates of two physicians, who have been in practice for five years or more, that they have separately seen and examined the individual within two weeks of the date of admission, and believe him or her to be insane, and these certificates shall be sworn to before some alderman or judicial officer, with the order of a near relative or friend that the patient may be received into the Hospital, with a statement as required by law, and a bond with satisfactory security, for the payment of board and other expenses while in the Institution. All private patients thus received shall make a payment of thirteen weeks' board in advance, when brought to the Hospital, no part of which shall be refunded; and if taken away uncured, and against the advice and consent of the physician, in any succeeding quarter, no part of the payment shall be refunded.

2. Whenever a patient is sent to the Hospital by order of the Court, the order or warrant, or a copy thereof, or, if sent by the Directors of Poor, an order sent by the Directors or their Agent accompanied by the Certificates of Insanity, as required by law, shall be lodged with the Superintendent of the Hospital.

3. Each patient, before admission, shall be made perfectly clean and be free from vermin, or any contagious or infectious disease.

4. Each male patient shall be provided with at least three new shirts, a new and substantial coat, vest and pantaloons, three pairs socks, two pairs drawers, two undershirts, a hat or cap, cravat, collars, handkerchiefs, shoes and one pair of slippers.

5. Each female patient shall have three calico dresses, four chemises, three pairs drawers, three pairs hose, three night-gowns, two flannel skirts, one Bal-moral skirt, two muslin skirts, six handkerchiefs, four collars, two pairs shoes, one shawl or cloak, and one hat or hood.

6. It is very desirable that extra and better apparel should be sent with those accustomed to it, that when their health is improved, or when they attend religious worship, walk or ride out, their self-respect may be preserved.

In all cases the patient's best clothing should be sent; it will be carefully preserved, and only used when deemed necessary, for the purposes above mentioned. Jewelry, and all superfluous articles of dress, knives, &c., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

All clothing, if not taken away at the time of the patient's removal, or within three months afterward, will be disposed of as the officers of the Hospital may think best, and no compensation whatever will be made therefor.

7. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him or her to the Hospital, and from whom minute, but often essential particulars may be learned.

8. The price of board, including washing, mending, and attendance for all who are supported at the public charge, is four dollars per week. For private patients, or those supported by themselves, or their friends, the price varies from five to ten dollars, according to the trouble and expense incurred, and according to their ability to pay. Higher prices are paid by special agreement with the physician, for extra attention and accommodation.

Payments are to be made quarterly, in advance.

9. A bond, with satisfactory sureties, will be required for the payment of the board and expenses, and for the removal of the patient when discharged, of all persons, excepting those sent at the expense of the counties or townships.

Those who bring friends should be prepared to give a bond, and, if strangers, furnish evidence of their responsibility.

10. All bills remaining unpaid one month after date of presentation, are placed in the hands of the Solicitor of the Hospital for collection.

11. As the diet of the patients is under the absolute control of the Superintendent, no nuts, candies, cakes or other edibles shall be given to the patients by their friends or visitors, without his express permission.

12. Visitors are admitted to inspect the Institution on any day (except Sunday,) between the hours of 10 A. M. and 12 M., and between 2 and 4 P. M.; but no visitor shall be admitted to the wards occupied by patients, without express permission from the Superintendent; and especial care is to be taken that no amount of visiting is permitted that shall prove injurious to the patient. No visitor shall be admitted on the holidays.

Visitors will please not intrude on the grounds used by the patients, or give to or receive anything from patients.

13. The Hospital is located eight miles west of Pittsburgh, on the Pittsburgh, Fort Wayne and Chicago Railway, at Dixmont, and can easily be reached by cars, there being ten trains (east and west,) each day; (except Sunday) stopping at the Hospital Station.

14. Applications for the admission of patients, and all communications in regard to the condition, health, bills, &c., of those who are in the Hospital, shall be made to the Superintendent.

15. As Dixmont Station has now an Adams Express Office, all goods may be sent to the Hospital direct by express or freight, as may be preferred.

The friends of patients can communicate with the institution by telegraph and telephone.

Forms of Commitment.

The following Forms have been prepared by the Committee on Lunacy, to be used in all cases (except those sent by order of Court) for the commitment of Insane patients by their friends or by Directors and Overseers of the Poor, to the Hospital for the Insane at Dixmont, Pa. No such patients will be received unless the Forms as given are fully complied with.

Order for the Reception of a Patient.

I, the undersigned, hereby request you to receive.....
an insane person, as a patient into your Hospital, believing that such detention
is necessary for his benefit. Subjoined is a statement respecting the said.....

Bond for Private Patients.

Know all Men by these Presents, That we of
 in the county of and
 State of Pennsylvania, are held and firmly bound unto the WESTERN PENN-
 SYLVANIA HOSPITAL, its successors or assigns, in the sum of One Thousand
 Dollars, for the payment of which we jointly and severally bind ourselves, our
 heirs, executors and administrators, firmly by these presents: (And
 do hereby empower or any attorney of any Court of
 Record within the United States or elsewhere to appear for
 and after one or more declarations filed, to confess judgment or judgments
 against in favor of the WESTERN PENNSYLVANIA HOSPITAL, as of
 any term for the above penalty, with costs of said suit, and attorney's com-
 mission for collection, viz: Five per cent. in case payment has to be enforced
 by process of law; hereby waiving inquisition and condemnation of any prop-
 erty that may be levied upon by virtue of any execution, which execution may
 issue forthwith, on failure to comply with any of the conditions thereof, and
 hereby waiving the right of exemption from levy and sale of any and all prop-
 erty that now is, or hereafter may be exempted from levy and sale, under any
 act of Assembly for such purpose, and with release of all errors, &c.) And
 it is further agreed and provided that execution and alias, and pluries execu-
 tions may issue at any time, and from time to time, and as often as any amount
 shall be due and owing to said WESTERN PENNSYLVANIA HOSPITAL and that
 the books of said Hospital shall be evidence, and a liquidation of the amount
 to be collected on said executions.

Witness hand and seal the day of in the
 year of our Lord one thousand eight hundred and

Whereas of in the County
 of and who is insane, has been admitted as a patient to the
 WESTERN PENNSYLVANIA HOSPITAL, at Dixmont, Pa.,

Now, therefore, the condition of the obligation is, That if the said obligors
 shall pay to the said WESTERN PENNSYLVANIA HOSPITAL, its successors or
 assigns, the sum of Dollars and Cents

per week, for the board of said patient, so long as shall continue in said Hospital, with such extra charge as may be occasioned by requiring more than ordinary care and attention, and shall provide for suitable clothing; and shall pay for all such necessary articles of clothing as shall be procured for by the said Hospital; and shall remove from said Hospital, whenever required to do so by the Superintendent, and if the said obligors shall also pay, not exceeding Fifty Dollars for all damages the said patient may do to the furniture, or other property of the Hospital, in any one quarter, and for reasonable charges in case of death; and in case the said patient shall be removed from said Hospital by, or at the request of us, or either of us, or by any other person or persons, before the expiration of three calendar months after reception, then if the said obligors shall pay the board of said patient for thirteen weeks, and all other charges on the books of said Hospital, all payments for board and clothing to be made in advance, quarterly on the fifteenth day of March, June, September and December in each year, and at the time of removal, with interest on each bill from and after the time it becomes due—then this obligation to be void, otherwise to remain in full force and virtue.

Signed, sealed and delivered in presence of us.

ANNUAL REPORT

OF THE

MANAGERS

OF THE

Western Pennsylvania Hospital.

To the Honorable President and Members of the Board of Public Charities; and State Board of Lunacy:

GENTLEMEN:—On behalf of the BOARD OF MANAGERS OF THE WESTERN PENNSYLVANIA HOSPITAL, I have the honor to lay before you a statement of its affairs for the year ending in October, 1891.

Order and harmony have characterized the operations of the Department for the Insane, at Dixmont, during the past year.

The report for 1890, informed you that at the end of that year there were 733 patients in the Hospital. During the past year, 1891, the average number of patients in the Hospital was 750. It has accommodations for 585 patients. Therefore, it has been greatly overcrowded, especially on the female side.

The general health of the patients was good. There were some cases of Dysentery and Typhoid fever, but not enough to amount to an epidemic. These cases were caused by the prolonged heated term, followed by sudden changes of temperature—and to the failure of the spring during the dry weather to produce sufficient water for drinking and cooking purposes.

The death rate as reported by the physicians was rather high, being 120 cases, 52 of which occurred from consumption, the balance from exhaustion due to paresis and other forms of mania, and from old age; doubtless also to the crowded condition of the

wards and rooms, which necessarily existed from the fact already stated. In this connection it is gratifying to know, that the Legislature, in its wisdom, has instituted measures for relief, by establishing in the near future, asylums for the chronic and incurable insane.

Dr. J. V. Anglin, one of the assistant physicians, resigned his office in May, to accept a position in the Hospital for the Insane, in Montreal, Canada. He was a very capable, kind, and attentive physician, deeply interested in his special work. Upon his retirement, the vacancy on the medical staff, was filled by the appointment of Dr. William K. Walker, of Philadelphia, who has proved to be a most acceptable acquisition to it.

The three new Babcock and Wilcock boilers of 156 horsepower each, contracted for last year have been completed and are in use. They are entirely satisfactory, furnishing abundance of steam for all purposes. The boiler house has been enlarged to accommodate the new boilers, and a new smoke stack of large and graceful proportions built.

The line of three four inch steam pipes from the boilers to the Hospital buildings have been laid and boxed in, and convey the steam up the hill a distance of about 900 feet with very little loss by condensation.

Stand-pipes, a precaution against fire, have been erected on the "Annex," and the building furnished with hose, couplings, racks, &c. Additional stand-pipes with hose have been placed in the main building. A new iron stairway for fire-escape has been furnished Ward No. 12, also in the "Annex" an additional stairway from the first floor to the dining room in the basement, has been made as a matter of safety as well as convenience. The ground about the "Annex" has been graded and shaped and converted into a beautiful lawn.

The kitchen facilities have been increased. A new mangle, and a new clotheswringer, have been introduced into the laundry. A small engine and boiler provided at the barn for cutting and grinding feed for the stock.

The worn-out gas retorts at the gas-house have been replaced by new ones. A new frame building of two stories, for a carriage house and lodging rooms for farm hands, is nearing completion. A new board side-walk has been substituted for the old one, from the railroad station, and the road-way renovated.

Much grading, cleaning up of grounds, paths, and roads, trimming of trees, and shrubbery, burning of brush, and general work, about the premises have been accomplished by patients, (who are glad to be employed,) and their attendants.

Of the three gas wells that were drilled upon the Hospital property, one continues to give a good flow of gas; more than sufficient to light the road-ways, and the grounds, surrounding the buildings and barn.

The barn is a poorly constructed building, inadequate to shelter the horses, and cows, with their hay and fodder. It should be condemned, and a new one built upon a modern and more approved plan.

The Superintendent, and Physicians, recommend the erection of a building adapted for the reception, and treatment of patients, afflicted with infectious, and contagious diseases. I heartily concur, in this suggestion.

The farm has yielded abundant crops of various kinds of vegetables, and fruit, during the past season.

The Superintendent, Assistant Physicians, and the other officers and employes deserve our thanks; and I cannot close the report without expressing the deep sense of obligation, the Board is under to the gentlemen of the Executive Committee, who have regularly visited the Hospital weekly throughout the year, and supervised, and directed, its affairs.

THE MEDICAL AND SURGICAL DEPARTMENT.

The average number of patients under treatment, during the year was 212; this number is considerably less than the capacity of the Hospital, yet it is shown by the statistics, that 209 more

patients were cared for than in the previous year. There has also been a considerable increase, in the collections from pay patients. This is due to close collections made by the Superintendent, and to the occupation of new rooms by private patients, who were able to pay for their accommodations, at rates that were profitable. The profits derived from this source were applied to the general support of the hospital.

The income from the State Appropriations, the earnings of the Endowment Fund, receipts from pay patients, and Donations, are entirely inadequate. The indebtedness of this department has accumulated.

I am assured by the Executive Committee, that rigid economy is practiced in the management of the department, and that it conforms to the instructions of the Board to "live as far as possible within its visible means of support."

The Superintendent informs me that the out-standing warrants, drawn upon the Treasurer by the Executive Committee, remaining unmet from the warrant book on account of the lack of funds in the Treasury to pay them, amount at present to the sum of \$44,861.57. Add to this \$8,000 borrowed by the Board from the Bank of Pittsburgh, the year before last, long past due and unpaid, and the debt owed the Pennsylvania Railroad Company of \$50,000, (upon which \$3,000 of interest is paid annually,) and we have an indebtedness of \$102,861.57. It is indeed a sad duty to report, and publish, this most unfortunate state of things.

It was not deemed wise to ask the Legislature at its last session to appropriate money to liquidate the debt to the railroad company, in view of the fact, that your honorable body, (the Board of Public Charities,) had recommended our application for an appropriation, to pay existing deficiencies for maintenance of indigent patients, and because we had assurance, that the Legislature would grant it, as it did. Unhappily the relief promised, was cut off by the Governor, who saw fit to veto the clause in the appropriation bill, intended to effect this purpose.

The serious question has at length presented itself: *Can the Medical and Surgical Department of the Hospital be longer maintained?* Most assuredly its doors will not be closed against the sufferers who are brought to it every day—poor homeless ones, victims of accidents, and misfortunes, that occur in the city streets, on the railroads, in the workshops and mills,—and in the surrounding counties also—as long as a hope remains that it is possible for us to afford them shelter and relief. There were last year 42,000 days of care and treatment rendered to just this class of patients.

A determined effort must be made to maintain and support this “noble charity.” Appeal is made to the Board, to the Contributors, who are already members of the Hospital Association, and to all who are charitably disposed, to give more money—liberally too—for suffering humanity’s sake.

During the past year, the mansard roof has been completed and sixteen new rooms added to the Hospital. These have been finished, and furnished, by friends of the Hospital. A new building, for dormitories for the female nurses, is being built adjoining the main building, through the generosity of Henry Phipps, Jr., Esq., which will cost about \$12,000.

The necessary repairs for the preservation of the property, and the comfort of the patients, have been made, and every part of the Hospital has been kept clean, and in good condition.

The Superintendent has been most assiduous in the performance of his duties, and with the Medical and Surgical Staff and resident, Surgeons and Physicians, have our sincere thanks.

For details, financial statements, statistics, and many other items of importance and interest, overlooked, or necessarily omitted in this report, I refer to the statements and reports of the Executive Committees, the Treasurer, the Superintendents, and the Physicians and Surgeons which accompany this.

The Endowment Fund has been increased \$2,500 by a payment on account of the residuary estate of the late John Holmes, and by a stock dividend of one share of the Monongahela Navigation Company, and now is \$234,150.

The *Brewer and Crawford Fuel Funds*, "for the purchase of Coal for the worthy poor of Pittsburgh and vicinity," are unchanged. Coal was purchased with their earnings and distributed as heretofore by the Committees in charge, whose reports are submitted.

In Memoriam.

In presenting the reports of these later years, it is a fitting part of their history to record, with renewed sadness, the passing away of some of those who gave the Hospital its life and purpose, those whose thoughts and deeds are crystallized in its present work. In the pride and triumph of American progress no one forgets those who, in doubt and danger, crossed an unknown sea to plant on bleak New England's shores the standard of that freedom we to-day enjoy. Nor shall we, in these more favored times, when governments, municipal, state, and national, all give tender thought to charity—forget those who founded this Hospital in days when work was pressing, when money was scarce, and when personal work meant personal sacrifice in a sense far beyond that of the present. Those men are passing from us as a tale that is told, and this year, sees the leader among them gathered to his fathers in the fulness of years.

For twenty-five years JOHN HARPER was President of the Western Pennsylvania Hospital, and an officer of its Board of Managers since its organization in 1848.

His service began in the days when the Hospital work was most exacting, and he was not a man to do less than his duty in any position he occupied. Few of our present Managers know the work, the responsibility, the discouragement of those early days. No such result comes without earnest thought and devoted labor, and that thought and labor came from our late President and his associates when the need was sorest. Let not those who now

easily enter into the fruit of their labors, forget the pioneers who toiled through the heat and burden of the day.

Born in Donegal, Ireland, he came to America when a child, and lived a long and honored life in this community. His history is written here in Pittsburgh, in its oldest bank and in the *Western Pennsylvania Hospital*. No more is necessary than to say

JOHN HARPER,

BORN DECEMBER 5TH, 1811.

For forty-three years an officer of the Board
of Managers of the Western Penn-
sylvania Hospital, and for
twenty-five years
its President.

DIED APRIL 5TH, 1891.

"Of all the gifts that can be given by men,
Gifts of the purse, and rarer gifts of pen,
He giveth best, and doth the most impart,
Who to 'God's Poor' gives care, and thought, and heart."

In addition to the President of this Corporation, death has also taken from us, MR. WM. MCCREERY, Chairman of the Executive Committee of the Medical and Surgical Department.

Mr. McCreery was born in Washington Co., Pa., August 14th, 1828, and died in Allegheny, September 16th, 1891, after an illness of one week.

Serving as a Director of "The Soldiers Sanitary Home," until its dissolution, he was made a Life Manager of the Western Pennsylvania Hospital, in 1871, and succeeded Gen'l J. K. Moorhead, as Chairman of the Executive Committee, of the City Hospital in 1884. In this position he found a field for the full exercise of his nervous energies, and his warm sympathies for suffering humanity. While unsparing of his personal efforts and time, he possessed the rare faculty of communicating to others a portion of his own devotion and enthusiasm.

His interest in the moral welfare of the patients was such that he, in company with his wife, spent every Sunday afternoon at the Hospital in personal ministrations to the unfortunate.

All of which is respectfully submitted.

W. A. HERRON,
Vice President.

Report of the Executive Committee

OF THE

Department for the Insane at Dixmont.

TO F. R. BRUNOT AND WM. A. HERRON,

Vice Presidents of the Western Pennsylvania Hospital:

GENTLEMEN:—The Executive Committee for the Insane Department at Dixmont, beg leave to submit a report of its operations for the year ending October 1, 1891.

The improvements, additions, and repairs mentioned in the last annual report, have been completed and paid for in full.

The principal annex denominated No. 3 has been completed, furnished, and is now occupied by 125 patients; in the opinion of the committee the expenditure is fully justified by the additional comfort afforded to the patients.

The new boilers at the pump house, and the steam conduit leading from these to the buildings on the hill, have been completed and in operation for some months and give entire satisfaction, and in case there should be a necessity for a return to coal for the generation of steam would save a large sum, avoiding the former necessity of hauling all the fuel used for that purpose to the old boiler house on the hill.

Many minor improvements have been made, the buildings have been kept in good repair, and more than the usual amount of work done on the grounds and roads.

The committee have made the regular weekly visits to the Hospital and have given attention to matters within the line of their duty.

All of which is respectfully submitted.

WM. P. TOWNSEND,

Chairman.

W. A. HERRON,

R. M. TINDLE, M. D.,

C. E. RUMSEY,

J. W. PORTER,

R. H. HERRON,

F. S. BISSELL,

JOHN A. HARPER, *Treasurer.*

Eight thousand dollars, (\$8,000) borrowed by order of the Board, in 1890, on
the obligations of the institution, remain unpaid.

We, the undersigned, the *Finance Committee*, appointed for the
purpose, have carefully audited the accounts of Mr. John A.

Harper, the Treasurer of the Western Pennsylvania Hospital, (Medical and Surgical Department,) and found them correct and satisfactory as above presented showing the balance on hand, October 15, 1891, to be ten hundred and thirteen and $\frac{64}{100}$ dollars.

GEORGE A. BERRY,
CHRISTOPHER ZUG,
ALEXANDER NIMICK.

Endowment Funds.

*To the Board of Managers of the
Western Pennsylvania Hospital.*

GENTLEMEN:

We have examined and counted the securities belonging to the Endowment Funds of the Western Pennsylvania Hospital in the possession of the Treasurer, Mr. John A. Harper, and found the same to be correct.

These consist of securities belonging to—

The Department for the Insane at Dixmont.

One Bond of the Allegheny Valley Railroad Company.....	\$ 1,000 00
Nine Bonds of \$1,000 each, of the Borough of McKeesport, (Water Improvement Loan).....	9,000 00
Thirteen Bonds of \$1,000 each, of the Pittsburgh Junction Railroad Company.....	13,000 00
	\$23,000 00

Securities belonging to—

The Medical and Surgical Department of the Hospital.

One hundred Bonds of \$1,000 each, of the Mercantile Library Hall Company of Pittsburgh.....	\$100,000 00
Two Bonds of \$1,000 each, of the Federal Street and Pleasant Valley Railroad Company.....	2,000 00
Six Bonds of \$1,000 each, of the Pittsburgh Traction Company....	6,000 00
Six Bonds \$1,000 each, of the Citizens Traction Company.....	6,000 00
Two Bonds of \$1,000 each, of the Allegheny Valley Railroad Company.....	2,000 00
Eight Bonds of \$1,000 each, of the Borough of New Brighton, Pa., (Street Improvements).....	8,000 00
Five Bonds of \$500 each, of the Minersville Sub-School District....	2,500 00
Registered Bond of the City of Pittsburgh, (Water Extension Loan)	57,000 00
Bond and Mortgage \$16,000, John F. Cluley, (matured) \$8,000 paid on account, leaving balance due.....	8,000 00
Loan to Isabella Furnace Company.....	15,000 00
Loan to S. S. Marvin & Co, (secured by collateral).....	10,000 00
	\$216,500 00

Amount brought over.....	\$216,500 00

Committee.

REPORT

OF THE

Physician and Superintendent

OF THE

Department for the Insane at Dixmont.

REPORT
OF THE
Physician and Superintendent
OF THE
HOSPITAL FOR THE INSANE AT DIXMONT.

To the President and Board of Managers:—

GENTLEMEN:—With the close of another year it again becomes my duty in compliance with your rules and regulations to present to you, and for your consideration, a statement of the affairs of the Hospital for that period, and I therefore respectfully submit the following details as my report for the year 1891.

The year now passed has been one of constant and renewed effort upon the part of all to promote the efficiency of the Hospital in affording every comfort to those who are gathered within its walls and dependent upon its care, and though the number of those in whom the gloom and shadow of a clouded reason were dispelled by healthful and cheering influences surrounding them fell far short of that in former years, yet I feel encouraged we were permitted to enjoy even this portion of success as a result of our labor.

During the year one thousand and five persons were under treatment; of this large number seven hundred and thirty-three comprised our resident population at the date of my last annual report, since that time there were two hundred and seventy-two admissions, of whom one hundred and fifty-nine were males and one hundred and thirteen females, our daily average population for the year was seven hundred and fifty, while the highest number of patients in the house at one time was seven hundred and sixty-three, and the smallest number occupying the wards was seven hundred and thirty-one, or

one hundred and forty-six patients in excess of the actual capacity of the Hospital. From these facts is ascertained the extent of the overcrowded condition of our patients, and to the "hospital man" presents at once the many difficulties and perplexities arising as a result of this condition, embarrassing and preventing often his successful prosecution of the individual treatment of cases, and thereby in a very large measure defeating the highest aims of the Hospital. That the percentage of cures as also that of deaths in this Institution is attributable to, and influenced in a proportionate degree by this one condition, is an opinion long entertained by your Board, as well as myself. No hospital for the insane should therefore contain a number of inmates greater than its ability to provide for them properly; nor should its number exceed the ability of its medical staff to afford each patient that personal care and treatment his case may require. Such treatment however is quite impossible under the existing state of affairs in this Hospital and the only relief seems to lie in the early erection of the new hospital designed to accommodate the chronic insane now resident in the large hospitals of this Commonwealth. With the removal of this class of patients it is thought the long sought for relief will be at hand, and this Institution will then become what it was originally designed to be—a hospital—rather than an asylum. Unfortunately the bill providing for the care and treatment of the insane criminals now confined in this and other hospitals in a building to be especially constructed for them was defeated at the last session of the Legislature, so that we continue to receive and still hold in custody patients belonging to this class.

The failure of this bill to become a law was a great disappointment and entails upon the Hospital the necessity of continuing to act as a refuge and jail for these unfortunate people, who, while they demand and should receive every remedial attention, should more properly be treated in a separate and remote institution.

Of the total number of patients under treatment thirty-four men and twenty-two women were discharged restored, or $5\frac{1}{2}$ per cent of the total number under treatment; thirty-eight men and twenty-eight women discharged as improved; four men and three women as unimproved, and sixty-seven men and fifty-three women died. Of those admitted fifteen were between the age of ten and twenty years. One hundred and forty-eight were between the age of twenty and forty years, fifty-six were from forty to fifty years of age, thirty-four were aged between fifty and sixty years, or older. Ninety-six admissions

were acute cases, in whom insanity had existed for a period not longer than six months, while in one hundred and ten patients received, the form of mental disturbance from which they were suffering had become chronic in its character, in many instances the patient having been insane for years; such was the history of six persons, who had been insane over thirty years. Of sixty-six patients admitted no record of the duration of their disease could be ascertained.

One hundred and eighty-seven were admitted upon the certificates of insanity of two physicians, and in whom the requests for their admission were signed either by their friends or by the directors or overseers of the poor.

Eighty-five patients were received whose commitments were issued by the courts of the several counties of this asylum district. In this connection it may be well to state that in the reception of patients to this Hospital no distinction is made as to their care or treatment, whether they are private or indigent insane, their classification also is based solely upon their mental condition, and all associate and mingle one with the other as one family. This system while being an old one, possesses many excellent arguments in its favor, and undoubtedly is the more charitable, so long as the Hospital is crowded and receives both classes of patients. In the matter of treating acute cases, however, and in the reception of "well to do" patients the present method employed has its disadvantages, and it is hoped the day is coming when present classification, with its necessities, as also its objectional features may be overcome.

During the year one hundred and twenty deaths occurred, and from an examination of the mortuary tables included in this report, it is observed fifty-two patients died from consumption, whose average residence in this Hospital was four and one-half years. Of these two patients had been residents for thirty years each, one had resided in the Hospital eighteen years, one seventeen years, one fifteen years, one thirteen years and two nine years each. Death in seventeen male patients occurred from the exhaustion of paresis, in eleven cases it was due to apoplexy. The exhaustion of acute mania, melancholia, and the chronic form of these diseases caused nine deaths; the remaining causes of death were heart disease, septicaemia, typhoid fever, pneumonia, Brights disease, dysentery and old age. The percentage of deaths based upon the total number under treatment was $11\frac{9}{16}$ per cent.

At the time of death seventeen patients were between the ages of twenty and thirty years, twenty-nine between the ages of thirty and forty years, fifty-three were over forty years of age, seventeen were over fifty years of age, fourteen were aged sixty years or older, five were seventy years of age and three were eighty years and over.

Many patients brought to the Hospital were in a dying condition others were very aged and feeble, and for whom nothing could be done but to make them as comfortable as possible until their release by death. Several were received handcuffed, and one male patient was brought to us bound hand and foot on a plank eight feet long. A number of cases also were admitted who were suffering at that time from the depressing influences arising from the indiscriminate and unwarranted use of the bromides, chloral and morphia, and whom it was impossible to arrest from the fate awaiting them.

In many cases also patients at the time of their reception into the Hospital were found to be extremely filthy, with vermin infesting their clothing and person, notwithstanding the fact they had been residents, some of them, of the various jails and county homes for weeks. The facts here given are additional reasons for our high mortality, and in fourteen patients admitted under the above circumstances, their average period of residence in the Hospital was but nine days.

In writing this report, and in stating a few of the more prominent causes of the seemingly large death rate and the comparatively few cures for the year, it is not my desire or intention to present to your Board any excuse, or in any manner condone either results. The reason more patients annually are not returned to their homes in the full possession of their mental faculties, and that so large a number die, is not the fault of this or any other well-managed hospital, but due very largely to the causes I have stated. Much has been written upon the early treatment of insanity, and it would seem such warning was in vain. The fault does not all lie in the hospitals, and until the present methods are altered to those of intelligent and humane principles, the percentage of restored and death may be expected to remain unchanged.

In the summer and early fall months many of the patients and employes were taken sick with dysentery and typhoid fever, but I am glad to report in neither instance did the prevalency of these diseases

assume the proportions of becoming epidemic in character. The long-continued warm weather, with rapid changes of lowered temperature at evening, was sufficient to produce the former, while the exhaustion of our spring water supply, consequent upon the prolonged drought, and the drinking of river water, were of themselves equally prominent causes for the appearance of fever.

Owing to the crowded condition of our departments it was impossible to isolate these cases, and they were therefore treated in their respective wards. In doing so the danger of spreading the infectious germs was much exaggerated, though every preventive was adopted. I earnestly hope that within the coming year a suitable building may be erected, to be known as a hospital ward, in which all cases infectious or contagious in character can be there located and treated.

Post-mortem examinations were conducted as frequently as possible during the year, and a number of rare and instructive specimens of disease were collected and mounted. In very many instances the friends removed the remains of their deceased without permitting of such examinations being made, and thereby much valuable information and interesting facts were lost. The same remark applies to the law creating the Pennsylvania State Anatomical Society, compelling the Hospital, as it does, to turn over to that association the bodies of all patients who are unclaimed by their friends.

With the advent of pleasant spring weather a daily average of two hundred male patients were engaged with their attendants in the performance of some light but useful out-door labor. The work done by them was in no instance compulsory, though all who were able and willing, as well as those in whom the exercise was deemed advantageous, were urged to take part. The work accomplished, therefore, with this large force during the summer was of greater magnitude than ever before undertaken.

Of the labor performed by the patients may be mentioned the grading and terracing of the grounds surrounding the Annex, keeping the lawns in order, planting one thousand fruit trees, making roads and assisting in the construction and completion of the many repairs and improvements, and it is safe to say the grounds never presented so beautiful an appearance as they did throughout the year. Too much cannot be said in favor of suitable occupation for the insane, and the contentment, happiness and improved health of

all our patients who were so engaged is ample proof of the benefit derived by them from this method of treatment. Of this small army of patients, it may be added, not an escape or accident is recorded.

Within doors the female patients were usefully and pleasantly engaged in industrial work of all kinds, such as sewing, fancy work, rug making and in the performance of the every-day household duties. Those of them also who wished, and in whom it was thought prudent and beneficial, were permitted to assist in light work in the laundry department.

Regarding the amusements provided our household, it may be mentioned the wards were constantly provided with games of all kinds, the daily papers, periodicals, &c. I regret exceedingly our library being so small and the books soiled and worn.

Through the kindness of our attendants many of the patients were permitted to accompany them to the city, and while there enjoy the theatre, and on Sunday they were also taken to attend religious services in the neighboring churches; regular service was also held in our chapel each Sabbath during the year.

Owing to the generous action of the Pittsburg Exposition Society in granting us free admission, about one hundred of our patients were afforded the pleasure of visiting this exhibition. The usual custom of observing the holidays was not overlooked, and the various departments of the Hospital were prettily decorated with evergreen and holly. In response to a circular letter sent to the family of each patient we received large contributions of Christmas presents, enabling us to make every member of our household happy on that occasion, in being remembered by their loved ones at home. A number of concerts, plays, weekly parties, magic lantern exhibitions and sleighing served to entertain them during the winter months, while in the pleasant season of the year all were given the privilege of engaging in outdoor games and exercises. Broader views and the spirit of liberality has everywhere pervaded the management of the Hospital in its treatment and to provide the greatest freedom and comfort of the patients, and to remove from them in so far as possible all appearance of restraint compatible with their best interests and that of the institution. The patients were treated in accord with the most recent and approved scientific principles of psychiatric medicine, and to this end no effort was spared to place the Hospital upon a high plane

and take front rank in the methods of treatment of mental disorders. The attendants also received systematic teaching in all branches relating to the art of nursing, and it is gratifying to note many of them have been with us several years and may now properly be regarded as competent and experienced nurses.

Probably no part of the management of a hospital occasions the superintendent so much anxiety as the proper selection of those persons employed as its attendants, and no one but he knows how great the difficulty is to procure honest, capable and efficient young men and women. Many from necessity are engaged who at the time possess but few qualifications, and the work of fitting them for their duties by teaching and training is often tedious and wearisome. These remarks are particularly applicable to our male department, where the changing of nurses is more frequent than among the females. The insane should receive skilled nursing at the hands of their attendants and companions, and it is to be hoped the time is coming when the number of trained nurses will warrant hospitals in choosing only those who are thus thoroughly prepared and equipped in all that pertains to their sacred duty. In the male department I am glad to report the nurses have been uniformed.

In referring your Board to the question of improvements and repairs I would direct your attention to the present condition of our buildings. During the summer months all our outbuildings were carefully painted and placed in thorough repair by our own force of labor, aided very largely by a number of patients who were desirous of assisting in the performance of this work. Within the Hospital the work of house cleaning and repairing was similarly conducted, and many new pictures were added to the wards. At the close of the year, therefore, I think you will find all our departments in good order, clean, and the wards presenting a neat, tidy and homelike appearance. For an enumeration however of the other improvements as well as repairs undertaken during the year, together with their necessity and individual cost, I refer you to the report of the Executive Committee.

From the report of the Treasurer will be learned the financial condition of the Hospital for the year, and by reference to the expenditure list will be ascertained the various sums of money expended for all purposes, and the total cost of maintenance.

As the Hospital farm is unable to meet the demands made upon it for the supply of fresh table vegetables and fruit, by our constantly increasing population, the Executive Committee again decided to rent about sixty acres of land located upon the island, and opposite the institution. By this means we were furnished an abundance of all kinds of vegetables and of an excellent quality.

The dairy, consisting of forty cows, yielded a plentiful milk supply for the sick, and general use in the house. Within recent years much care has been taken in the purchase and selection of stock, until now we have a creditable herd of Jersey and Holstein cattle, and as a consequence our milk is rich in quality and more abundant.

It is with a deep sense of gratitude I recognize and acknowledge the interest taken in the welfare of the Hospital by its many friends, who during the year contributed so materially to the comfort and happiness of its patients, and to feel the interest thus manifested is not confined to those whose families are represented here, but is widespread and indicative of the fact the subject of insanity and the treatment of the insane are now better understood, and the importance of their claims for larger recognition as a charity, however slow it may be, is receiving everywhere greater attention than ever before.

To the following ladies and gentlemen and their friends we are indebted for a series of concerts, musical entertainments and plays during the winter: Mrs. Edward Townsend, Lotta and her troupe, Miss Aiken, Mrs. Helen Stuart-Richings, Mr. J. J. Isensse, and the Apollo Club, Mr. Harry Armstrong, The Hayden Quartette, Mr. Wm. R. Burress and Prof. Stinson.

To Mr. Geo. E. Little, of Washington, D. C., for Crayon sketches.

The following friends kindly sent contributions of "good cheer" to assist in the general "Christmas Merry Making:" Messrs. Reymer Brothers, Arbuthnot, Stephenson & Co., Dilworth Bros., J. Klee & Co., S. Kaufman & Sons, Mr. Henry B. Rea, J. M. Gusky & Co., James B. Haines & Son, Mr. Marcus Ice, J. G. Lauer & Son, Haworth & Dewhurst, L. H. Smith & Co., Mr. J. M. Craff, Mr. C. B. McLean, Mrs. Samuel McKee, Mrs. M. G. Barnett.

To Mr. F. S. Bissell, Mrs. John G. Holmes, Hon. Jas. B. Scott, Hon. Wm. A. Herron, Mr. Joseph Fleming & Son, Mr. Edward F. Groetzing, Mr. Wm. Scott, Mr. Charles Hays, Miss Oxnard, Miss

Lizzie A. White, Mr. D. D. Domer, Mr. Buchanan, Rev. Mr. Flink, Mr. Thomas F. Jamison, Messrs. Demler & Schenck, Superintendent James Reed, Prof. John Morrow, Miss Andrews, Mr. Thomas H. Lane, Mr. H. A. Phillips, Pittsburg Dispatch Publishing Co., and Mr. J. B. Griggs, Secretary Pittsburg Y. M. C. A., we are indebted for frequent contributions of reading material. Dr. George G. Graham presented the Hospital with twelve beautiful pictures and six bound volumes of Harper's Illustrated Weekly. Hon. John Neeb sent thirty bound volumes for our library.

To the Editors of the newspapers below mentioned we are placed under obligations for copies of their papers sent regularly to the Hospital :

The Monongahela Daily Republican,	Butler Democratic Herald,
McKeesport Daily News,	Indiana Democrat,

From Mr. G. B. Squire and Mr. James B. Scott were received several large photographs, suitable for framing and placing in the wards, and to Col. Glenn, Superintendent of the Allegheny County Home, we are indebted for a standard-bred Holstein-Freisian calf.

In the main entrance hall was placed, as the gift of his family, a portrait of the late Mr. John Harper, so long the honored President of your Board. In the death of Mr. Harper it may most truthfully be said the Hospital has lost a good and kind friend, and the insane one whose heart and hand were ever ready to afford relief and to comfort those thus sadly afflicted.

In the early part of May Dr. James V. Anglin, the third medical assistant, resigned his position in order to accept an appointment upon the staff of the Hospital for the insane at Montreal. To the vacancy thus occasioned Wm. K. Walker, M. D., of Philadelphia, was chosen as his successor. Dr. Walker is a graduate of the University of Pennsylvania, and by preliminary education and professional and social attainments is well prepared to assume the duties he now performs with such marked ability.

It gives me great pleasure to record my appreciation of the services rendered by my older associates, Dr. George G. Graham and Dr. W. Brown Ewing. These gentlemen have been indefatigable in their energy, zeal and uniform kindness to alleviate the distresses of those under their care, as well as assisting me in the performance of my duties, which at times are most exacting and arduous.

To the heads of the various departments of the Hospital, for their efficient and watchful care of the trusts reposed in their keeping, I extend my heartfelt thanks.

And to the attendants who so cheerfully and conscientiously watched over the interests of our patients, not only caring for them in their daily pursuits and pleasures, but in tenderly nursing them through disease and in aiding them to restoration of mind and bodily health; too much cannot be said of the faithful and intelligent manner in which their duties have been performed. No one but those intimately acquainted with hospital life among the insane can understand and appreciate the trying and oft-times self-sacrificing difficulties they encounter, and I regard very much of our success the result of their painstaking and kindly care.

And in conclusion permit me to express to you, gentlemen, the President and members of the Board of Managers and of the Executive Committee, my appreciation of your at all times cordial and courteous treatment toward me personally, and your ever ready and valued assistance and support in the discharge of the duties of my position as your Superintendent, and, committing the Hospital into the hands of a kind Providence to still further guide and direct us during the coming year, I close this report.

HENRY A. HUTCHINSON.

Dixmont, Pa., October 1, 1891.

Statistical Tables, 1891,

ALLEGHENY,	FAYETTE,	JEFFERSON,	WASHINGTON,
BEAVER,	GREENE,	LAWRENCE,	WESTMORELAND.
BUTLER,			

Admission of Patients to Insane Department.

1. Preparatory to the admission of a patient, unless when committed by order of a court, the Superintendent shall be furnished with the certificates of two physicians, who have been in practice for five years or more, that they have separately seen and examined the individual within two weeks of the date of admission, and believe him or her to be insane, and these certificates shall be sworn to before some alderman or judicial officer, with the order of a near relative or friend that the patient may be received into the Hospital, with a statement as required by law, and a bond with satisfactory security, for the payment of board and other expenses while in the institution. All private patients thus received shall make a payment of thirteen weeks' board in advance, when brought to the Hospital, no part of which shall be refunded; and if taken away uncured, and against the advice and consent of the physician, in any succeeding quarter, no part of the payment shall be refunded.

2. Whenever a patient is sent to the Hospital by order of the Court, the order or warrant, or a copy thereof, or, if sent by the Directors of Poor, an order sent by the Directors or their Agent accompanied by the Certificates of Insanity, as required by law, shall be lodged with the Superintendent of the Hospital.

3. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

4. Each male patient shall be provided with at least three new shirts, a new and substantial coat, vest and pantaloons, three pairs socks, two pairs drawers, two undershirts, a hat or cap, cravat, collars, handkerchiefs, shoes and one pair of slippers.

5. Each female patient shall have three calico dresses, four chemise, three pairs drawers, three pairs hose, three night-gowns, two flannel skirts, one Balmoral skirt, two muslin skirts, six handkerchiefs, four collars, two pairs shoes, one shawl or cloak, and one hat or hood.

6. It is very desirable that extra and better apparel should be sent with those accustomed to it, that when their health is improved, or when they attend religious worship, walk or ride out, their self-respect may be preserved.

In all cases the patient's best clothing should be sent; it will be carefully preserved and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, knives, &c., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

All clothing, if not taken away at the time of the patient's removal, or within three months afterward, will be disposed of as the officers of the Hospital may think best, and no compensation whatever will be made therefor.

7. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him or her to the Hospital, and from whom minute, but often essential particulars may be learned.

8. The price of board, including washing, mending, and attendance for all who are supported at the public charge, is four dollars per week. For private patients, or those supported by themselves, or their friends, the price varies from five to ten dollars, according to the trouble and expense incurred, and according to their ability to pay. Higher prices are paid by special agreement with the physician, for extra attention and accommodation.

Payments are to be made quarterly, in advance.

9. A bond, with satisfactory sureties, will be required for the payment of the board and expenses, and for the removal of the patient when discharged, of all persons, excepting those sent at the expense of the counties or townships.

Those who bring friends should be prepared to give a bond, and, if strangers, furnish evidence of their responsibility.

10. All bills remaining unpaid one month after date of presentation, are placed in the hands of the Solicitor of the Hospital for collection.

11. As the diet of the patients is under the absolute control of the Superintendent, no nuts, candies, cakes or other edibles shall be given to the patients, by their friends or visitors, without his express permission.

12. Visitors are admitted to inspect the Institution on any day (except Sunday,) between the hours of 10 A. M. and 12 M., and between 2 and 4 P. M.; but no visitor shall be admitted to the wards occupied by patients, without express permission from the Superintendent; and especial care is to be taken that no amount of visiting is permitted that shall prove injurious to the patient. No visitors shall be admitted on the holidays.

Visitors will please not intrude on the grounds used by the patients, or give to or receive anything from patients.

13. The Hospital is located eight miles west of Pittsburgh, on the Pittsburgh, Fort Wayne and Chicago Railway, at Dixmont, and can easily be reached by cars, there being ten trains (east and west,) each day; (except Sunday) stopping at the Hospital Station.

14. Applications for the admission of patients, and all communications in regard to the condition, health, bills, &c., of those who are in the Hospital, shall be made to the Superintendent.

15. As Dixmont Station has now an Adams Express Office, all goods may be sent to the Hospital direct by express or freight, as may be preferred.

The friends of patients can communicate with the Institution by telegraph and telephone.

Forms of Commitment.

The following forms have been prepared by the Committee on Lunacy, to be used in all cases (except those sent by order of Court) for the commitment of Insane patients by their friends or by Directors and Overseers of the Poor, to the Hospital for the Insane at Dixmont, Pa. No such patients will be received unless the Forms as given are fully complied with.

Bond for Private Patients.

Know all Men by these Presents, That we, of in the county of and State of Pennsylvania, are held and firmly bound unto the WESTERN PENNSYLVANIA HOSPITAL, its successors or assigns, in the sum of One Thousand Dollars, for the payment of which we jointly and severally bind ourselves, our heirs, executors and administrators, firmly by these presents : (And do hereby empower or any attorney of any Court of Record within the United States or elsewhere to appear for....., and after one or more declarations filed, to confess judgment or judgments against in favor of the WESTERN PENNSYLVANIA HOSPITAL, as of any term for the above penalty, with costs of said suit, and attorney's commission for collection, viz : Five per cent. in case payment has to be enforced by process of law ; hereby waiving inquisition and condemnation of any property that may be levied upon by virtue of any execution, which execution may issue forthwith, on failure to comply with any of the conditions thereof, and hereby waiving the right of exemption from levy and sale of any and all property that now is, or hereafter may be, exempted from levy and sale, under any Act of Assembly for such purpose, and with release of all errors, &c.) And it is further agreed and provided that execution and alias, and pluries executions may issue at any time, and from time to time, and as often as any amount shall be due and owing to said WESTERN PENNSYLVANIA HOSPITAL, and that the books of said Hospital shall be evidence, and a liquidation of the amount to be collected on said executions.

Witness hand and seal the day of in the year of our Lord One Thousand Eight Hundred and.....

Whereas of in the County and who is insane, has been admitted as a patient to the WESTERN PENNSYLVANIA HOSPITAL, at Dixmont, Pa.

Now, therefore the condition of the obligation is, That if the said obligors shall pay to the said WESTERN PENNSYLVANIA HOSPITAL, its successors or assigns, the sum of Dollars and Cents per week, for the Board of said patient, so long as shall

continue in said Hospital, with such extra charge as may be occasioned by requiring more than ordinary care and attention, and shall provide for suitable clothing ; and shall pay for all such necessary articles of clothing as shall be procured for by the said Hospital ; and shall remove from the said Hospital whenever required to do so by the Superintendent, and if the said obligors shall also pay, not exceeding Fifty Dollars for all damages the said patient may do to the furniture, or other property of the Hospital, in any one quarter, and for reasonable charges in case of death ; and in case the said patient shall be removed from said Hospital by, or at the request of us, or either of us, or by any other person or persons, before the expiration of three calendar months after reception, then if the said obligors shall pay the board of said patient for thirteen weeks, and all other charges on the books of said Hospital, all payments for board and clothing to be made in advance, quarterly on the fifteenth day of March, June, September and December in each year, and at the time of removal, with interest on each bill from and after the time it becomes due—then this obligation to be void, otherwise to remain in full force and virtue.

Signed, sealed and delivered in presence of us.

.....[SEAL.]

.....[SEAL.]

Commitment at request of party interested, after finding of the insanity of the patient.

THE COMMONWEALTH OF PENNSYLVANIA,

To the Sheriff of.....County, and to the Western Pennsylv-
[SEAL.] *vania Hospital:*

WHEREAS, at the.....Sessions, 18..., of the Court of.....in and for said County of.....held at....., on theday of.....18..., the same being a Court of record in Western Pennsylvania, and having jurisdiction of offenses that are punishable by imprisonment for the term of ninety days or longer, the petition ofwas presented, applying to our said Court for the commitment to the Western Pennsylvania Hospital of.....alleged by said petitioner to be insane, and resident within the said county of.....

And whereas, on the.....day of.....18..., a jury was called, elected by ballot, duly accompanied and sworn according to law, to inquire into the fact of the insanity of said....., in the manner provided by law; and said inquest did, upon their several solemn oaths or affirmations respectively find that the said.....is insane:

And whereas, our said Court being satisfied that the said.....is, by reason of such insanity, *unsafe to be at large, or is suffering under unnecessary duress or hardship*, did, on the.....day of.....18..., adjudge and decree that the said.....be committed to the Western Pennsylvania Hospital to be treated according to the rules and regulations of said Institution, and the laws of the Commonwealth, and there be detained until the further order of said Court, or of one of the Judges thereof; and further, that the expense of the care and maintenance of said....., and of his removal to and from said Hospital shall be paid by the said county of.....according to law.

And whereas, it was made to appear to our said Court, that the saidhad, at the time of the finding of said inquest, *a legal settlement in the.....in said county* of all which facts our said Court has given due notice to the constituted authorities having charge of the poor in said.....of.....;

Now, therefore, these are to charge and command you, the said Sheriff, forthwith to convey and deliver into the custody of the Western Pennsylvania Hospital, in the county of Allegheny, in this Commonwealth, the body of said.....and you, the said Western Pennsylvania Hospital, are hereby required to receive the said.....into your custody, care and keeping in the said Hospital, and there to keep *him* safely, to be treated according to the rules and regulations of said Institution and the laws of this commonwealth in such cases made and provided, until the further order of our said Court, or of one of the Judges thereof.

Witness the Honorable, the President Judge of our said Court, this.....day of....., A. D. 18...

ANNUAL REPORT

OF THE

MANAGERS

OF THE

Western Pennsylvania Hospital.

To the Honorable President and Members of the Board of Public Charities:

GENTLEMEN:—On behalf of the BOARD OF MANAGERS OF THE WESTERN PENNSYLVANIA HOSPITAL, I have the honor to lay before you a statement of its affairs for the year ending September 30, 1892.

Adopting the precedent established, I first refer to the department for the Insane, at Dixmont, on the line of the Pittsburgh, Fort Wayne and Chicago Railroad, eight miles below the city of Pittsburgh. The farm at Dixmont comprises about 375 acres, (purchased by individual subscriptions) and is well adapted for the purpose to which it is devoted. The land is for the most part precipitous hillsides, almost mountainous in character. A considerable portion is heavily wooded with forest trees. The portion that is capable of cultivation is managed so as to yield abundant crops of berries, fruits and vegetables, and in the proper places ornamental trees, shrubbery and flowers adorn the premises, and render them very attractive. The character of the ground and its inaccessibility, protects the patients from inquisitive and annoying visitations, and affords them the desired and necessary seclusion. Extensive walks and roads wind throughout the farm, from which magnificent views, up and down the beautiful valley of the Ohio river, may be enjoyed by our people in their rambles for exercise and recreation.

The buildings, with the exception of the house for the boilers, pumping engines, and gas apparatus on the bank of the river, are

located upon a plateau having a southern exposure and an elevation of some 200 feet above the river, where the air is dry and wholesome.

“Air is a dish one feeds on every minute and therefore it need be good.”

The hospital proper is 750 feet long; is a main building in which are the reception rooms, offices, storerooms, kitchens, Superintendent's and Assistant Physician's quarters, and the chapel; on either side extend wings, respectively occupied by male and female patients. The building has capacity to comfortably accommodate 400 patients. To the eastward is a modern hospital building known as the “Annex,” which will accommodate 125 male patients. Three other smaller buildings shelter 75 patients. The total capacity of the institution being, therefore, sufficient for not more than 600 patients. The laundry building, and engine rooms, are to the westward of the main building, and beyond them the barns, and houses for the farmer, and other employes. Thus all the available building ground is occupied, and for this imperative reason the Executive Committee, which represents the Board of Management, has never seriously considered the question of extending the accommodations of the hospital by the erection of more buildings, in order to relieve it of its overcrowded condition. Our statistics show that on the 30th of September, 1892, there were 740 patients under charge. It is a matter of congratulation, however, that this relief may be brought about, soon, when the asylums contemplated by the State for the chronic insane are built; and the department for the insane that Pittsburgh will provide at its magnificent municipal buildings on the new city-farm is ready for its unfortunates.

The opportunity for the effective care and treatment and *cure* of the insane that our Board so earnestly desires, is now to a great extent precluded from force of circumstances, namely, the hospital's over-crowded condition, and for this unavoidable and compulsory reason, the purposes contemplated by the good men who founded the institution some forty years ago are not fully realized.

At the beginning of the year, October 1st, 1891, there were 756 patients in the hospital; during the year 233 were admitted, the total number under treatment was 989; of these 75 were discharged restored, 48 were improved, 9 unimproved, and 117 died. The e were remaining in the hospital September 30, 1892, 740 patients. The average number under treatment during the year was 749, the highest number was 759 and the lowest number 733.

The general health of the patients was good, though the high death rate above reported—which is fully accounted for, and explained by the Superintendent in his report—would seem to contradict this statement.

Typhoid fever, referred to in our last report, continued to exist last winter and early spring, but was of a very mild type, though none the less a matter of serious anxiety to the Board and Physicians, who were unable to discover the source or cause of its existence. But two deaths occurred from the disease named, and for some months past it has disappeared.

On the night of January 21st, 1892, John R. McAfee, an aged, feeble patient, was strangled to death by a fellow patient named O. A. Williams, who was committed by order of the Court of Washington County. No history of his case accompanied his commitment, but the hospital authorities were assured that he was a quiet, harmless man, and there were no reasons for suspecting his homicidal tendencies. He was assigned to a bed in a dormitory, in which several other patients slept, which was necessary, from the fact that all single rooms were occupied by one, and in some instances by two patients. During the night Williams got up, and deliberately choked McAfee to death; then attacked another patient, and doubtless would have accomplished his purpose, had not the night watchman discovered him in the attempt and prevented it. The Superintendent promptly notified the Coroner, who visited the hospital and after making a careful inquiry into the case, exonerated the officers and attendants from blame or censure.

Another case that attracted considerable newspaper notoriety, was that of John McClarren, a patient brought to the hospital from Cambria County, by order of the Court, in May, 1892. He was suffering from Acute Mania, and died four days after his arrival. When received, bruises were discovered upon his head and body, and a consequent *post mortem* held in the presence of a visiting physician, and several members of the Board, developed the fact that his skull had been fractured in three places. The Coroner was notified in this instance also, and held an inquest, which cleared the hospital of all responsibility for the patient's injuries and death.

THE RECEIPTS during the year, were :

Appropriations from the State, for care and treatment of indigent insane, - - - - -	\$ 69,665.34
---	--------------

And from individuals, and public authorities, -	80 555.20
---	-----------

Interest from Endowment Fund, (to be expended for improvement and adornment of grounds,) -	1,300.00
--	----------

THE EXPENDITURES, for maintenance of hospital, payment of salaries and wages, etc., were, - - -	153,619.75
---	------------

No permanent improvements of importance were made, aside from a new roadway at an easier and safer grade up the hill to the buildings, and the renewal of fencing about the property. The usual and necessary repairs of course were carried on.

I regret to report that the much needed new barn has not yet been built, but a very competent committee has this matter in hand, and by its direction much material for foundations and walls has been taken out of the quarries on the hospital property. The next annual report will certainly inform you of the completion of this very important improvement.

Anticipating a possible visitation of Cholera last August and September, when the country was threatened with the pestilence, the Executive Committee promptly considered the danger, and ample provisions were made for the care of any cases that might occur at the hospital.

Dr. W. K. Walker, the junior Assistant Physician, resigned in June, to accept a position in the University Hospital, in Philadelphia. Dr. J. Moorhead Murdoch, who was a member of the Resident Staff of the Medical and Surgical Department of the Hospital, was chosen to fill the vacancy, and performs his duties very satisfactorily.

You are doubtless aware that the immediate management of the hospital is committed by the Board for the sake of convenience, and the expedition of business, to an Executive Committee, which faithfully performs its duties from year to year. The hospital has been visited weekly with very rare exceptions, and often more frequently, and no business of any importance has been transacted except at meetings at the hospital, at which quorums were present. When it is understood that the gentlemen of the Executive Committee are engaged in active business pursuits, that a visit to the hospital occupies the greater portion of the business hours

of a day, and necessitates a railroad journey of nearly twenty miles, their services may be more fully appreciated and valued.

The Superintendent together with his assistants and other employes have industriously attended to their duties, as the condition of the patients, the hospital, and premises fully prove.

THE MEDICAL AND SURGICAL DEPARTMENT IN THE 12TH WARD, CITY OF PITTSBURGH.

The previous Report indicated that 2,318 patients were under treatment. During the year just ended 2,275 patients were treated. The number in the hospital October 1, 1892, was 171. The average daily number was 205. The total number of patients shown by the books from the opening of the hospital to the date of this report is 25,199.

The total number of days of hospital occupancy during the year was 74,522, or, by free patients 43,469 days, by patients who paid in full or in part 21,342 days, and by soldiers 9,711 days. The estimated cost of each patient, per diem, was \$1.13. The cost of food per diem was \$0.33.

THE RECEIPTS during the year, were:—

State appropriations for salaries, wages, and main- tenance, - - - - -	\$ 45,000.00
From pay patients, - - - - -	25,574.16
Earnings of the Endowment Fund, - - -	13,571.00
Ground rent from Pennsylvania Railroad, - -	4,000.00
Bequest from the late Richard C. Gray of Allegheny, (added to the Endowment Fund,) - - -	5,000.00
Contributions, - - - - -	13,206.06

THE EXPENDITURES by warrants upon the Treasurer,
paid during the year were, - - - - - 102,252.10

Our statement shows that a fewer number of patients were received than during the former year. This is accounted for by the fact that the utmost care and discretion were exercised in admitting patients into the hospital, while at the same time I may safely say, that *no acute case of sickness or injury was turned from its doors*. Undoubtedly this course of management is the proper one, yet it would have been

gratifying to our Board could greater latitude have been allowed this department of the hospital in doing its good work, and that it had been permitted to serve every possible worthy applicant for aid that applied. That liberality which we all, prompted by our feelings, would have gladly exercised in this respect, was hindered by a consciousness of its embarrassed financial condition, and forced upon the management the most rigid economy in the administration of its affairs. It has therefore been necessarily deprived of many needed refurnishments, conveniences, and improvements, that would greatly add to the comfort of the patients, a better conduct of its household, and render the buildings and grounds more ornamental and attractive.

During the past year the indebtedness was reduced about \$15,000, for the most part, by contributions received from friends, and at present it is about \$88,000, upon \$58,000 of which (being borrowed money,) interest is paid.

The Legislature will be asked at its next session, with your approval, for appropriations to the extent of \$177,000, namely: for the payment of officers' salaries, and wages of employes, and maintenance of patients, for the two fiscal years commencing June 1st, 1893, \$90,000; for the sum of \$50,000 to pay off the loan due the Pennsylvania Railroad Company, which was obtained by the Board, to liquidate the pressing demands of creditors for purchases of necessary supplies for the maintenance of its sick and helpless patients, (chiefly Pennsylvania soldiers) during, and previous to the years 1883 and 1884. This loan was negotiated by pledging hospital property to the Railroad Company. This application will again be made, with the expectation that it will be realized, as you are aware, it was on two occasions already approved by your honorable body, and passed by both branches of the Legislature, but failed to become a law through the exercise of the veto power on the part of ex-Governor Beaver; for the purpose of reducing the existing indebtedness which was incurred in maintaining the hospital, paying interest, &c., &c., during 1889, 1890, 1891-2, the sum of \$17,000; and for the further sum of \$20,000, for a new set of steam boilers, and a new house for the boilers, a new laundry, and a convenient and centrally located kitchen.

On September 1st, a training school for the education of persons desiring to become nurses was established by the Executive Committee, with the approval of the Board. The school is governed by a sub-committee of the Executive Committee, members of the Medical and

Surgical Staff and the Superintendents of the hospital and the school. Miss Mary McMillan, a graduate of the Bellevue Hospital School for Trained Nurses, in New York, was made Superintendent, and installed in charge. The general need of a better system of training and educating nurses, has for a long time been recognized, and considered by our Managers and Physicians and Surgeons. At length the initiative has been taken, and there appears to be no reason why great and beneficial results to the hospital, and to the community as well, may not follow; for The Western Pennsylvania Hospital possesses peculiar advantages from its large and efficient staffs of Doctors, each eminent in the science and practice of medicine and surgery, and in the treatment of mental and nervous diseases, who are enlisted in the promotion of the training school, and will co-operate in the education of its pupils. All recognize the fact that competent nurses are in many instances as important to success in cases of sickness, and injury, as competent doctors, and the want of such competent nurses is by no means confined to the hospitals only, but is often experienced in the homes of the rich, as well as in the homes of the poor. I trust the time may come, and this is my excuse for dwelling upon the subject of the school, when some generous and kindly disposed philanthropist may choose to provide our hospital with a large and suitable building, *on our ample grounds*, equipped and fitted out with all the necessary medical and surgical appliances, and instruments, with a library, laboratory, lecture rooms, diet-kitchens, dormitories, etc., etc., wherein a school may be conducted in the most liberal manner for the practical education of men and women nurses.

The patients have had every attention that skilled medical and surgical science could devise for their comfort and relief. Their food was invariably of the best quality the markets afforded, and was carefully prepared and served. The property has been diligently looked after, and the evidence of good housekeeping was manifest throughout the building.

THE ENDOWMENT FUNDS.

The Endowment Fund belonging to the Department for the Insane at Dixmont, was not increased and remains, - - - - - \$ 23,000.00

The Fund belonging to the Medical and Surgical Department, was increased \$5,000 by the bequest of the late Richard C. Gray, and is now - - - 305,816.67

THE TRUST FUNDS.

The "*Brewer Fuel Fund*," and the "*Crawford Fuel Fund*," have yielded sufficient income to provide fuel for all the worthy poor of the community, and the Committees in charge of the purchase and distribution of coal have performed their duties judiciously.

The Brewer Fuel Fund is,	-	-	-	-	\$ 77,367.30
The Crawford Fuel Fund (increased \$3,000 during past year,) is,	-	-	-	-	15,000.00

For details, statistics, financial statements, and much other interesting matters, I must refer to the reports of the Executive Committees, the Superintendents and the Treasurer. These are now in preparation and accompany this report.

The Board continues to entertain entire confidence in the Superintendents, Dr. H. A. Hutchinson, of the Department for the Insane at Dixmont, and in Mr. W. A. Cowen, of the Medical and Surgical Department, as well as in their assistants, and other employees, nor does it overlook the obligations due the Medical and Surgical Staff, to whom it is much indebted for the high reputation the hospital has attained. Therefore, to all of them, I hereby tender the acknowledgments of the Board, for the harmony that has prevailed, and the success that has crowned the operations of the Institutions during the past year.

In Memoriam.

WILLIAM THAW, JR., was born in Pittsburgh, December 13th, 1853, and died in Cologne, Germany, September 3d, 1892. He was for years an invalid, yet his cheerful and happy disposition, and remarkable social qualities, made him a general favorite among his acquaintances. He was engaged in active business till the time of his death, being Chairman of the Hecla Coke Company. He was also Director in several Railroad Companies, a Trustee of the Western University of Pennsylvania, a Trustee of the Deaf and Dumb Asylum, a Director of the Bank of Pittsburgh, and an active and interested

member of Scientific and Mechanical Engineering Societies. He was a member of the Brewer Fuel Fund Committee, and had charge of the distribution of coal on the north-side of the Allegheny River.

JAMES I. BENNETT was born in Venango County, Pa., and died on October 11, 1892, aged 73 years. He had been one of the leading manufacturers of Pittsburgh, a public spirited citizen, was one of the promoters of the Pittsburgh & Lake Erie Railroad, and at one time the President of that company.

CHARLES ARBUTHNOT, a Life Manager, and one of the most liberal contributors to the hospital, was born in Ireland in 1816, came to this country when 20 years old. He died October 5th, 1892, at his home in this city. He was one of our foremost business men, and was connected with many of our leading enterprises and institutions. He was an active and practical Christian, and as such, was a frequent visitor to the Medical and Surgical Department of the hospital, where he was accustomed to conduct religious services for the benefit of the patients.

JOSEPH HORNE, another Life Manager, was born at Bedford, Pa., January 11th, 1826, and died at Dansville, N. Y., on October 19th, 1892, whither he had gone from his home in Allegheny in search of rest and restoration to health from prolonged illness. He was a leading merchant of Pittsburgh, a kind, agreeable gentleman, and a liberal contributor to charity, the hospital being a frequent recipient of his bounty.

All of which is respectfully submitted.

J. A. HARPER,

President.

NOVEMBER, 1892.

Report of the Executive Committee.

OF THE

Department for the Insane at Dixmont.

TO JOHN A. HARPER, ESQ.,

President of the Western Pennsylvania Hospital.

DEAR SIR:—The Executive Committee of the Insane Department at Dixmont, have little to report for the past year, except in commendation of the officials of the Institution for the faithful discharge of their respective duties.

More than the usual amount of labor has been expended on the improvement of the grounds and roads leading to the hospital, and a very great improvement in the grade of an important portion; this, though graded, is unfinished. Other improvements about the barn-yard are in progress, and preparations being made for the required new barn, which it is expected will be entirely finished during the coming year.

The advantages secured in the generation of the steam at the pump house on the river bank for all the purposes required in the buildings, have, after a trial for a year, exceeded the anticipations of the Committee.

A large amount of repairs to buildings and furniture have been made. For ordinary repairs, \$5,723.24, and for extraordinary repairs and improvements \$1,581.05 have been expended.

All the buildings are in the usual good repair—a considerable annual expenditure being required for this purpose.

It may not be amiss to state that on the 27th inst., the date of the last meeting of the Executive Committee, and being subsequent to the annual report of the President and Superintendent, there were in the hospital seven hundred and seventy-one patients, being the greatest number there has ever been, all being as comfortably provided for as the crowded state of the hospital will permit.

The Committee have, at their regular monthly meetings, carefully examined all bills and accounts, drawn warrants on the Treasurer for the same, thus liquidating all claims against the hospital regularly each and every month.

Respectfully submitted by the Executive Committee.

WM. P. TOWNSEND,

December 31, 1892.

Chairman.

M. W. McMILLAN, *Treasurer*.

Eight thousand dollars, (\$8,000) borrowed by order of the Board in 1890, on the obligations of the Institution, remain unpaid.

We, the undersigned, the *Finance Committee*, appointed for the purpose, have carefully audited the accounts of Mr. M. W. McMillan, the Treasurer of the Western Pennsylvania Hospital, (Medical and Surgical Department,) and found them correct and satisfactory as above presented, showing the balance on hand October 15th, 1892, to be seven hundred and twenty-two and $\frac{44}{100}$ dollars.

ALEX. NIMICK,
JNO. W. CHALFANT,

REPORT

OF THE

Physician and Superintendent

OF THE

Department for the Insane at Dixmont.

REPORT
OF THE
Physician and Superintendent
OF THE
HOSPITAL FOR THE INSANE AT DIXMONT.

To the President and Board of Managers :—

GENTLEMEN :—The following report of the Department for the Insane for the year closing September 30, 1892, is herewith presented:

From the accompanying statistical tables it will be seen our wards continue to be greatly crowded in excess of their capacity, though the total number of patients under treatment, I am glad to report, falls a little below that of last year, and for the year just closed numbered nine hundred and eighty-nine patients. Of these seven hundred and fifty-six were residents of the Hospital at the beginning of the year, since which time two hundred and thirty-three admissions are recorded, or thirty-nine less than the number received for the year 1891.

The total number of those discharged is the same as for the previous year, in all two hundred and forty-nine. Of these seventy-five were returned to their homes as restored, forty-eight were discharged in an improved condition, both mentally and physically, nine were unimproved, and one hundred and seventeen patients died.

Our daily average population was seven hundred and forty-nine, and the highest number attained upon any one day was seven hundred and fifty-one, the lowest number occupying our wards being seven hundred and thirty-three. When it is remembered the Hospital has room to provide properly for but five hundred and eighty-five patients, the extent of our crowded condition is at once apparent, and of itself is sufficient reason to explain the continued small percentage of recoveries, and the high rate of mortality.

It is a subject for congratulation, however, the number of cures is considerably in excess of last year, and the number of deaths a little below.

Of those who died it may be noted, forty-three deaths occurred from consumption; from the exhaustion of the chronic forms of mania melancholia, and dementia, twenty-eight deaths; eight male patients died from paresis; eight from apoplexy; seven from Bright's disease; seven from heart failure and valvular diseases of the heart; and six from exhaustion of acute melancholia.

It is of further interest to know something of the length of time these patients were residents of the Hospital. One had resided continuously in the institution for a period of thirty years, five over fifteen years, one thirteen years, one eleven years, one eight years, three over seven years, twelve over four years, twenty over two years, and seventeen one year.

Of those admitted one hundred and fifty-nine were received upon the certificates of insanity of two physicians as required by the Act of June 1883, and whose formal request for admission was either signed by friends, or their respective poor authorities. Seventy-three patients were admitted upon order of the court, and one female patient, a non-resident of this Hospital district, by an order of transfer issued by the State Board of Lunacy.

Of those admitted, also, one hundred and seventy-three were new cases, or had never before been insane, thirty seven were insane for the second time, eleven had had three attacks, one four, one five, and in ten instances the frequency as well as the history of their present mental condition was unknown. One hundred and twenty-two represented the various forms of mania, ninety-five were melancholiacs, four demented, five paretics, and seven were classed as imbeciles.

From the character of their delusions, as well as their demeanor and history, the various complications were assigned in the following number of cases: Thirty-three were regarded as suicidal, thirty-nine as homicidal, one was committed to the Hospital from the Western Penitentiary as an insane convict, while seventy-eight were unclean in person or habits.

In the case of a little boy twelve years of age committed to the hospital from Cambria county as an epileptic, it was deemed prudent after a correspondence with Doctor Kerlin, Superintendent of the

School for the Feeble Minded at Elwyn, Pennsylvania, to send him to that institution, and which was done in the hope the association with other children of his age, and the training he would there receive would do more for him than was possible here.

Another case of peculiar interest was that of a male patient committed to the Hospital from an adjoining county, who prior to his admission was accused of placing obstructions upon the railroad. At the trial following his arrest he was adjudged by the court as insane, though not without serious doubt as to the correctness of the verdict, and thereupon sent to this institution. A brief residence fully established the fact of the man feigning insanity in order to escape the penalty of the law and for the avowed purpose of regaining his liberty by escape from the institution, and upon a subsequent court order he was discharged and sentenced to the penitentiary.

Every year witnesses a number of cases brought to our door who are aged and in an extremely weak and debilitated condition, and where this action upon the part of their friends or authorities committing them would seem to indicate undue haste, poor judgment, and but little consideration for the comfort and welfare of the patient. One death is recorded as due directly to fatigue in a weak and acutely insane patient, consequent upon the long journey to the institution, fourteen cases were received who were over sixty years of age, and two over eighty years; in the greater number of these old people whose insanity may be termed senile dementia, their peculiarities were the result of advanced age and a broken down nervous system and with proper care or with the aid of a skilled nurse at home, no necessity would have arisen compelling them to be placed in an institution, and among strangers, there to pass their remaining days in confinement, and bereft of all their associations that at one time made life dear to them. Many of these patients died within a few days after their admission, and their history and death only confirms the belief of all observers upon this particular question in the treatment of the insane that such procedure upon the part of those committing them is bad and exceedingly fatal.

A number of patients during the year were, upon request of friends, and their assumption of all responsibility, granted a parole of thirty days, thereby enabling them to visit their homes and enjoy a brief respite from the tedium of asylum life. The wisdom of this feature of the present lunacy law cannot be over estimated, as it is alike in many instances a means of affording great pleasure and

comfort to the patient and his family, and an ample opportunity to more properly form an opinion as to the progress or recovery from the mental affliction to which he may be a victim.

Especially so is this true in cases of long standing and chronic alienation, and in a certain class of patients whose delusions warrant them in the belief they are unjustly detained in the hospital. It is a pleasure also to record the occurrence of no accident from the granting of these requests.

Of the large number of seven hundred and forty patients comprising our household at the close of the year it is a matter for serious reflection that only sixty may safely be regarded as curable. This percentage of probable cures is small, though little below that given for the entire population of the insane for the State, and should our present crowded condition continue unrelieved, the probability is the percentage of recovery would rather grow less as with each succeeding year a large number of patients necessarily remain, who swell the number of its chronic insane and each year finds the hospital as well as our inmates, older.

With the early erection and opening of the hospital for the chronic class at Wernersville, Pa., the coming year, it is thought a large number of our insane will there be removed and thus afford those remaining a better opportunity for recovery. This belief is still further strengthened by the fact of the city of Pittsburgh building a hospital for the accommodation of its own insane and which, when completed, will also deplete our overflowing population by the removal thereto of all those now resident here and chargeable to that municipality.

During the year we were again greatly annoyed by the recurrence of typhoid fever, which, for some unexplained reason, was confined principally to our employes of the female department. Every possible means were taken to ascertain the exact cause, but no satisfactory conclusion was obtained. While the number of sick greatly embarrassed for a time the proper management of the house, I am very glad to report with but two exceptions all made good recoveries. No other cases of acute or contagious diseases occurred, and we were spared suicide and many of the distressing accidents incident to so large a community whose very nature and eccentricities makes it particularly prone to such disturbances.

Every safe guard and precaution that experience and a long acquaintance with the insane suggest were exercised in our efforts to promote the safety, happiness and well being of all intrusted to our care, and despite these measures it is my unpleasant duty to record the death of one at the hands of a homicidal fellow-patient. In this instance, however, no blame whatever could be attached as due to lack of proper care, watchfulness, and discipline, and the officers and management of the hospital were at once relieved by the Coroner of all censure.

During the year the Coroner was called a second time to examine into the cause of death of a patient received from Cambria county, and who died after a residence of but a few days in the hospital. In this case as the former one the county officers were afforded upon the part of the institution a full, free, and cordial assistance at the inquiry, and death was ascertained to be the result of fractured skull, the fatal blows having been given in self-defense before the patient's admission into our care. Both these fatalities were reported to the proper State officers immediately, and in the latter case, several members of your Board, a visiting physician, and a member of the Board of Public Charities were present at the inquest.

The usual care in the selection of young men and young women as attendants has been maintained though few changes were necessary; many of our older nurses still remain, and those added to their ranks within the year, give promise of zeal and efficiency in their new duties. Wherever errors have arisen either through mistaken judgment, or delinquencies upon their part, toward their patients or in an infringement upon the rules of the hospital, the question involved has received consideration and reproof administered.

In the care and treatment of the insane no one but those engaged in the work has any conception of the requirements imposed upon the nurses, requiring oftentimes the greatest and most exacting strain upon their mental, moral and physical resources, and more so perhaps than in any other affliction is this remark true, as is well known the patients are entrusted to their immediate care, and to them belongs the responsibility whether the patient recovers or forever must pass his remaining years in a hospital bereft of reason and tortured by his unhappy delusions. To the end therefore of securing more proficiency and skill in nursing the insane the lectures referred to in my report for several years were continued during the winter months, and the results of this systematic course of instruction are most gratifying.

The medical attention bestowed upon our patients was supplemented also in the promotion of their social comfort and happiness, in engaging as many of them as possible in various out door pursuits and recreation, and within doors by frequent parties, music, magic lantern exhibitions and concerts. The wards were constantly supplied with all kinds of games, the daily and illustrated papers, magazines, and our libraries to which free access is given were substantially increased by the donation of books from friends.

Many of our household were induced to assist in the performance of the every day ward duties, others were employed in the laundry department, in sewing and fancy work. The halls and dining rooms were brightened, and presented a home-like appearance by flowers and plants from the green house, and ornamented by the purchase of pictures. The services of the Sabbath were observed and many of the patients enjoyed the privilege of attending church in the neighboring congregations as their inclinations dictated.

By these constant efforts much of the inactivity and indifference so frequently apparent as well as prevalent among female patients was overcome, though this problem in the moral treatment of the insane is still one of greatest importance and most difficult of solution.

Of the work accomplished during the year mainly through the assistance of patients may be mentioned the building of the new road now known as Herron avenue, the repairing and grading of the Beaver road along the front of our property and the general repairs to all the roads over the farm. A number of the patients were constantly engaged in keeping our lawns and grounds in order, while others were employed in assisting in farm work. I may add that only such patients as in the judgment of the physicians would thus be benefited were urged to take part and in no instance was it made compulsory. All the patients so employed also were placed in the care of watchful attendants whose duty it was to see no one overtaxed his strength. By means of this systematic employment of so many male patients much good was accomplished in their improved condition of health, and contentment of mind, as well as substantial gain to the hospital.

The sum expended for the year in conducting our various improvements and repairs was \$7,304.29, being very considerably less than for several preceding years. A large portion of this amount is

chargeable to the farm, in the rebuilding of our fences, repairs to outbuildings, stone work, roads, and within the house to the laying of new hardwood floors, and making many minor repairs. A detailed account of this entire expenditure appears in the itemized statement of expenses following this report. The total cost of maintenance for the year \$153,012.41 also is less than last year, though in connection with this statement it may be added no change whatever was made in the standard of care and treatment of our patients. For all other particulars concerning our finances, I respectfully refer you to the reports of the Treasurer and Executive Committee.

Mindful of the possibility of cholera appearing in our midst, by direction of the Executive Committee, suitable provisions were made for its proper accommodation and treatment, and it was also considered advisable to guard against the invasion of smallpox and vaccinate our household, which was done.

During the year the officers were made the recipients of many evidences of kindly sympathy and interest in their work, by the large number of friends of the hospital, who, by their presence as well as by their generosity, contributed so freely to the comfort and pleasure of our household, and it is with deep sense of gratitude I at this time extend them my heartfelt thanks. Our wards were provided with an abundance of reading material and over three hundred volumes were added to our libraries, a number of excellent plays, lectures and concerts served to pass many of our winter evenings most pleasantly. During the year also a camera was presented and it is expected much pleasure will be derived from its use by those of our patients interested in this kind of outdoor work. To the United and Presbyterian Boards of Publication we are indebted for one hundred and fifty Psalm books and two hundred and fifty Gospel Hymn books to assist us in our chapel services.

Our grounds were greatly beautified by the presentation of a large number of ornamental shrubs, the gift of Mr. Wm. P. Townsend, of New Brighton, Pa. Mr. Wm. Knoderer gave the hospital two hundred shade trees.

Doctor William K. Walker, the third medical assistant, resigned his position July 1st, to accept the appointment of resident physician in the Hospital of the University of Pennsylvania. The loss of Doctor Walker as a member of the staff of this hospital was regretted by all, and he was not permitted to leave without

carrying with him substantial proofs of the high esteem in which he was held by the managers and officers. To the vacancy thus occasioned, J. Moorhead Murdoch, M. D., of Pittsburgh, was chosen. In the acquisition of Doctor Murdoch the hospital has secured a gentleman eminently fitted by experience and educational advantages to assume the responsibilities of his position as he has already shown in the thoroughness and ability in the performance of his duties.

My older associates, Doctors George G. Graham and W. Brown Ewing, continue to occupy their respective positions, and to them especially am I under renewed obligations for their ever ready and willing assistance to me, and untiring energy in promoting the best interests of the hospital, and the well being, pleasure and happiness of our patients. Miss Eliza Hope with her assistant, Miss Black, still occupies the very responsible position of Supervisoreess and Mr. Alexander Morrow and Mr. Johnson, that of Supervisors to the male department, and to these officers for their ability and faithfulness my thanks are also due.

Mr. William Knoderer, our farmer, gave renewed evidences for the confidence reposed in him so many years, and was indefatigable in the proper discharge of all busiuess matters, and the department intrusted to his care. Mr. George Gray, the engineer, and Mr. Robert K. Allen, the book-keeper, Miss Bliss, housekeeper and Miss Jessie McCrum, who has charge of the laundry department, are also entitled to my thanks.

To you gentlemen, the President and members of the Board of Managers and the Executive Committee, permit me to extend you my grateful thanks, and invoking the assistance of Divine Providence upon the year in which we now enter, I close this report.

HENRY A. HUTCHINSON.

ALLEGHENY,	FAYETTE,	JEFFERSON,	WASHINGTON,
BEAVER,	GREENE,	LAWRENCE,	WESTMORELAND.
BUTLER.			

Admission of Patients to Insane Department.

1. Preparatory to the admission of a patient, unless when committed by order of a court, the Superintendent shall be furnished with the certificates of two physicians, who have been in practice for five years or more, that they have separately seen and examined the individual within two weeks of the date of admission, and believe him or her to be insane, and these certificates shall be sworn to before some alderman or judicial officer, with the order of near relative or friend that the patient may be received into the Hospital, with a statement as required by law, and a bond with satisfactory security, for the payment of board and other expenses while in the institution. All private patients thus received shall make a payment of thirteen weeks' board in advance, when brought to the Hospital, no part of which shall be refunded; and if taken away uncured, and against the advice and consent of the physician, in any succeeding quarter, no part of the payment shall be refunded.

2. Whenever a patient is sent to the Hospital by order of the Court, the order or warrant, or a copy thereof, or, if sent by the Directors of Poor, an order sent by the Directors or their agent accompanied by the Certificate of Insanity, as required by law, shall be lodged with the Superintendent of the Hospital.

3. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

4. Each male patient shall be provided with at least three new shirts, a new and substantial coat, vest and pantaloons, three pairs socks, two pairs drawers, two undershirts, a hat or cap, cravat, collars, handkerchiefs, shoes, and one pair of slippers.

5. Each female patient shall have three calico dresses, four chemises, three pairs drawers, three pairs hose, three nightgowns, two flannel skirts, one Balmoral skirt, two muslin skirts, six handkerchiefs, four collars, two pairs shoes, one shawl or cloak, and one hat or hood.

6. It is very desirable that extra and better apparel should be sent with those accustomed to it, that when their health is improved, or when they attend religious worship, walk or ride out, their self-respect may be preserved.

In all cases the patient's best clothing should be sent; it will be carefully preserved and only used when deemed necessary for the purpose above mentioned.

Jewelry, and all superfluous articles of dress, knives, &c., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

All clothing, if not taken away at the time of patient's removal, or within three months afterward, will be disposed of as the officers of the Hospital may think best, and no compensation whatever will be made therefor.

7. A written history of the case should be sent with the patient, and if possible, some one acquainted with the individual should accompany him or her to the Hospital, and from whom minute, but often essential particulars may be learned.

8. The price of board, including washing, mending, and attendance for all who are supported at the public charge, is four dollars per week. For private patients, or those supported by themselves, or their friends, the price varies from five to ten dollars, according to the trouble and expense incurred, and according to their ability to pay. Higher prices are paid by special agreement with the physician, for extra attention and accommodation.

Payments are to be made quarterly, in advance.

9. A bond, with satisfactory sureties, will be required for the payment of the board and expenses, for the removal of the patient when discharged, of all persons, excepting those sent at the expense of the counties or townships.

Those who bring friends should be prepared to give a bond, and, if strangers, furnish evidence of their responsibility.

10. All bills remaining unpaid one month after date of presentation, are placed in the hands of the Solicitor of the Hospital for collection.

11. As the diet of the patients is under the absolute control of the Superintendent, no nuts, candies, cakes or other edibles shall be given to the patients, by their friends or visitors, without his express permission.

12. Visitors are admitted to inspect the Institution on any day (except Sunday,) between the hours of 10 A. M. and 12 M. and between 2 and 4 P. M.; but no visitor shall be admitted to the wards occupied by patients, without express permission from the Superintendent; and especial care is to be taken that no amount of visiting is permitted that shall prove injurious to the patient. No visitors shall be admitted on the holidays.

Visitors will please not intrude on the grounds used by the patients, or give to or receive anything from patients.

13. The Hospital is located eight miles west of Pittsburgh, on the Pittsburgh, Fort Wayne & Chicago Railway, at Dixmont, and can easily be reached by cars, there being ten trains (east and west) each day, (except Sunday,) stopping at the Hospital Station.

14. Applications for the admission of patients, and all communications in regard to the condition, health, bills, &c., of those who are in the Hospital, shall be made to the Superintendent.

15. As Dixmont Station has an Adams Express Office, all goods may be sent to the Hospital direct by express or freight, as may be preferred.

16. The friends of patients can communicate with the Institution by telegraph and telephone.

Forms of Commitment.

The following forms have been prepared by the Committee on Lunacy, to be used in all cases (except those sent by order of Court) for the commitment of insane patients by their friends or by Directors and Overseers of the Poor, to the Hospital for the Insane, at Dixmont, Pa. No such patients will be received unless the forms as given are fully complied with.

ANNUAL REPORT
OF THE
MANAGERS
OF THE
Western Pennsylvania Hospital.

To the Honorable President and

Members of the Board of Public Charities:

GENTLEMEN:—I have the honor to lay before you the report of the operations of the WESTERN PENNSYLVANIA HOSPITAL for the year ended September 30th, 1893, referring to the accompanying reports of the Superintendents, the Treasurer, and others, for details and statistics. I do this with pleasure, for the Institution, in all its departments has fully sustained its established reputation, and nobly done its work of extending aid and comfort to the suffering.

THE DEPARTMENT FOR THE INSANE AT DIXMONT.

There were 740 patients in the Hospital at the beginning of the year; 256 were received during the year, 304 were discharged, and the number remaining on October 1st, 1893, was 692. This reduction is ascribed to the fact, that in order to relieve its crowded wards your Board directed 20 male patients to be sent to the new hospital for chronic insane at Wernersville, and 77 incurable, harmless patients to be returned to the various alms-houses.

The good effect of this thinning out was immediately felt, as the Superintendent in his last quarterly report to the Board stated that "the health of the patients was remarkably good; very few were sick enough to be confined to their beds, and no cases of fever or acute diseases existed in the hospital."

By THE TREASURER'S REPORT, duly audited by the Finance Committee, you will perceive that the receipts				
of the department for the year were,	-	-	-	\$141,701 01
The balance at the beginning of the year was	-			26,219 18
				<hr/> \$167,920 19
The expenditures were	-	-	-	\$161,419 18
The balance at the end of the year was	-	-		6,501 01
				<hr/> \$167,920 19

Last May, DR. GEORGE G. GRAHAM, after serving the Institution efficiently for ten years as Assistant Physician, tendered his resignation, which was accepted by the Executive Committee with regret; and thereupon it was unanimously resolved to fill the vacancy upon the Staff by the appointment of a woman physician, to be placed in charge of the female patients, subordinate of course to the Superintendent.

In due time, after considering the qualifications of several candidates for the office, DR. ELIZABETH C. MALLISON, a graduate of the Womans' Medical College of Pennsylvania, in Philadelphia, was chosen. She had had experience in private practice, and had been for several years Assistant Physician at the First Minnesota Hospital for the Insane, at St. Peter, Minn. Dr. Mallison has, since she has been in office, performed her duties very acceptably to the Executive Committee, the Superintendent, and all with whom she has been associated.

THE EXECUTIVE COMMITTEE inaugurated another reform in the appointment of a PURCHASING AGENT. His office is at the hospital, and his business is to visit the markets daily, keep thoroughly posted as to prices, and opportunities to buy commodities needful, and to fill the requisitions of the Superintendent by the purchase of the best articles obtainable, at the lowest prices. His services have already proved to be to the financial advantage of the department, and the Superintendent is greatly relieved and enabled to devote his whole time to his professional duties.

THE CHAPEL AND EXHIBITION HALL which had become dingy and dilapidated from long use, was cleansed and redecorated. It now presents a very cheerful and attractive appearance.

The much needed and often referred to NEW BARN has been built. The Institution is under obligations to MESSRS. RUMSEY & TOWNSEND, of the Executive Committee, for the effectual manner in which this was accomplished. It is a first class barn, "quite up to date," embodying in its design and construction every improvement and convenience. The building is frame, 92 x 62 feet, of two stories; and the roof is covered with slate. The dairy is located on the ground floor, and has capacity for about fifty cows, and box stalls for breeding cattle. It is well lighted and ventilated, supplied with abundance of running water, and the floors made of Portland cement, are thoroughly drained. Particular attention was directed towards supplying means for keeping the premises clean and free from offensive odors. On the same floor is a fire-proof room for a steam boiler and engine used for cutting and grinding fodder and grain; adjoining is a room in which the feed is mixed and prepared, and from it readily distributed into the feeding troughs. There is also on the same floor, but isolated from the rest, a milk receiving and cooling room. In the second story are horse stalls, the floors of which are double, sealed and made water-proof, an apartment for carriages, wagons and farming implements, store rooms for produce and grain, and over all, space for a generous supply of hay, straw and fodder.

In July, the old brick building known as the "GILLELAND HOUSE," and which was fitted up for an emergency hospital in the event of a visitation of Cholera or for contagious diseases, was practically destroyed by fire. The walls have been taken down, as the building was not located where the management was justified in expending more money for its reconstruction. It was insured, and the amount of the loss adjusted and paid to the Treasurer.

Hardwood floors have been laid on several of the corridors, new furniture placed in wards, automatic fire extinguishers distributed throughout the buildings, and the whole premises have been industriously looked after and kept in order and repair.

THE FARM yielded as abundant crops of fruits and vegetables as the land was capable of producing. The pleasure grounds, conservatories, flower beds, shrubbery, roads and walks were kept in excellent condition, chiefly by the voluntary labor of the patients and their attendants.

I have only words of praise with which to acknowledge the operations of this department during the past year, under Dr. Hutchinson, his assistants, and the other employes, and on behalf of the Board I thank them.

Nor can I conclude this portion of my report without referring in particular to the gentlemen of the Executive Committee, who at great personal inconvenience have continued to visit the hospital weekly, inspect its every part, look after the comfort and condition of the patients, and transact its business affairs with skill and accuracy. Every bill has been scrutinized, every account audited, warrants ordered, read and compared, and in every instance signed by three of the Committee. All meetings have been held at Dixmont. Harmony and good feeling have prevailed, and every important measure was fully and freely considered, and when settled upon, unanimously adopted.

I feel under very great obligations to these gentlemen who have done so much for the Institution, and co-operated with me in my endeavors to serve it at the pleasure of the Board of Managers.

THE MEDICAL AND SURGICAL DEPARTMENT.

The records of this department show that during the past year 2,281 patients were received and treated. All these were serious cases requiring an actual residence in the hospital, but many of a less serious nature sought and found relief at the hands of our physicians and surgeons, of which no records were made, as the hospital does not maintain an out-of-door department or a dispensary.

The average daily number of patients in the hospital throughout the year was 189, and the whole number of days of hospital occupancy was 69,242.

THE TREASURER'S REPORT, (also herewith,) shows that

the receipts from all sources, including the balance on	
hand at the beginning of the year were - - -	\$102,373 69
And the expenditures for maintenance, salaries and wa-	
ges, repairs, interest, &c., &c., were - - -	99,268 58

Leaving a balance of - - - - -	\$ 3,105 11
--------------------------------	-------------

in his hands when his books were closed, to meet outstanding accounts to a much larger amount.

The expenses for conducting the department have exceeded its revenues, and the indebtedness which I had hoped would have been reduced, has, on the contrary, been increased.

The Department owes :

To the Pennsylvania Railroad Company,	-	-	\$ 50,000 00
To the Bank of Pittsburgh,	-	-	8,000 00
Accounts for which warrants have been drawn upon the Treasurer, but have been withheld for lack of funds to pay them,	-	-	43,043 19
			<hr/> \$101,043 19

I am compelled to report this most discouraging state of financial embarrassment, as it appears to me it would be improper to suppress the facts.

The very life and future usefulness of this department of the Institution is threatened by the arrearages that have accumulated, notwithstanding the effort of the Executive Committee to "maintain it within its visible means of support."

The Legislature at its last session appropriated the usual sum of \$90,000 to aid in the maintenance of the department for the succeeding two years, but it refused to grant the money asked for to pay off the debt to the Pennsylvania Railroad Company, and the money needed to build and equip a new laundry, kitchen and boiler house, both of which petitions were approved by your Board. The railroad debt, as you are aware, was incurred through failure of the Legislature to appropriate means for maintaining the hospital previous to and during the years 1883 and 1884, and bears interest at the rate of \$3,000 per annum. The improvements contemplated, but now indefinitely postponed, if they had been carried out, would have facilitated the household work, and reduced the running expenses.

The hospital building is a very old one. It has been repeatedly changed, renovated and extended, yet it is practically without modern conveniences, and therefore the administration of its household affairs cannot be conducted with ease or economy. A very large corps of employes and attendants are required to look after it, and to serve and attend the patients. Repairs are incessant, sometimes extensive, and always necessary to preserve the property and keep it in presentable appearance. In no case, I think, have the comfort and welfare of the patients been neglected. They have had the treatment of most

efficient physicians and surgeons, been ministered to by kind nurses, their food has been of the best quality, plenty and skillfully prepared. The standard of excellence that has distinguished the hospital in the past, has not been lowered in any particular.

The Training School for nurses has now been in operation for more than a year. About 34 applicants have passed the preliminary examinations, and have enrolled their names and are under course of instruction. They are all engaged in practical nursing, and furnish most of the service required by the patients. The school may now be considered in successful operation.

Since the opening of Brereton Avenue through the grounds the property has remained in a very chaotic state. Their improvement and adornment have been undertaken by Mrs. Robert Pitcairn, and under her supervision much progress has been made towards that end. The unsightly ravine, in front of the building, has been filled up, and the steep hillsides graded, and new driveways and walks have been laid out. The incompleted work will be taken up in the coming spring and finished. This work necessitated the removal of the old stable and sheds, and obliged the Committee to erect a good but inexpensive building in their stead at another place.

A new brick house designated "The Morgue," has been built. Money was especially contributed for this purpose by friends.

To the Superintendent, Mr. William A. Cowan, much credit is due, for his interest and industry in conducting the department, and I am glad to extend to him the acknowledgement of the Board of Managers, with my own, for his faithfulness; and also to Miss McMillan, the Principal of the Training School for Nurses, who is an enthusiast in her vocation, and has displayed great ability in establishing the school.

Especially are our thanks to be accorded to the Medical and Surgical Staff.

In the death of DR. JAMES McCANN—long of the Medical and Surgical Staff—which occurred on June 13th, the Institution sustained an irreparable loss. For twenty years his labors to promote the best interests of the hospital have been unceasing, and his professional work among thousands of its patients was untiring. He was a good

and worthy citizen, a shining light in his profession, a kind, sympathizing friend, ever ready to help the poor and needy with an open purse or by medical service. His skill as a surgeon did much to establish the reputation of the hospital in the estimation of the profession which he honored, and in this community where he lived a noble life.

THE ENDOWMENT FUNDS have not been increased or changed during the past year.

They consist of:

Funds belonging to the Department at Dixmont,	\$ 23,000 00
And funds belonging to the Medical and Surgical	
Department, - - - - -	305,816 67
	<hr/>
	\$328,816 67

THE TRUST FUNDS.

The earnings of the Brewer and Crawford Funds, of which the hospital is the almoner, purchased 71,675 bushels of coal, and it was judiciously distributed by the Committee in charge among the worthy poor of the city and vicinity, during the long and bitter winter of 1892-93, and this great charity was a blessing to hundreds of destitute families.

All of which is respectfully submitted.

JOHN A. HARPER,
President.

Report of the Executive Committee

OF THE

Department for the Insane at Dixmont.

TO JOHN A. HARPER, Esq.,

President of the Western Pennsylvania Hospital.

DEAR SIR:—Your report of the Board of Managers to the Board of Public Charities, together with the report of the Superintendent, comprise most of the items and facts which would be of interest to the contributors and managers, leaving but little to add by the Executive Committee. They would especially call the attention of the contributors to the new barn and the improvements surrounding it erected and improved since the last annual meeting, and request their inspection of the same.

The usual amount of care has been given to the grounds within the enclosure, and a very great improvement on the State road along the front line of the property.

A considerable annual expenditure is required to keep the extensive buildings in repair; this has been promptly attended to, and can now report all in good repair. It is unnecessary to specify the items of expenditure; they will be found in detail in the Treasurer's report.

Some of the members of the Committee have visited the Hospital weekly, and at their monthly meetings have examined all the bills of the previous month, and drawn warrants for the payment of the same. The Institution is free from debt.

The Superintendent's report as to the internal affairs of the Institution requires nothing further to be reported by the Committee, except to say that everything is entirely satisfactory.

Respectfully submitted by the

EXECUTIVE COMMITTEE.

January 2, 1894.

REPORT

OF THE

Physician and Superintendent

OF THE

Department for the Insane at Dixmont.

REPORT
OF THE
Physician and Superintendent
OF THE
HOSPITAL FOR THE INSANE AT DIXMONT.

To the President and Board of Managers:—

GENTLEMEN:—The thirty-seventh annual report of this Department of the Western Pennsylvania Hospital, and my tenth annual report, I have the honor, in conformity with your rules and regulations, to present you for the year ending September 30th, 1893.

From the date of the reception April 7th, 1856, of the first patient into the Hospital, the large number of seven thousand and twenty-six insane have been received within its doors, of whom nineteen hundred and ninety-four were discharged as restored, eighteen hundred and sixty as improved, seven hundred and ninety-four as unimproved, and sixteen hundred and eighty-six died, leaving therefore six hundred and ninety-two patients in our care at the close of the year.

These patients are the natural inheritance of all institutions of this character, and as Dixmont is now very rightfully regarded as one of the oldest Hospitals for the Insane in this country, the members of its household are many of them aged and feeble persons, who have spent the greater portion of their lives within its walls, and to whom it is their home. Chronic forms of insanity make up the statistical tables, as to their mental condition, while the younger and recent cases present the only hope of recovery in the future, and the earnest wish that this is a Hospital for the cure of the insane rather than an asylum. Is it any wonder the visitor in passing through our corridors is impressed with the idea of there being so many people whose locks are white and silvery with age? Is it any wonder, under all these

circumstances, and with our continued crowded condition, the number of recoveries falls far short in proportion to what science, medical skill and philanthropy has done for the insane in recent years?

Again, very many of these patients, as well as those received more recently, are not in a strict sense proper or suitable cases for institution care such as this; many of them, in my opinion, could be very comfortably maintained at home, particularly those whose forms of mental deterioration are undoubtedly due to advanced age. It is a well established fact, such patients removed from their home life and placed in the care of strangers, there to begin to them in their declining years a new existence, where discipline and daily hospital routine everywhere surrounds them, soon lose all hope, and rapidly succumb to the wasting disease of which they are victims.

Again too, many of our patients are those whom from faulty heredity and incidents due to early childhood, present cases of recognized forms of arrested development and weak intellects. These patients should, in my opinion also, find a refuge and home in an industrial school especially designed for their care, where they could receive that practical training so conducive to their happiness, as well as of use and benefit to them and to the State. To commit all such patients to an institution devoted to this object has been in the past quite impossible, for various reasons, though it is to be hoped the additional provisions now being made in Pennsylvania for this department of charity will relieve this Hospital from the necessity of admitting patients of this character in the future.

On the other hand, however, it may be said, and very justly so, in every instance these patients have been legally committed to the Hospital, and upon no argument could they be denied admission. In admitting this fact, and in the receiving of these patients, the Hospital has been afforded opportunities to open its doors and extend a cordial welcome to those whose lives were blighted by disease, and for whom the earthly ties of love and affection have long ceased to bind them in ministering to and caring for them at home. Such instances as these should delight the heart of its every officer, and win the admiration of every true friend of the afflicted, the sick, and the aged, whose only comfort lies in the provisions made for them in the establishment of a hospital prompted by the generous and humane instincts of a Christian people.

At this time it may be of interest to your Board to make some report of the one hundred and thirteen patients transferred from the Hospital in Pittsburgh to the Department for the Insane at the time of formally opening this Institution, November 11th, 1861, and I may say, from an examination of the records, I find but five of this number remain, of whom there are three men and two women. The presence of these old patients calls to mind the early history of the Institution, and it is gratifying to know they are so happily cared for, and time has dealt so kindly with them. All of them enjoy excellent health, and are busily engaged each day in some occupation about the premises.

The total number of patients under treatment during the year was nine hundred and ninety-six, of whom eighty-eight were discharged as restored, the large number of one hundred and nine were discharged as improved, eight as unimproved, and ninety-nine died. The average number throughout the year was seven hundred and forty-three, while the highest number attained upon any one day was seven hundred and seventy-four, and the least number under our roof was six hundred and eighty-three.

Eight patients were received who were under twenty years of age, sixty-six were under thirty years, while one hundred and twenty-four patients were admitted between the ages of forty and fifty years. Of this number seventy-seven were males. The increased number of admissions at this time of life only confirms the well established rule that insanity is most frequently met with when the intellect as well as the physical resources have attained their fullest development, and the responsibilities of life are presumably the greatest.

Between the ages of fifty and sixty, thirty-nine persons were admitted, from sixty to seventy, twelve, and seven female patients were admitted who were over seventy years of age. One hundred and forty-eight patients were natives of Pennsylvania, seven were from other States, forty-four were foreigners, and the nativity of fifty-seven was unknown.

Thirty-six patients were received upon the formal request of their friends, one hundred and thirty-nine were sent to the Hospital by the various poor authorities, and eighty-one commitments were issued by the several courts.

The varied forms of mania were represented in one hundred and thirty-seven instances, while one hundred and two patients were melancholiacs, five demented, seven were suffering from paresis, and five were regarded as cases of imbecility.

In formulating the history of those received, it was further ascertained very many of them presented undoubted evidence of long continued mental disturbance, and which of itself, it may very safely be stated, warrants the belief that a complete and ultimate recovery is quite impossible. Others were suffering from structural brain disease, for whom no hope could be vouchsafed to their friends. These patients, in addition to their mental disorders, almost without exception presented other complications in the enfeeblement of their bodily health, which was apparent to a greater or less degree. It is the exception to find an insane person in perfect physical condition. In the treatment of these patients, that care and remedial measures were adopted suited to their individual necessities, and much was accomplished in their improved state of mental and physical health. Some were so far restored as to enable them to return to their homes. Those remaining however, only swell the number already referred to as comprising our population.

Fifty-nine of those admitted were regarded therefore as chronic cases of insanity, though not all incurable, while nineteen were suicidal, and thirty-five presented homicidal impulses; sixteen were brought to the Hospital handcuffed, and nine were exceedingly dirty and repulsive, presenting every appearance of neglect upon the part of their friends and those having them in their care.

Of the total number discharged during the year, twenty male patients, upon order of the Board of Public Charities, and in compliance with the statute providing for the erection of the Asylum for Chronic Insane, were sent to that Institution at Wernersville, Pa., in July. These patients were of the quiet, tidy, incurable class, all in good bodily health, and capable of assisting very largely in the work of getting the new building and grounds ready for occupancy the coming fall. It affords me pleasure, to state in a letter from the Chairman of the Commission having this work in charge, the selection of these patients was most satisfactory, and met their entire approval. With the view for the relief of our crowded wards, fifty-nine patients were also discharged from the Hospital by order of the Board of Public Charities, and returned to their respective County Homes, where facilities for the care of a few insane had been arranged. These pa.

tients were also quiet and harmless, and required but little medical attention. I regret to say, however, many of them have since been recommitted into our custody.

The number of deaths is very considerably less than for the previous year, owing, I believe in a measure, to the relief obtained in the dismissal of so large a number of our chronic cases, and the consequent improved condition of health of those remaining. As generally observed in hospitals of this character, Consumption was the predominant cause as shown in twenty-six cases. The exhaustion from the several forms of mania, melancholia and paresis follows in producing forty deaths, while the various physical disorders as recorded in the mortuary tables accounts for the remainder.

No deaths, I am happy to say, were the result of any accident or injury, and we were spared the presence of any acute or infectious disease in our midst. Typhoid fever spoken of in previous reports, and which at one time assumed such serious proportions, has entirely disappeared.

Repeated criticisms, as well as suggestions, have been made in the annual reports of this Hospital in reference to the improper method in which female patients were brought to our care, oft-times in charge of men attendants. I am very glad of this opportunity to report the passage of an Act, approved the fourteenth day of April, 1893, requiring all female insane in transit to hospitals, to be provided with the care and assistance of some female friend. This is a most excellent and humane law, and it is only surprising was not enacted and made obligatory long ago, upon all having the authority and charge of the indigent insane.

Eighteen of the patients received during the year were transferred directly from the jails of this district, where many of them had been confined for weeks, and in some instances months, awaiting a court trial, or the necessary order committing them to the Hospital. While it is well known it is often inexpedient to immediately order them to an asylum, the decision should be as speedily determined as possible, as the delay, now so frequent, for various reasons may render the patient an incurable one before entering the hospital. Such is the belief, as well as the experience, of every physician caring for the insane. Too much importance cannot be attached to the value of wise and systematic treatment in the early stage of the disease. It is for this

reason at least many who now only partially recover or improve in a hospital, would have recovered had they been committed to its care upon the first appearance of their illness.

The operation of trephining was performed upon a male patient with the hope of relieving his mania, the cause of which was a gunshot wound over the left orbit, received at the battle of Bull Run; at this time, though several months have elapsed, no appreciable improvement in his mental condition is observed, and it is feared therefore this measure was delayed too long.

In the treatment of the patients, the usual care in the selection of proper remedies, both medical and in a moral sense, was maintained for their restoration and the amelioration of their malady; nothing was left undone, and the recovery of so large a number is most gratifying. To this end also, aside from the employment of drugs, renewed efforts were put forth in the conduct of our varied amusements and occupation.

Throughout the pleasant weather all were encouraged to go out in the open air, and engage in walking and out-door games and sports, such as tennis, and croquet, while the men preferred base ball, foot ball and quoits.

Many of the aged and infirm were afforded pleasure in driving and in viewing the beautiful scenery everywhere present along our country roads. Some formed lunch parties, and spent the day in the woods. In the house the evenings were passed pleasantly in card parties, dancing, music, magic lantern pictures, parlor games, and in attending the many concerts and plays given for them by young people from the city. The holidays were appropriately observed, and the wards were liberally furnished with reading material. On Sunday, religious services were regularly held in the Chapel.

Many of the female patients were occupied in the kitchen and laundry departments and in ward duties, while others busied themselves in sewing and fancy work. In the summer months a large force of male patients were induced to take part in the work of the farm and in the repairs and improvements. In the work thus performed, only those in the opinion of the physician, who could be benefited by open air exercise took part, and all were placed in the immediate charge of capable nurses, whose duty it was to watch over and care for them. As a result of this systematized labor, we were

enabled to complete the rebuilding of the Beaver road along the front of our property; also, do all the grading and excavation for the new barn.

The lectures delivered by the medical staff to our attendants have been continued. These lectures embrace instruction in the art of nursing in its every detail, and the good thus accomplished is everywhere witnessed in the high standard of nursing now attained by many of our older nurses, and in the comfort and happiness everywhere shown by the patients.

All physicians appreciate the value of skilled attendance upon the sick, but in no class of patients is this better understood than in the treatment of acute insanity and nervous disorders. I hope the day is not far distant when only graduates of recognized schools for trained nurses will be able to secure employment in such capacity in Institutions for the Insane.

To enumerate in my report the several repairs and improvements, as well as the progress in the building of the new barn, I deem quite unnecessary, as they are most carefully set forth in the President's and Executive Committee's reports, and to which I refer you.

The farm continues to yield an abundance of excellent vegetables, and never looked so well as the past year. The detailed statement of this department at once shows the liberal provision made in furnishing the dining tables for our household.

Doctor George G. Graham, so many years the senior assistant physician upon the medical staff, resigned in May, to engage in private practice, and Doctor W. Brown Ewing was promoted to the position of first assistant.

On June 27th, by the unanimous approval of your Board, Doctor Elizabeth Carr Mallison was chosen, and entered at once upon her duties as assistant physician in the female department. Dr. Mallison graduated at the Woman's Medical College of Pennsylvania, and for several years was assistant in the First Minnesota State Hospital for the Insane, at St. Peter. She came to us therefore with experience and training, and with her many social qualifications, is well prepared to assume the responsibilities of her office, which she has done most acceptably.

I would especially direct your attention to the able and faithful service rendered the Hospital by my older associates upon the medical staff, Dr. W. Brown Ewing and Dr. J. Moorhead Murdoch. These gentlemen have been unceasing in their endeavor to promote the welfare and happiness of our patients. To them I owe my personal and grateful acknowledgments.

To Miss Hope and Mr. Morrow, so many years the Supervisors, I extend my heartfelt thanks for their continued and ever watchful care over the patients entrusted to their immediate supervision, and the zealous performance of all other duties assigned them.

Mr. Allen, the book-keeper and his assistants, Miss Black, the house-keeper, Mr. Kunkle, assistant engineer, Miss McCrum, the laundress, and Mr. Mann, the steward, for their efficiency and help to me in their respective departments, I also thank.

Our farmer, Mr. William Knoderer, who for more than thirty years has been intimately associated in the growth and prosperity of the Hospital, still continues to perform the duties of his position with his accustomed vigor and dispatch, and Mr. George M. Gray, so many years our engineer, maintains his efficient and solicitous care over all the affairs in his charge. It gives me pleasure also to thank these gentlemen for their aid to me in the competent manner displayed in conducting their respective departments.

Much of the success attendant upon the management of a hospital depends upon its nurses, and I thank all who were faithful in the discharge of the sacred trust reposed in them.

In concluding this report I tender to the President and members of your Board, and the Executive Committee, this expression of my sense of obligation under which you have placed me for your continued kind assistance and counsel in the fulfillment of the responsibilities committed to my care.

With a grateful recognition of an over ruling Providence in the affairs of the Institution the coming year, this report is respectfully submitted.

HENRY A. HUTCHINSON.

DIXMONT, PA., October 1st, 1893.

ARMSTRONG,	CAMBERIA,	INDIANA,	SOMERSET,
ALLEGHENY,	FAYETTE,	JEFFERSON,	WASHINGTON,
BEAVER,	GREENE,	LAWRENCE,	WESTMORELAND.
BUTLER,			

Admission of Patients to Insane Department.

1. Preparatory to the admission of a patient, unless when committed by order of a court, the Superintendent shall be furnished with the certificate of two physicians, who have been in practice for five years or more, that they have separately seen and examined the individual within two weeks of the date of admission, and believe him or her to be insane, and these certificates shall be sworn to before some alderman or judicial officer, with the order of near relative or friend that the patient may be received into the Hospital, with a statement as required by law, and a bond with satisfactory security, for the payment of board and other expenses while in the institution. All private patients thus received shall make a payment of thirteen weeks' board in advance, when brought to the Hospital, no part of which shall be refunded; and if taken away uncured, and against the advice and consent of the physician, in any succeeding quarter, no part of the payment shall be refunded.

2. Whenever a patient is sent to the Hospital by order of the Court, the order or warrant, or a copy thereof, or, if sent by the Directors of Poor, an order sent by the Directors or their agent accompanied by the Certificate of Insanity, as required by law, shall be lodged with the Superintendent of the Hospital.

3. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

4. Each male patient shall be provided with at least three new shirts, a new and substantial coat, vest and pantaloons, three pairs socks, two pairs drawers, two undershirts, a hat or cap, cravat, collars, handkerchiefs, shoes, and one pair of slippers.

5. Each female patient shall have three calico dresses, four chemise, three pairs drawers, three pairs hose, three nightgowns, two flannel skirts, one Bal-moral skirt, two muslin skirts, six handkerchiefs, four collars, two pairs shoes, one shawl or cloak, and one hat or hood.

6. It is very desirable that extra and better apparel should be sent with those accustomed to it, that when their health is improved, or when they attend religious worship, walk or ride out, their self-respect may be preserved.

In all cases the patient's best clothing should be sent ; it will be carefully preserved and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, knives, &c., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

All clothing, if not taken away at the time of patient's removal, or within three months afterward, will be disposed of as the officers of the Hospital may think best, and no compensation whatever will be made therefor.

7. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him or her to the Hospital, and from whom minute, but often essential particulars may be learned.

8. The price of board, including washing, mending, and attendance for all who are supported at the public charge, is four dollars per week. For private patients, or those supported by themselves, or their friends, the price varies from five to ten dollars, according to the trouble and expense incurred, and according to their ability to pay. Higher prices are paid by special agreement with the physician, for extra attention and accommodation.

Payments are to be made quarterly, in advance.

9. A bond, with satisfactory sureties, will be required for the payment of the board and expenses, and for the removal of the patient when discharged, of all persons, excepting those sent at the expense of the counties or townships.

Those who bring friends should be prepared to give a bond, and, if strangers furnish evidence of their responsibility.

10. All bills remaining unpaid one month after date of presentation, are placed in the hands of the Solicitor of the Hospital for collection.

11. As the diet of the patients is under the absolute control of the Superintendent, no nuts, candies, cakes or other edibles shall be given to the patients, by their friends or visitors, without his express permission.

12. Visitors are admitted to inspect the Institution on any day (except Sunday,) between the hours of 10 A. M. and 12 M., and between 2 and 4 P. M.; but no visitor shall be admitted to the wards occupied by patients, without express permission from the Superintendent; and especial care is to be taken that no amount of visiting is permitted that shall prove injurious to the patient. No visitors shall be admitted on holidays.

Visitors will please not intrude on the grounds used by the patients, or give to or receive anything from patients.

13. The Hospital is located eight miles west of Pittsburgh, on the Pittsburgh, Fort Wayne & Chicago Railway, at Dixmont, and can easily be reached by cars, there being ten trains (east and west,) each day; (except Sunday,) stopping at the Hospital Station.

14. Applications for the admission of patients, and all communications in regard to the condition, health, bills, &c., of those who are in the Hospital, shall be made to the Superintendent.

15. As Dixmont Station has now an Adams Express Office, all goods may be sent to the Hospital direct by express or freight, as may be preferred.

The friends of patients can communicate with the Institution by telegraph and telephone.

Forms of Commitment.

The following forms have been prepared by the Committee on Lunacy, to be used in all cases (except those sent by order of Court) for the commitment of Insane patients by their friends or by Directors and Overseers of the Poor, to the Hospital for the Insane at Dixmont, Pa. No such patients will be received unless the Forms as given are fully complied with.

Order for the Reception of a Patient.

.....

Bond for Private Patients.

Know all Men by these Presents, That we,.....of
in the county of.....and
 State of Pennsylvania, are held and firmly bound unto the WESTERN
 PENNSYLVANIA HOSPITAL, its successors or assigns, in the sum of One
 Thousand Dollars, for the payment of which we jointly and severally
 bind ourselves, our heirs, executors and administrators, firmly by these
 presents: (And.....do hereby empower.....or
 any attorney of any Court of Record within the United States or else-
 where to appear for....., and after one or more declarations
 filed, to confess judgment or judgments against.....in favor of
 the WESTERN PENNSYLVANIA HOSPITAL, as of any term for the above
 penalty, with costs of said suit, and attorney's commission for collection,
 viz: Five per cent. in case payment has to be enforced by process of
 law; hereby waiving inquisition and condemnation of any property
 that may be levied upon by virtue of any execution, which execution
 may issue forthwith, on failure to comply with any of the conditions
 thereof, and hereby waiving the right of exemption from levy and sale
 of any and all property that now is, or hereafter may be, exempted from
 levy and sale, under any Act of Assembly for such purpose, and with
 release of all errors, &c. And it is further agreed and provided that
 execution and alias, and pluries executions may issue at any time, and
 from time to time, and as often any amount shall be due and owing
 to said WESTERN PENNSYLVANIA HOSPITAL, and that the books of
 said Hospital shall be evidence, and a liquidation of the amount to be
 collected on said executions.

Witness.....hand and seal.....the.....day of.....in
 the year of our Lord One Thousand Eight Hundred and.....

Whereas... .., of....., in the County
, and who is insane, has been admitted as a patient
 to the WESTERN PENNSYLVANIA HOSPITAL, at Dixmont, Pa.

Now, therefore the condition of the obligation is, That if the said
 obligors shall pay to the said WESTERN PENNSYLVANIA HOSPITAL, its
 successors or assigns, the sum of.....Dollars and.....
 Cents per week, for the Board of said patient, so long as.....shall

continue in said Hospital, with such extra charge as may be occasioned by.....requiring more than ordinary care and attention, and shall provide for.....suitable clothing ; and shall pay for all such necessary articles of clothing as shall be procured for.....by the said Hospital ; and shall remove.....from the said Hospital whenever required to do so by the Superintendent, and if the said obligors shall also pay, not exceeding Fifty Dollars for all damages the said patient may do to the furniture, or other property of the Hospital, in any one quarter, and for reasonable charges in case of.....death ; and in case the said patient shall be removed from said Hospital by, or at the request of us, or either of us, or by any other person or persons, before the expiration of three calendar months after.....reception, then if the said obligors shall pay the board of said patient for thirteen weeks, and all other charges on the books of said Hospital, all payments for board and clothing to be made in advance, quarterly on the fifteenth day of March, June, September and December in each year, and at the time of removal, with interest on each bill from and after the time it becomes due—then this obligation to be void, otherwise to remain in full force and virtue.

Signed, sealed and delivered in presence of us.

ANNUAL REPORT
OF THE
MANAGERS
OF THE
Western Pennsylvania Hospital.

*To the Honorable President and
Members of the Board of Public Charities:*

GENTLEMEN:—I have the honor to lay before you a condensed statement of the affairs and operations of the WESTERN PENNSYLVANIA HOSPITAL for the fiscal year ended September 30th, 1894, and for details refer to the reports of the Treasurer, Committees, Superintendents, Medical and Surgical Staff, and Tables of Statistics accompanying this.

The Institution comprises two departments. The hospital for the care and treatment of the insane at Dixmont, on the Pittsburgh, Fort Wayne and Chicago Railroad, about eight miles from Pittsburgh, and the medical and surgical department, in the city.

THE HOSPITAL FOR THE INSANE AT DIXMONT.

On the 1st of October, 1893, there were 692 patients in the hospital. During the past year 227 were admitted. The total number under treatment was 919. The daily average number was $703\frac{33}{100}$. Of these 269 were discharged or died, 97 were restored, 104 were improved, 3 unimproved, 80 were transferred to the Hospital for Chronic Insane at Wernersville, and 65 died. On the 1st of October, 1894, the beginning of the year, there were 650 in the hospital.

A temporary relief to the hospital's crowded condition was experienced by the removal of the patients to Wernersville, but new arrivals were numerous, and soon I expect to see the population of

the hospital again increased to its maximum capacity as a refuge, and beyond its capacity as a hospital for the care and relief of the mentally diseased, for which it was established.

The fact that the patients were well cared for in every particular is demonstrated by the good health which they enjoyed, and the large percentage of cures that were effected.

The workings of the whole establishment were efficient and harmonious, and satisfactory to the Board of Managers, and especially to the Executive Committee in immediate charge; for all of which there are abundant reasons for thankfulness.

I can truthfully assert that never in the history of the Institution has it been in a better condition than during the past year, and at the present time.

No extensions or permanent improvements of importance were made, but necessary repairs and betterments to the buildings, appurtenances and farm were continual.

The hospital is a marvel of order, comfort and cleanliness, even to members of the Board who visit it weekly; nor has any part of the large farm comprising an extent of $373\frac{1}{4}$ acres been neglected.

On May 29th, DR. W. BROWN EWING, who had been for seven years assistant physician at this department, resigned his office to accept the superintendency of the Hospital for Chronic Insane, at Wernersville, Pa. He left us to our sincere regret, and took with him our heartfelt congratulations for his promotion, and our best wishes for his success in a wider sphere of professional work. The vacancy upon the staff was filled by the appointment of DR. JOHN WILSON ELDER, who reported for duty on May 15th, and has proved to be entirely acceptable and efficient.

The Board recognizes the faithful services of DR. HUTCHINSON, the Superintendent, and his assistants, and on its behalf cordially tender to them its thanks.

THE MEDICAL AND SURGICAL DEPARTMENT.

During the year there were 2,166 patients under treatment, a daily average of 191. Of these, 1,432 were cured, 325 were improved, and 171 died, leaving 192 in the hospital at the close of the year.

The cost of maintenance was \$87,237 $\frac{55}{100}$. The average cost per diem for each patient was \$1 $\frac{25}{100}$, of which amount the food cost \$0 $\frac{33}{100}$.

The total indebtedness of this department, as stated in my last report, was \$101,043.19. This amount includes the sum of \$50,000 owed to the Pennsylvania Railroad Company for money advanced in 1885, to defray the necessary expense of maintenance chiefly in the years 1883 and 1884.

To refresh our memories—I would state that the unexpected failure of the Legislature in 1885 to make proper and sufficient appropriation to aid the management in conducting the hospital, compelled the Board of Managers to resort to the expedient of borrowing money. Consequently a loan was negotiated in 1885, whereby the Pennsylvania Railroad Co. furnished the amount required to meet the indebtedness then existing, namely, \$50,000. In 1875, the Institution had granted and conveyed to the said railroad company a strip of land along its northern boundary, on the condition that the company should pay and yield to the hospital for the said ground the sum of four thousand dollars per annum, and provided that if the railroad company should at any time thereafter pay to the Institution the sum of sixty-six thousand six hundred and sixty-six dollars and sixty-seven cents, then the yearly rent should cease, and the covenant for its payment become void. The railroad company has continued to pay the ground rent of \$4,000 annually. The principal, which became a part of the permanent endowment funds of the Institution was hypothecated to the railroad company as collateral security for the loan of \$50,000, made by the said company to the hospital. This was not done however without the advice and approval of the Solicitor of the hospital, HON. GEORGE SHIRAS, JR., now of the Supreme Bench of the United States, who said: “I think, that upon a proper representation to the Legislature at the next session, that body would increase their ordinary grant to a sum sufficient to restore the Trust Funds to their present dimensions,” etc.

Applications to the Legislature for a specific appropriation of \$50,000 to liquidate the debt due the railroad company, and restore the same to the Endowment Funds, which had practically been impaired to that extent, were approved by you, and successively granted by the Legislatures, but unfortunately failed to meet with the approval of GOVERNOR BEAVER in 1887, and of GOVERNOR PATTISON in 1891, both of whom undoubtedly were not made to comprehend the motive, and had erroneously looked upon the indebtedness of the

hospital for which relief had been voted by the Legislature as a "*mortgage debt*" for purchase of land, erection of buildings, or something other than a legitimate deficiency incurred in maintaining the hospital and conducting it for the humane purpose of alleviating the sufferings of indigent sick and maimed citizens, and soldiers of the Commonwealth.

Again the Board will ask for a specific appropriation of the sum of Fifty Thousand Dollars, with the expectation that it will be realized, and the *incubus* be removed that endangers the sanctity of the TRUST FUNDS, and which has depleted the hospital's revenues to the extent of \$25,500 in the way of interest paid.

The balance of the indebtedness already referred to, which was \$51,043.19, at the beginning of the year, I am rejoiced to report was reduced to \$7,787 $\frac{55}{100}$, on September 1st, 1894. This was accomplished by applying the proceeds of a sale of another strip of land to the Pennsylvania Railroad Company, by a donation from the same company, by a legacy, by the premium realized on the exchange of securities, (all of which will be explained), and by a reduction of current expenses in the administration of the hospital.

Again, I will have to repeat a little history. When Brereton and Jones avenues were opened through the front of the hospital property, in consideration for which the Denny and Schenley estates gave quit claim deeds relieving the Institution from the reservation or power of forfeiture contained in the original conveyance; a portion of the property consisting of about three acres was cut off from the main body of the land on the southern side of the said avenues. This outlying ground was principally precipitous hillside overhanging the railroad tracks, and not of available uses to the hospital. A lot of this land comprising $1\frac{972}{1000}$ acres was purchased by the Pennsylvania Railroad Company for the consideration of \$20,000, and an agreement to curb and pave Brereton avenue where it adjoins the said lot, provided the avenue as relocated be first dedicated to the city of Pittsburgh by the hospital, without cost to the railroad company; and, further, the officers of the railroad company were authorized to make a donation of the sum of \$10,000 to the hospital upon the completion of the transfer of the real estate. The legal proceedings necessary to complete the terms of the sale were very protracted, but finally concluded at the close of the year, and the money was paid to our Treasurer and immediately applied as stated, by instruction of the Managers, to the reduction of the outstanding obligations of the department.

The \$57,000 City of Pittsburgh 7 per cent. Water Loan Bonds of the Endowment Funds maturing in 1896, were sold to the city at a premium, and while the principal was reinvested in Bonds and Mortgages on good city property, together with a small balance in City Warrants bearing interest, the premium and matured interest were used in paying off the indebtedness; and also for the same purpose a bequest of \$5,000 from the late Miss JANE HOLMES was utilized.

Through the favor of the CHRISTIAN AID ASSOCIATION OF THE EAST END, a large force of laborers was employed for six weeks during the distressing times of last winter in excavating, grading and carrying out the design of improving the grounds surrounding the buildings. Roads and walks were macadamized and paved, the materials for which were donated by friends. A new iron fence was erected along the entire front of the premises, which had heretofore been scarcely protected from trespassers since the opening of Brereton avenue. For this, two bonds of \$1,000 each of the Allegheny Valley Railroad Company, a bequest of the late THOMAS BAKEWELL, were diverted from the Endowment Funds where they had been retained till this occasion, and sold and used as directed by the will.

The exterior of the building was brightened up and protected from decay by being thoroughly and tastefully repainted through the liberality of our good friend, MRS. SAMUEL MCKEE.

The interior of the hospital was simply kept in repair as far as the Executive Committee felt justified in directing, not by any means to the extent that its condition called for. The premises with incessant care and labor were kept as neat and clean as possible.

The patients never lacked for the most skillful medical and surgical attention and nursing, and they were supplied with the best food that the market afforded. Their welfare and comfort were never neglected. No persons whose conditions and diseases rendered them proper objects of charity or care of the hospital were refused admittance.

The results of treatment and operations reported by the Medical and Surgical Staff were very gratifying to the Managers, and attest to the zeal with which the physicians and surgeons served the hospital, and they merit our recognition and thanks, as do also the Superintendent and other employees.

The TRAINING SCHOOL FOR NURSES is in successful and effective operation. It is now in charge of MISS CAROLINE I. MILNE, a graduate

of Saint Bartholomew's Hospital in London, England. On September 20th, ten thoroughly competent nurses graduated and received diplomas, three of whom were retained in the hospital and were placed in charge of wards. There are in the school 46 nurses in training—37 women and 9 men. There is need for additional dormitories for the nurses; also, for a lecture and recitation room, a library and anatomical specimens, and mechanical appliances for use at the recitations and lectures.

It is hardly probable that the cost of maintaining the hospital can be much further reduced. The building was erected nearly fifty years ago, when the means at the command of the Managers were very limited, and at a time when hospital architecture was almost in its infancy. Methods for heating and ventilating as now understood were then unknown. Modern conveniences, such as sanitary plumbing, electric lighting, machine laundrying, steam cooking, and so on, had not been thought of. Aseptic precautions against contagious and infectious diseases, which are necessary in the care and treatment of not only surgical, but also of medical cases, are characteristic of recent practice. All these essentials to the equipment and operation, and economical management of a hospital are nearly impractical in the present building, for the reason that it was not constructed in such a manner as to admit of their successful introduction. From time to time so-called improvements were introduced, reconstructions and extensions made, till at length the old house has become a fine example of patchwork. All appliances for protection against the danger of fire suggested by the fire department and the insurance underwriters have been adopted, yet the danger exists, and the menace of a great calamity is impending all the time.

An architect who has made the study of hospital building a specialty, recently inspected the building, and candidly expressed the opinion that the entire establishment ought to be condemned if any encouragement existed in the minds of the Managers that money would be forthcoming to construct a new hospital upon the pavillion-plan, for which our ample grounds are admirably adapted. Some of our Managers were already of this opinion, and it is now thought that the time has arrived when an appeal should be made to generous and philanthropic people to contribute to the project indicated.

The Board will ask your approval of an application to the next Legislature to appropriate the sum of ninety thousand dollars for the payment of salaries of officers, wages of employes, and maintenance

of patients for the two fiscal years, commencing June 1st, 1895 ; also, for the sum of fifty thousand dollars (already referred to) to refund the money advanced by the Pennsylvania Railroad Company ; and the further sum of twenty-five thousand dollars for the erection of a new steam laundry and kitchen, including building, connections with the main building, new boilers, machinery, equipments, etc.

THE ENDOWMENT FUNDS.

The changes in the investment of these funds will be detailed in the Finance Committee's Report. The capital was reduced \$2,000 by the sale of two bonds of the Allegheny Valley Railroad Company, (which were really only temporarily included in the funds until the occasion for the application of the bequest from which they were derived came ;) and the exchange of the amount of \$57,000 hitherto invested in City of Pittsburgh Water Loan Bonds, (which were nearing maturity, and upon which the premium they commanded was rapidly diminishing,) into Bonds and Mortgages, and a small balance into City Warrants.

The FUNDS consist of securities belonging to the Department for the Insane at Dixmont, amounting to \$23,000, and securities belonging to the Medical and Surgical Department, amounting to \$303,966.67.

THE TRUST FUNDS.

I call your attention to the report of the Brewer and Crawford Funds Committees, the earnings of which funds purchased and distributed during last winter :

61,400 bushels of coal, costing	.	.	.	\$4,600.63 and
4,450 " " "	.	.	.	381.50

The Committees, as may be readily understood, have a very difficult duty to perform in judiciously distributing fuel among the many applicants. Though unworthy recipients of these bounties are not unfrequent in spite of all the care that is exercised in giving out orders, yet the blessings that flow from this great charity among "the destitute and worthy poor of Pittsburgh and vicinity," are very great, and keep alive the memories, and honor the names of CHARLES BREWER and JAMES CRAWFORD.

In Memoriam.

Two of our valued Managers died in the past year. Both of them were noteworthy men, and contributors to the Institution at its inception. They left only three or four survivors of a list of two hundred contributors, whose names were published in the *Daily Morning Post* of March 19, 1847.

ABRAHAM GARRISON, a Life Member of this Board, was born in Orange County, New York, on the 4th of March, 1804, and died in Allegheny, on May 10th, 1894. He came to Pittsburgh in 1826, and engaged in business with Kingsland, Lightner & Co., proprietors of the Jackson and Eagle Foundry, which was located on the corner of Smithfield Street and Fifth Avenue, where the postoffice formerly stood. In 1840, the firm became Bollman & Garrison, and in 1865, the present firm of A. Garrison & Co. was established, in which Mr. Garrison continued to take an active interest until his death. He was the President of the Diamond National Bank, and director in several other local institutions. Mr. Garrison was a man of very unerring judgment, and his advice on financial matters and business affairs was much valued and always good. He was an honored and trusted citizen, and a quiet and unostentatious giver to various charities. Living to the advanced age of 90 years, and retaining his faculties to the last, his well marked personality was recognized and familiar to the citizens generally, who respected him. He was an Episcopalian, and one of the founders, and a regular attendant of St. Andrews Church.

WILLIAM P. TOWNSEND, the chairman of the Executive Committee of the Department for the Insane, at Dixmont, was born in Pittsburgh on April 13th, 1817, his father then being in business on Market Street, and residing on Sixth Street. His family removed to New Brighton, Pa., in 1828, in which year his father built the first mill west of the Allegheny Mountains for the manufacture of wire, etc. The firm's warehouse was continued in Pittsburgh, where the subject of this memorial began his business career in 1834, and he remained in the city until 1884. He took an active part in manufacturing wire, etc., in New Brighton, until the first of January last, then retiring and handing his business over to his sons, after sixty years of

service. He did not take special pains to accumulate money, but did take a pride in producing reliable goods and in fair dealing. He never had a misunderstanding with his employes, some of whom were with him for fifty years, and many for more than twenty years. His father was a member of the Society of Friends, and he inherited many of their admirable traits, though he became a member of the Third Presbyterian Church, under Dr. Riddle, in 1840. He was concerned in the hospital ever since its establishment, and for many years took a warm interest in the department for the Insane, at Dixmont, and gave much time and thought to its affairs while visiting the institution, and at home, in reading and in consulting such works and authorities as would inform him on the subject of the care and treatment of the insane, and render the application of his knowledge useful. He was always disappointed when he was by any reason prevented from attending the meetings of the Committee over which he presided—which was seldom—for he never permitted any unimportant matter to interfere with his “pleasant duty” at the hospital. His colleagues on the Executive Committee, and all the people in and around the hospital loved him, and he was endeared to them for his cordial manner, his fidelity to their interests, his unflagging zeal and business capacity in directing their affairs. His loss was a serious bereavement to the Institution.

All of which is respectfully submitted.

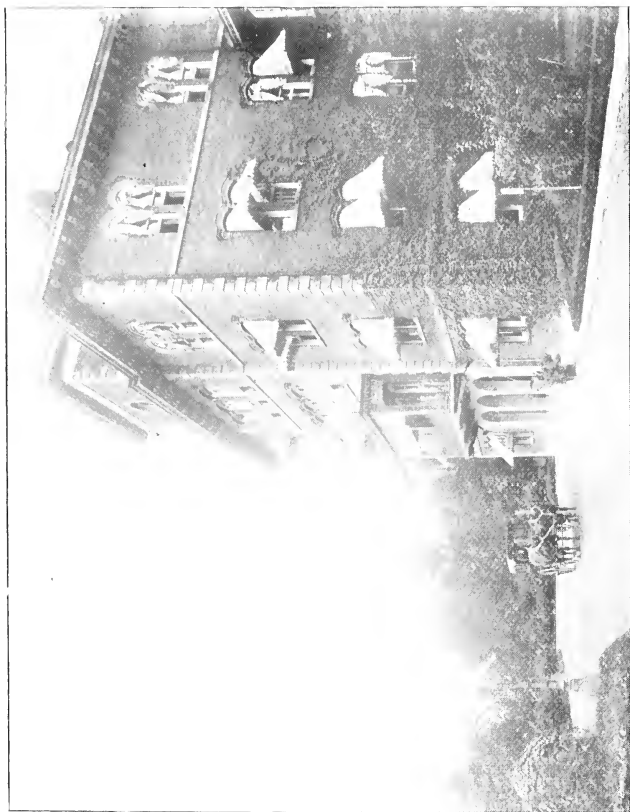

By order of the Board.

JOHN A. HARPER,

President.

December, 1894.

MAIN ENTRANCE — DIXMONT.

Report of the Executive Committee

OF THE

Department for the Insane at Dixmont.

TO JOHN A. HARPER, ESQ.,

President of the Western Pennsylvania Hospital.

DEAR SIR:—The very full and clear reports of yourself and the Superintendent, Dr. Hutchinson, seem to make it unnecessary for the Executive Committee to add anything relative to the affairs of the Institution.

The members of the Committee have continued their weekly visits to the hospital, have scrutinized every detail of the management, consulted freely with the Superintendent, and have seen that every suggestion for the welfare of the inmates has been carried into effect.

Everything we believe to be in excellent condition at this time. The decrease in prices of supplies, together with care in their purchase, has resulted in a considerable reduction in the expense of carrying on the work, so that we hope during the ensuing year to do still more for the comfort and pleasure of our unfortunate wards.

The officers have been zealous in the discharge of their duties, and deserve our thanks.

CHARLES C. TOWNSEND,

Chairman of Executive Committee.

REPORT

OF THE

Physician and Superintendent

OF THE

Department for the Insane at Dixmont.

REPORT

OF THE

Physician and Superintendent

OF THE

HOSPITAL FOR THE INSANE AT DIXMONT.

To the President and Board of Managers:—

GENTLEMEN:—I take pleasure in presenting to your honorable body the annual report of this department of the Western Pennsylvania Hospital, for the year ending September 30, 1894. No accident, suicide or escape, during this period has occurred to mar or interrupt the daily routine work of the Hospital, perfect harmony and untiring effort has prevailed among the officers and employes to promote the good of the patients, and the noblest purposes of the hospital, and in referring you to the statistical tables accompanying this report I can but feel prosperity has dwelt in our midst, and much good accomplished. No year has witnessed so large a number of recoveries, and such a marked decrease in the number of deaths.

To the question so often heard by asylum officers, do you really cure any one, and are not most of those supposed to be restored to reason returned to our care? I may say we do, and of this number four have thus far been recommitted to the hospital for further treatment, though still others may return, particularly those whose insanities are influenced by hereditary predisposition and those whose mental impairment is largely due to continued physical or other causes.

A noteworthy fact was the difficulty so frequently experienced in inducing patients upon recovery to leave the hospital; many wished to remain indefinitely, in many instances their friends also insisted upon their doing so. This may be accounted for in numbers of our patients, more especially the past year, having no occupation and

perhaps too, no home ; it is however a convincing proof the care bestowed upon our patients is appreciated by them.

The total number of patients treated during the year was nine hundred and nineteen, of whom two hundred and twenty-seven were new cases, thirty-two were admitted upon request of their friends, one hundred and twenty-one by the various poor authorities, seventy-two upon orders of the court, and two upon an order of transfer issued by the State Board of Lunacy.

Ninety-seven patients were discharged as restored, one hundred and four as improved, three as unimproved, and sixty-five died.

Six hundred and fifty patients remain in the hospital at the close of the year. The highest number of patients in the Hospital upon any day was seven hundred and thirty-two, and our lowest number was six hundred and thirty-eight, showing that while our wards have not been crowded to the extent as shown you in former years, yet the number is still greatly in excess of the recognized capacity of our buildings.

On August 1, 1894, eighty patients, fifty men and thirty women were discharged by order of the Board of Public Charities of Pennsylvania and transferred to the new State Asylum for the Chronic Insane at Wernersville, Pa. The patients chosen for this purpose were of the Chronic class and in all respects complied with the law creating the new institution, as well as in the character of its inmates. They were selected too in so far as possible in view of their having no friends or relatives to care for them or to visit them. Including those transferred a year ago the total number of one hundred patients have now been sent from Dixmont to the new Asylum.

With the removal of so large a number of chronic insane and consequent decrease in our population must be attributed the improved state of health so noticeable in our household ; though the number of cases treated is less than in former years, more patients recovered. The general health of those remaining was much benefited and the number of deaths fell far below that of previous years. These facts are undisputed evidences the Hospital has been seriously embarrassed in its work for many years, due simply to its terribly overcrowded population.

Of the causes of death it may be said the larger proportion of cases succumbed to that dread disease consumption ; many of these patients

had been long residents of the hospital, and were broken down physically by their mental troubles. Five deaths were due to exhaustion following acute mania; in five male patients death occurred from paresis, seven patients died from the exhaustion of chronic melancholia, and in the remainder of those who passed away, death was attributed to the various physical diseases as shown in the mortuary tables.

That certain forms of brain disease are not incompatible with fairly good health and the individual may attain the allotted period of life, when placed under circumstances conducive to that end may be seen in the following additional statistics.

Of those who died two patients had been residents of the Hospital seven years, one eight years, two ten years, one thirteen years, and two patients, one man and one woman, were residents over thirty-five years. During the year however, it may most truthfully be said many patients were brought to the hospital, not only as a last resort, but there to end their days, and of these six died after a residence with us of less than three weeks. A number of patients were brought to our door handcuffed, and in one instance a woman bound hand and foot to a heavy plank, one old man was admitted who had been chained in bed at his home, others were received in an extremely untidy condition, some were brought from jails and lock-ups where they had been detained in some cases for weeks awaiting legal inquiry as to their mental condition and the necessary order for their commitment to the hospital.

The medical work of the hospital, the first and most important duty of the officers towards their patients, continued to receive that careful thought and devotion to the advancement of mental medicine that can only come from close application and study in the individual treatment of disease. The particular requirements of all cases needing remedial care were studiously observed and in addition clinical and pathological material has as a result become the starting point of a well founded department in the hospital in this field of scientific research.

Physical examinations also were made by the assistant physician of the woman's department upon cases where insanity was supposed to be traceable to some disorder of the uterus or adnexia. These examinations however yielded negative results; in not more than two or possibly three instances was sufficient disease found to account for the mental symptoms.

The lectures delivered before the nurses, and spoken of at some length in previous reports, were continued during the winter months.

Lectures also were given by the staff of the Training School for Nurses of the Medical and Surgical department of the hospital. The teaching given in this systematic course of instruction has been thorough and practical, including the subject of nursing in its every detail.

The good to the patient, as well as to the attendant derived from this course of training cannot be estimated. By it the life of earth's saddest and most afflicted creatures is made happier, by the intelligent care and sympathetic touch of the faithful nurse.

I regret to report the occurrence of so many changes in our corps of attendants, many of those who left the hospital took up their work in other institutions, and others left to engage in various enterprises. In few instances was there any infraction of the rules enforcing dismissal. These changes while most discouraging to a physician are quite unavoidable it would seem under the present system of hospital management.

The experience gained during the past year but confirms my belief that our best agent for the relief of the insane lies in some suitable and well directed diversion. By means of light occupation requiring of them some mental as well as physical effort much of that irritability, nervousness and even in some acute cases high mental excitement is allayed. The good thus obtained comes from out-door work, simply the usual every day walk is not sufficient. Abundant evidences of the advantages thus derived from some employment are everywhere seen in the hospital, patients thus occupied improve and recover and those who have chronic forms of mental disease are happy and enjoy good health. It is much to be regretted female patients can not enjoy some out-door occupation as well.

During the pleasant season of the year over two hundred of our men patients were engaged in some work upon the hospital grounds our lawns were graded and kept in order, and much of the light farm and garden work was performed by them. By their labor our roads have been placed in excellent repair, as well as the construction of a new public road extending through our property. Many of the female patients were engaged in assisting in the laundry and all who were able were taken out of doors every day. Those of them who enjoy driving

were permitted to do so. While appreciating the benefit thus derived from our varied daily occupations the officers with equal energy assisted in providing amusements for our household, and through the kindness of our many friends a number of concerts, plays and lectures were given in the chapel which were attended by all.

The usual dances and parties, picture exhibitions, games, etc., also served to pass the evenings profitably and pleasantly. The holidays were appropriately observed, as also were the church services in our chapel on Sunday.

The very creditable report of the farm shows you in detail the work accomplished in this department, while the yield falls below that of other years, it is to be attributed solely to the poor season. The general repairs however placed upon our property were extensive, including a very substantial fence built upon our boundary lines.

I would also refer your Board to that portion of this report containing an itemized statement of our general improvements and repairs. You will observe the usual care and attention has been given in maintaining the standard of the hospital for cleanliness order and the thorough repair of our buildings.

The financial exhibit appended to this report also shows you the total sum expended for the maintenance of the hospital is very considerably less than last year; a very considerable reduction appears in the weekly cost *per capita*.

At this time it is very proper for me to say, the hospital has now an officer known as its purchasing agent, and all supplies of whatever character are bought in competition. This system of buying has been not only of great personal relief to me but more than financial benefit to the hospital, and I account very largely in this strict business conduct of the affairs of this department the marked decrease in our expenditures during the year past, for all purposes.

The only change in the medical staff is the appointment of Doctor John Wilson Elder as assistant physician to succeed Doctor W. Brown Ewing, who in May last was chosen Medical Superintendent of the Asylum for the Chronic Insane, Wernersville, Pa. Dr. Ewing left the hospital with the esteem and well wishes of all for his success in the responsible position to which he was called.

To my assistants Doctor J. Moorhead Murdoch, Doctor John Wilson Elder and Doctor Elizabeth C. Mallison I tender my thanks and appreciation of all their personal kindness and aid to me in the performance of my duties, for their zealous and ever watchful care over their patients and their devotion and fidelity in furthering at all times the best interests of the institution.

I am pleased to report no other change has occurred among the officers of the hospital, and to all I desire to express my grateful acknowledgment for their efficiency and promptitude in presiding over the respective departments entrusted to their care.

In concluding this report I am not unmindful of the cordial and wise counsel ever held out to me by the Board of Managers through another year, and you gentlemen, your President, and your Executive Committee I would also especially thank at this time and with the recognition of an overruling Providence in the affairs of the hospital I close this report.

HENRY A. HUTCHINSON.

TUESDAY.

BREAKFAST.—Stewed Veal, Bread, Butter, Sugar, Syrup, Coffee.

DINNER.—Roast Beef, Hominy, Boiled Potatoes, Pickles, Bread, Butter.

SUPPER.—Light Cakes, Stewed Fruits, Bread, Butter, Sugar, Syrup, Tea.

WEDNESDAY.

BREAKFAST.—Beef Steak, Fish, Fried Potatoes, Bread, Butter, Sugar, Syrup, Coffee.

DINNER.—Roast Veal, Fresh Pork, Rice, Green or Dried Corn in season, Butter, Bread.

SUPPER.—Cinnamon Bread, Cheese, Bread, Butter, Sugar, Syrup, Tea.

THURSDAY.

BREAKFAST.—Beef Steak, Corn Cakes, Bread, Butter, Liver and Fried Onions, Coffee.

DINNER.—Roast Beef, Potatoes, Pickles, Cold Slaw, Butter, Bread.

SUPPER.—Mush and Milk, Stewed Fruit, Bread, Butter, Biscuit, Sugar, Syrup, Tea.

FRIDAY.

BREAKFAST.—Fish, Meat Stew, Baked or Boiled Potatoes, Bread, Butter, Sugar, Syrup, Coffee.

DINNER.—Roast Mutton, Boiled Beans, Rice Pudding, Fresh Pork, Bread, Butter.

SUPPER.—Dried Beef, Crackers, Bread, Butter, Sugar, Syrup, Tea.

SATURDAY.

BREAKFAST.—Beef Steak, Baked Potatoes, Bread, Butter, Sugar, Syrup, Coffee.

DINNER.—Roast Beef, Tomatoes, Potatoes, Stewed Onions, Bread, Butter.

SUPPER.—Stewed Fruit, Crackers, Bread, Butter, Baked Apples, Syrup, Sugar, Tea.

ON HOLIDAYS.

Turkey, Oysters, Cranberries, Mince Pies, Fruit Cakes, Doughnuts, Sweet Potatoes, Etc.

INVALID DIET.

Beef Tea and Essence, Broths, Toast, Bread and Milk, Boiled Milk, Milk Punch, Jelly, Eggs, Brown Bread, Oat Meal, Gruel, Corn Starch, Farina, Tapioca, Sago, Chickens, Etc., Etc.

Vegetables and fruits vary with the season ; two kinds of fresh vegetables from the Hospital Farm are always served for dinner during the summer months, and dried, canned or preserved vegetables and fruits are provided in the colder portions of the year. Additional variety is also afforded in relishes, sauces, butters, etc. In their season, melons, grapes, apples and small fruits grown upon our farm are furnished in abundance.

INCLUDED IN THE

Western Judicial District of Pennsylvania,

ARMSTRONG,	CAMBRIA,	INDIANA,	SOMERSET.
ALLEGHENY,	FAYETTE,	JEFFERSON	WASHINGTON.
BEAVER,	GREENE,	LAWRENCE,	WESTMORELAND.
BUTLER.			

Admission of Patients to Insane Department.

1. Preparatory to the admission of a patient, unless when committed by order of a court, the Superintendent shall be furnished with the certificate of two physicians, who have been in practice for five years or more, that they have separately seen and examined the individual within two weeks of the date of admission, and believe him or her to be insane, and these certificates shall be sworn to before some alderman or judicial officer, with the order of near relative or friend that the patient may be received into the Hospital, with a statement as required by law, and a bond with satisfactory security, for the payment of board and other expenses while in the institution. All private patients thus received shall make a payment of thirteen weeks' board in advance, when brought to the Hospital, no part of which shall be refunded; and if taken away uncured, and against the advice and consent of the physician, in any succeeding quarter, no part of the payment shall be refunded.

2. Whenever a patient is sent to the Hospital by order of the Court, the order or warrant, or a copy thereof, or, if sent by the Directors of Poor, an order sent by the Directors or their agent accompanied by the Certificate of Insanity, as required by law, shall be lodged with the Superintendent of the Hospital.

3. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

4. Each male patient shall be provided with at least three new shirts, a new and substantial coat, vest and pantaloons, three pairs socks, two pairs drawers, two undershirts, a hat or cap, cravat, collars, handkerchiefs, shoes, and one pair of slippers.

5. Each female patient shall have three calico dresses, four chemise, three pairs drawers, three pairs hose, three nightgowns, two flannel skirts, one Balmoral skirt, two muslin skirts, six handkerchiefs, four collars, two pairs shoes, one shawl or cloak, and one hat or hood.

6. It is very desirable that extra and better apparel should be sent with those accustomed to it, that when their health is improved, or when they attend religious worship, walk or ride out, their self-respect may be preserved.

In all cases the patient's best clothing should be sent; it will be carefully preserved and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, knives, &c., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

All clothing, if not taken away at the time of patient's removal, or within three months afterward, will be disposed of as the officers of the Hospital may think best, and no compensation whatever will be made therefor.

7. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him or her to the Hospital, and from whom minute, but often essential particulars may be learned.

8. The price of board, including washing, mending, and attendance for all who are supported at the public charge, is four dollars per week. For private patients, or those supported by themselves, or their friends, the price varies from five to ten dollars, according to the trouble and expense incurred, and according to their ability to pay. Higher prices are paid by special agreement with the physician, for extra attention and accommodation.

Payments are to be made quarterly, in advance.

9. A bond, with satisfactory sureties, will be required for the payment of the board and expenses, and for the removal of the patient when discharged, of all persons, excepting those sent at the expense of the counties or townships.

Those who bring friends should be prepared to give a bond, and, if strangers, furnish evidence of their responsibility.

10. All bills remaining unpaid one month after date of presentation, are placed in the hands of the Solicitor of the Hospital for collection.

11. As the diet of the patients is under the absolute control of the Superintendent, no nuts, candies, cakes or other edibles shall be given to the patients, by their friends or visitors, without his express permission.

12. Visitors are admitted to inspect the Institution on any day (except Sunday,) between the hours of 10 A. M. and 12 M., and between 2 and 4 P. M.; but no visitor shall be admitted to the wards occupied by patients, without express permission from the Superintendent; and especial care is to be taken that no amount of visiting is permitted that shall prove injurious to the patient. No visitors shall be admitted on holidays.

Visitors will please not intrude on the grounds used by the patients, or give to or receive anything from patients.

13. The Hospital is located eight miles west of Pittsburgh, on the Pittsburgh, Fort Wayne & Chicago Railway, at Dixmont, and can easily be reached by cars, there being ten trains (east and west) each day, except (Sunday,) stopping at the Hospital Station.

14. Applications for the admission of patients, and all communications in regard to the condition, health, bills, &c., of those who are in the Hospital, shall be made to the Superintendent.

15. As Dixmont Station has now an Adams Express Office, all goods may be sent to the Hospital direct by express or freight, as may be preferred.

The friends of patients can communicate with the Institution by telegraph and telephone.

Forms of Commitment.

The following forms have been prepared by the Committee on Lunacy, to be used in all cases (except those sent by order of Court) for the commitment of insane patients by their friends or by Directors and Overseers of the Poor, to the Hospital for the Insane at Dixmont, Pa. No such patients will be received unless the forms as given are fully complied with.

Order for the Reception of a Patient.

I, the undersigned, hereby request you to receive.....
an insane person, as a patient into your Hospital, believing that such
detention is necessary for his..... benefit. Subjoined is a statement re-
specting the said.....

(Signed)

Occupation.....

Degree of relationship (if any) or }
other circumstances of connection }
with the patient. }

Dated this.....day of....., one thousand eight
hundred and ninety.....

To.....

Superintendent of Western Pennsylvania Hospital for the Insane, at Dixmont, Pa.

Physician's Certificate.

We, the undersigned, residents of Pennsylvania, hereby certify that we have within one week prior to the respective dates hereinafter mentioned, at....., in the county of....., separately examined....., of and do verily believe that the said..... is insane, and that the disease is of a character which in our opinion requires that person shall be placed in a hospital or other establishment where the insane are detained for care and treatment.

We further certify that we have been actually in the practice of medicine for at least five years, and that we are not related by blood or marriage to the said....., nor in any way connected as a medical attendant or otherwise with the hospital or other establishment in which it is proposed to place the aforesaid.

Dated this.....day of....., one thousand eight
hundred and ninety.....

Certificate of Magistrate or Judicial Officer.

I, of County, of the State of Pennsylvania, do certify that the foregoing certificate was duly sworn or affirmed to before me, by the above named....., and..... on this..... day of..... 18....., that the signatures thereto are genuine, and that the signers are physicians of good standing and repute.

Physicians must make oath before a Justice of the Peace, and not before a Notary Public.

* Here insert the street and number of the house (if any) or like particulars.

† Insert residence and profession or occupation (if any).

STATEMENT.

If any particulars in this statement be not known, the fact to be so stated.

1. Name of patient, with Christian name at length.....
 2. Sex and age.....
 3. Residence for the past year, or so much thereof as is known.....
 4. Occupation, trade or employment.....
 5. Parents, if living.....
 6. Husband or wife.....
 7. Children.....
 8. Brothers and sisters, and the residence of each of these persons.....
 9. If not more than one of these classes is known, the names and residence of such of the next degree of relations as are known.....
 10. A statement of the time at which the insanity has been supposed to exist, and the circumstances that induce the belief that insanity exists.....
 11. Name and address of all medical attendants of the patient during the last two years.....
- (Signed) Name.....

(When the person signing the statement is not the person who signs the order, the following particulars concerning the person signing the statement are to be added, viz :)

Occupation, (if any).....

Residence.....

Degree of relationship, (if any), or other circumstances of connection with the patient.

LUNACY LAW OF 1883.

NOTE.—The certificate must be signed by at least two physicians, and made within one week of the examination of the patient, and within two weeks of the time of the admission of the patient, and shall be duly sworn to or affirmed before a judge or magistrate of the Commonwealth of Pennsylvania, and of the county where such person has been examined, and who shall certify to the genuineness of the signatures, and to the standing and good repute of the signers.

And any person falsely certifying as aforesaid, shall be guilty of a misdemeanor and also be liable civilly to the party aggrieved.

When patients are sent by order of Directors or Overseers of the Poor, they shall, in addition to the foregoing papers, fill up the following Order of Admission as required by the rules of the Hospital :

W. P. HOSPITAL FOR INSANE AT DIXMONT, PA.

Will please admit the within named.....as a patient to the Hospital, and charge the..... of the.....Pennsylvania, and we hereby covenant and agree for ourselves and our successors in office, that we will well and truly pay or cause to be paid, to the said Hospital, all the expense of the care and maintenance, and of the removal to and from said Hospital of said patient, quarterly, from this date, and in the event of.....death, while in said Hospital, we and our successors in office agree to pay the funeral expense of said patient.

Commitment of Party charged with Offenses Punishable by Imprisonment or Death
 after Finding of Insanity.

THE COMMONWEALTH OF PENNSYLVANIA,

To the Sheriff of.....*County and to The Western Pennsyl-*
 [SEAL.] *vania Hospital, Greeting :*

Whereas,.....having been charged with
 the offense of.....at the Sessions of the Court of *Quarter*
Sessions of the Peace in and for the said county of....., was, on the.....
 18....., by verdict of an inquest duly impaneled to try the indictment
 against said.....for the said offense, in the manner provided by
 law, found to have been insane at the time the said offense was com-
 mitted, and that the saidstill continues insane ; and whereas,
 the said inquest, upon their solemn oaths or affirmations respectively,
 did further find that the said.....had *no legal settlement*
in this Commonwealth, but that the place of residence at the time when
said offense was committed, was the township of....., *in the county of*
[or] *a legal settlement in the Commonwealth, at the time said*
offense was committed, to-wit: in the township of.....*the county of*.....
; and did further find on their respective oaths or affirmations, as
 aforesaid, that the said.....is in indigent circumstances :

And whereas our said Court of *Quarter Sessions of the Peace* of the
 said county did thereupon, on....., 18..., adjudge and declare, that
 the said.....be committed to The Western Pennsylvania Hospital,
 to be treated according to the rules and regulations of said Institution,
 and the laws of this Commonwealth, and there detained until *he* is
 thence discharged by due process of law, or the order of our said Court,
 or of one of the Judges thereof ; and further, that the expense of the
 care and maintenance of said....., and of his removal to and from said
 Hospital, shall be paid by the said county of.....according to law :

And whereas, our said Court of *Quarter Sessions of the Peace* in and for said county of....., did give due notice thereof to the constituted authority having charge of the poor in the said *township of*.....to wit : the *Overseers* of the poor of the said.....

Now, therefore, these are to charge and command you, the said Sheriff, forthwith to convey and deliver into the custody of the Western Pennsylvania Hospital, in the county of Allegheny, in this Commonwealth, the body of said....., and you, the said Western Pennsylvania Hospital, are hereby required to receive the said.....into your custody, care and keeping in the said Hospital, and there to keep *him* safely, to be treated according to the rules and regulations of said Institution and laws of this Commonwealth in such cases made and provided, until the said.....shall be thence discharged by due process of law, or by the order of our said Court, or of one of the Judges thereof.

ANNUAL REPORT

OF THE

MANAGERS

OF THE

Western Pennsylvania Hospital.

To the Honorable President and

Members of the Board of Public Charities:

GENTLEMEN:—I have the honor to lay before you a report of the affairs of the WESTERN PENNSYLVANIA HOSPITAL for the fiscal year ended September 30th, 1895; referring to accompanying Reports and Tables of Statistics, to which I invite your particular attention.

The purpose of the founders of the hospital, (who met and organized in the Odeon Building, on Fourth Street, in Pittsburgh, on March 10th, 1847,) “*to extend aid, comfort and relief to indigent and afflicted humanity,*” has been carried out to the institution’s utmost capacity; and this has been done in such an orderly and systematic way, that no event of marked importance has characterized its operations.

THE HOSPITAL FOR THE INSANE AT DIXMONT

had under treatment during the year 943 patients; 293 patients were admitted during the year, and 200 were discharged, leaving in the hospital at the end of the year 743. The highest daily number under treatment was 743; the lowest 650, making a general average of 701½.

The number of insane admitted since 1856, was 7,546. 2,160 of these were discharged restored; 2013 improved; 803 unimproved; and 1,827 died.

During the past year of the 200 patients discharged, 68 were restored, 49 were improved, 6 unimproved, 1 was not insane, and 76 died.

The death rate was high. Of those who died, 41 were over 50 years of age, 12 were over 60 years of age, 8 were over 70 years of age, and 2 were over 80 years of age. 10 had been residents of the hospital less than 3 years, 12 less than 2 years, and 35 less than 1 year. The large death rate may be further accounted for by the fact that many of the patients having become exhausted by mania and age, were sent to the hospital as a last resort—to die there—as they accordingly did.

The hospital was over-crowded. The relief anticipated by the opening of the hospital at Wernersville, and the removal of patients from “Dixmont” to that place, was only temporary.

Humanity alone moves our management to receive and shelter the most helpless and hopeless class of insane that are brought to our doors. The capacity of our buildings is limited. The law does not expect or direct the performance of impossibilities. On the contrary it says: “that in the order of admission, *recent cases* shall have precedence over those of long standing.” The Western Pennsylvania Hospital was established to be a *curative* institution, and this fact has always been emphasized in their reports by my predecessors.

The health of the household was remarkably good. There were no cases of acute or serious disorders, and only one case of Typhoid Fever, and this was in the case of a female nurse who had been in the hospital but a short time, and she probably brought the disease with her.

A possible danger from fire existed in the wooden construction of the chambers for the dumb waiters and dust chutes throughout the main building. All of these were removed, and in their stead, brick channels were built. This was a serious undertaking that required ingenious planning, arduous labor, and considerable expense in making the improvement.

The kitchen was renovated, rearranged and refurnished, greatly to the convenience and comfort of that important province.

The ventilation of stairways, and thereby the ventilation of adjoining wards, was improved by opening additional outlets at the top of the house.

Repairs throughout the interior and the replacement of worn, by new material, were constant and in accordance with the demands

of good house keeping. Nor were the exteriors forgotten. All tin roofing, guttering, spoutings, wooden cornices, window frames and sashes were painted, adding thereby to the preservation of the property and to its appearance.

Every part of the extensive farm, (about 400 acres,) was looked after. Roads were opened and graded, avenues extended and lawns enlarged, and substantial six wired fencing completed around the property. Every available portion of arable land was cultivated. The yield of vegetables was large, the apple crop was enormous, and the crop of pears and smaller fruits was very good. Some 200 shade and fruit trees were planted.

The new barn and dairy with their clean and convenient accommodations were duly appreciated. I have already reported that there was no typhoid fever among the patients. A portion of this happy circumstance may be due to the fact that the hospital's springs never failed to supply abundant pure drinking water, during the extraordinary season of drought that prevailed most of the year.

Unusual development of oil and gas production in the vicinage of the hospital property, attracted many "prospectors" to it, and the managers entered into a contract with Messrs. Vincent and McDowell, whereby wells will be drilled for the precious fluid and valuable fuel on favorable terms. One well on the northwestern limit of the territory is well under way.

A Training School for Nurses was inaugurated and conducted by the medical staff assisted by physicians from Pittsburgh and Allegheny. The course of lectures that the attendants are privileged to hear is very comprehensive.

The welfare of the patients was our first consideration. The poor people in charge wanted for nothing in the power of the management to provide for them. The majority of them were never better fed, clothed and housed in their lives.

The Executive Committee faithfully continued to visit, inspect and direct the hospital's affairs. The Superintendent and his subordinates have assiduously performed their duties. The thanks of the Board of Managers are due to them, and on its behalf, and my own, I express, and tender sincere acknowledgments.

THE MEDICAL AND SURGICAL DEPARTMENT, IN PITTSBURGH.

At this hospital 2,305 sick and injured people were received and placed under care and treatment during the year. All were serious cases, for the hospital maintains no "out-of-door" department.

The average daily number of patients was 200,—representing 72,732 days of hospital occupancy. The highest number in the hospital at one time was 245, and the lowest number was 175. Of these 1,214 were free patients, 90 were old soldiers, also free, and 1,001 paid in full or in part for their treatment.

The expenditures were :

For maintenance.....	\$ 90,872 29
For extraordinary repairs.....	2,381 47
For interest on debt to the Pennsylvania Railroad Co.	3,000 00
For assessment for a public sewer along Brereton avenue.....	1,519 88
Outstanding warrants of previous year, (representing the debt for maintenance at beginning of the year)	14,172 80
A total of.....	<u>\$ 111,946 44</u>

The receipts from all sources, including the balance on hand at the beginning of the year were.....	\$ 96,614 12
---	--------------

Which sum deducted from the amount of expenditures, leaves an indebtedness for maintenance of.....	\$ 15,332 32
--	--------------

Add to this the money still due the Pennsylvania Railroad Company, loaned the hospital in an emergency in 1885.....	\$ 50,000 00
---	--------------

And the indebtedness of the department at the end of the year was.....	<u>\$ 65,332 32</u>
--	---------------------

The deficit represented by outstanding warrants drawn upon the Treasurer by the Executive Committee, and unissued for lack of funds to pay them, was slightly increased to the extent of \$1,159.50 above the amount reported in my report of 1893-94. Had it not been for the necessary outlay of money for new floors in several wards, for plumbing, and for the sewer tax, there would have resulted a slight reduction of the debt.

The Executive Committee carefully scrutinized the cost of every item of requisition and expense necessary to carry on the hospital, and at the end of the year experienced a keen disappointment. Comment from me in this report is out of place, yet it does seem possible to conduct the establishment on its present income without loss. If I am wrong in my surmise, the only thing that remains to do is to close the doors against the entrance of many suffering fellow beings who come to the thresholds appealing for mercy. I trust however, that the charitably disposed, and the good City of Pittsburgh, will not permit this to occur—will not permit this hospital's noble record for free and open charity to be broken.

The Legislature at its last session, granted the usual appropriation for the maintenance, but again rejected our claim for means to pay the railroad debt. This claim has invariably been recognized by your honorable body as a rightful one, and its payment advocated by you. I believe I placed the status of this indebtedness so clearly before the people's representatives in Harrisburg, in my last report, that it could not have been misunderstood by them. Our Board hoped that this burden which oppresses the hospital would have been lifted by a special appropriation to correct the acts of two Governors in vetoing the measurers for relief voted by two Legislatures in past years. The interest upon this debt has cost the State and the hospital the large sum of \$28,500.

The work done at this hospital is chiefly in the surgical department, and as a rule the patients brought to it are very seriously injured and mangled on the many railroads that center here, and crowd our streets, and in the numerous manufactories and mines that constitute our wealth. To care for such cases requires many attendants, expensive dressings, nourishing food, costly stimulants, and usually necessitates long sojourns in the hospital.

With much labor, and at more than ordinary expense, the building was kept clean and in order. The inconvenience and difficulty experienced in carrying on the housekeeping in the old fashioned and antiquated structure was more and more apparent. The patients, however, have in no case, as far as I know, lacked any attention, comfort or care.

The Training School for Nurses, under the Superintendency of *Miss Caroline J. Milne, was firmly established and successfully conducted. Twenty competent trained nurses received diplomas testifying to their efficiency at the graduating exercises of the second class, on May 28th. At the close of the year the school had 44 pupils on the rolls, 32 of them being women, and 12 men. Miss Milne heartily co-operated with the Executive Committee in its desire to educate and train men as well as women for the vocation of nursing the sick. She readily and successfully solved the problem of the co-education of the sexes in the art, and in her practical judgment and wide experience approved of the scheme, which I believe, is peculiar to our hospital.

Throughout all the vicissitudes of fortune, and change that the hospital has passed during a period of nearly fifty years, it has sustained the first rank among the charitable institutions of the State. The sick and disabled poor, the needy veteran soldier, the needy and dying of every class, without distinction of color or sect, have been treated with the best of medical advice, and the best of surgical skill within its walls.

To repair the inroads of time on the building, which in these years has undergone many remodelings, repairs and repatchings, seemed inexpedient to the Managers. At the meeting of the Board, on December 19th, 1894, the President was requested to appoint a committee of five of its members to present a plan and endorse a project to erect suitable buildings to take the place of those in use. The committee has held meetings from time to time, and in a body visited the Johns Hopkins Hospital in Baltimore, which is regarded as the best example of a modern hospital in the country. Individually, members of the committee have visited other institutions in the "East." The knowledge thus acquired, together with extensive reading and study of the subject of modern hospital architecture, and hospital requirements, have pretty well acquainted the committee with ideas of the kind of improvements which are suitable for our grounds, and which our institution needs, and deserves from, and for, this rich, and populous community.

A large sum of money will be required to consummate this most commendable undertaking. I am glad to report that encouraging re-

* NOTE.—Since the close of the year, Miss Milne tendered her resignation as Superintendent of the Training School at the hospital, to accept a similar position in the Presbyterian Hospital, in Philadelphia. With deep regret the Executive Committee was obliged to part with the service of this good lady, who in every way commanded its confidence and regard.

sponses have been made to the committee's presentation of the matter by several wealthy and public spirited philanthropists. Only a few more like them are needed to justify the beginning of active operations in the coming spring, and which if completed, will result in providing our Institution and Western Pennsylvania, with a medical and surgical hospital, and a school with a department for original research second to none in the country.

The late Mrs. Anna R. Aspinwall, immediately upon learning of our intention, conveyed to the Institution a piece of land consisting of six acres, near her home in the "East End," to be sold, and the proceeds thereof applied towards the erection of the new buildings.

To the Executive Committee, the Physicians and Surgeons of the Staff and Assistants; and to the Superintendent and his aids I tender thanks.

In concluding this portion of my report, I particularly refer you to the Statements of the Treasurer, (duly audited by the Finance Committee.) These statements present the investments of the Trust Funds, and the Endowment Funds, their earnings, and detailed accounts of the receipts and expenditures of all departments of the Institution.

Appended also, is the report of the Committee which has charge of the purchase, and distribution of coal "to the worthy poor of Pittsburgh and vicinity," under the trusts confided to the hospital by Charles Brewer and James Crawford, whose memories are in perpetual remembrance by the recipients of their bounties.

In Memoriam.

JAMES McCANDLESS, a Life Manager, and one of the earliest friends of the hospital, died in Philadelphia on January 28, 1895. He was born in Belfast, Ireland, on May 9th, 1815. At an early age he came to Pittsburgh, and in 1840 became a member of the firm of Gregg & McCandless, which was succeeded by the firm of McCandless, Jamison & Co., He continued with it till its dissolution, after which he retired and moved to Philadelphia. While in Pittsburgh

he was a member of the Executive Committee of the department for the insane, at Dixmont, and by his active participation in its affairs promoted its establishment and subsequent prosperity.

With sorrow I record the recent death of DR. ROBERT M. TINDLE, an elected member of the Board, and a member of the Executive Committee of the Department for the Insane, also. He died in his home in Pittsburgh, on November 15th, 1895, after a long and painful illness. While his health and strength permitted he attended the meetings of the Committee at Dixmont, and was a frequent visitor at other times. Dr. Tindle was born in Pittsburgh, on August 22d, 1830. He was educated at "Old Duquesne College," in Pittsburgh, and graduated in medicine in the University of Pennsylvania in 1851. At the outbreak of the War of the Rebellion, he enlisted in the three months service, and later went out as surgeon of Col. Rippey's, 61st Regiment of Pennsylvania Volunteers. He served till 1864, then resigned to go into professional partnership with the late Dr. Brooks. He married Miss Alice J. Wood in 1867, the daughter of James Wood, one of the wealthiest iron manufacturers of the city. After the birth of several children the doctor had the misfortune to lose by sudden death his most estimable and lovely wife. Left with a family of young children he soon retired from active practice and devoted his life to the rearing of his family. His life was one of remarkable affection for his children and home. He was a genial, kind, agreeable companion and a steadfast friend.

Respectfully submitted on behalf of the Board of Managers,

J. A. HARPER,
President.

December, 1895.

VIEW FROM DIXMONT LOOKING TOWARDS PITTSBURGH, OHIO RIVER.

Report of the Executive Committee

OF THE

Department for the Insane at Dixmont.

TO JOHN A. HARPER, ESQ.,

President Western Pennsylvania Hospital.

DEAR SIR :—During the past year a number of important improvements have been made to the Hospital buildings looking to the additional safety and comfort of the inmates, and we can now report that buildings and grounds are in excellent condition.

It is desired to make some further improvements as soon as funds can be spared for this purpose. We have been annoyed and at times embarrassed by the action of the Auditor General's Department in withholding sums due by the State to the Hospital for the care of indigent patients. I think a definite understanding of this controversy should be had at once. The bills rendered to the State and Counties are only for the exact cost of maintaining their wards and should be paid in full without question.

The Superintendent and his assistants are to be commended for their zeal and faithfulness in the discharge of their duties.

The fact that some of the most robust of the inmates were selected by the State authorities and sent to Wernersville, leaving us a larger proportion than usual of aged and feeble patients, accounts partially, at least, for the proportionately high death rate.

We feel keenly the loss of our associate Dr. R. M. Tindle, who died on the 15th of November last. He was a valuable member of the Committee and a genial companion. We extend our sympathy to his family.

CHAS. C. TOWNSEND,

Chairman Executive Committee.

OHIO RIVER AND NEVILLE ISLAND.—FROM DIXMONT.

REPORT

OF THE

Physician and Superintendent

OF THE

Department for the Insane at Dixmont.

REPORT
OF THE
Physician and Superintendent
OF THE
HOSPITAL FOR THE INSANE AT DIXMONT.

To the President and Board of Managers :—

GENTLEMEN :—Another year has been added to the history of our Institution, and therefore, it becomes my duty to place upon record the operations of the hospital for that period. While I feel the work accomplished may not have been all its officers and friends hoped for, yet, there is the assurance the good at least attained is the result of patient, zealous effort, and a well directed purpose on the part of all connected with the hospital.

Our wards remain crowded far beyond their recognized, as well as comfortable capacity, a majority of the patients are beyond middle life, some are very aged and many have been insane for years. The hospital can no longer be regarded as young, and in view of these facts some allowance must therefore be made for so comparatively few recoveries. The many obstacles, difficulties and disappointments everywhere arising in the successful treatment of insanity and in the management of an institution such as this, are often most disheartening. All promising cases do not recover, and with our existing knowledge of psychology and the advances made in its treatment, one is yet forced to believe this disease, under all conditions, is difficult to cure, and much yet remains to be learned of this abstruse subject.

During the year two hundred and ninety-three patients were admitted, and the grand total of nine hundred and forty-three patients were under treatment.

Sixty-eight patients were discharged as restored, forty-nine as improved, six as unimproved, one as not insane, and seventy-six died. There are remaining in the hospital at this time seven hundred and forty-three patients.

Of those received during the year forty-eight were sent to our care upon request of their friends, one hundred and fifty-seven upon order of the Poor Authorities, seventy-one by order of Court, including one convict from the Western Penitentiary, and seventeen by direction of the State Committee of Lunacy. One hundred and fifty-two were between the ages of thirty and fifty years, or the active business period of life, forty-one were over fifty years of age, twelve over sixty years, eight over seventy years, and two over eighty years old. Only eighty-three could be regarded as Acute cases at the time of their admission. Six had been insane prior to their admission to the hospital for a period of thirty years or longer, eight had been insane for over twenty years, three over fifteen years, nine over ten years, eighteen over five years, while one hundred and four had been insane for periods varying from one to five years.

Many of the patients came to the hospital handcuffed, a number of women were brought to us in charge of male attendants or officers only, while others were received who were very feeble and suffering from various other bodily ills.

Many also were committed to our care after having spent weeks and even months in the jails awaiting the action of the Court in their respective cases, and in the meanwhile receiving anything but suitable care and medical aid.

On the seventeenth of January, five men and twelve women were returned to our care from the Asylum for the Chronic Insane, at Wernersville, Pennsylvania, by order of the Board of Public Charities. These patients were, I believe, no longer regarded as suitable to the requirements of that institution, by reason of their ill health and consequent inability to engage in any form of manual labor. The return of this class of patients serves to increase our already very large number of hopelessly insane, and thus diminish our ratio of recoveries. They have, however, regained their bodily health and are happy and contented, and with but two exceptions have become interested in our many and varied occupations and amusements.

The mortuary report is of more than ordinary interest. Six cases are reported in which death ensued from the exhaustion of the patient following an attack of acute mania, five of these were women, two deaths occurred from the exhaustion of acute melancholia, ten deaths followed exhaustion of chronic mania, four men and four women died from apoplectic seizures, in four patients death resulted from the exhaustion of senile dementia, and in four instances it was the result of the exhaustion of epileptic mania. Eight male patients died from paresis, two patients died from pneumonia, three from valvular heart disease, one from peritonitis, six from Bright's disease. There were thirteen deaths from consumption and most remarkable is the fact, these cases all occurred in the female department. In the remaining cases death resulted from the various causes as shown in the table annexed to this report.

On January ninth, a male patient while out walking upon the grounds, along with some other companions and a nurse, suddenly rushed to the railroad and deliberately laid down upon the track in front of an approaching freight train and was ground to pieces before help could rescue him. The Coroner was at once summoned and after careful inquiry relieved the hospital and its officers from all censure.

Twelve patients were over sixty years of age at the time of their death, eight were over seventy years, and two over eighty years of age. Twenty-seven patients had been residents of the hospital for a period of from one to five years, nine had been under our care from six to twelve years, while four patients had been in the hospital, thirteen, fifteen, eighteen and twenty-three years respectively.

The narration of these facts as thus far presented to your notice in this report is most convincing that many of our patients are not only brought to the hospital as a place of last resort after all other means employed for their restoration have failed, but that many are actually brought here to die. To the close observer the truth of this statement is verified almost daily in his experience and contact with those into whose home and family this dread disease may have entered. The charity of an institution such as this is far reaching, and it is to these cases most particularly that abundant opportunity is afforded whereby the principles which actuate its being are given the widest latitude and scope. To such patients the hospital is their home and they remain here happy and contented.

As in former years, much has been done in the way of recreation and employment of our patients. All who are able are urged upon to engage in some of the many improvements constantly going on in or around the buildings and grounds, under direction of the medical officers and the immediate care of the out-door attendants, but no one is overworked, in fact many ask for employment. To prevent the patients from becoming weary or tired the work is diversified as frequently as possible. The present system of employment of our male patients has now existed a number of years and the result is most beneficial, they enjoy the out-door exercise, have better health, and many owe their entire recovery to this method of treatment alone, and to the exclusion of all other therapeutic measures whatever.

So extensive and well systematized and thorough has been the work thus accomplished, that most of the ordinary labor upon the grounds, the farm, in the garden and various out buildings is now performed by our patients. The cost of our many improvements has been materially lessened by their help. We have added several acres of beautiful lawn to our grounds immediately around the hospital buildings, the roadways have all been placed in excellent repair and several new picturesque drives have been completed extending over the farm property.

The women patients have been engaged in so far as possible in the cares of the house, in sewing and assisting in the laundry. Those of them who did not care to be thus occupied, enjoyed open air exercise either in walking or driving.

Our wards have been bountifully supplied with papers, books, periodicals, games, music, and in addition we have had parties, dances, and many entertainments in our chapel.

The general good health of our large household has been most remarkable, there was but one case of typhoid fever.

Every effort has been put forth by the officers to make all happy and their surroundings comfortable, cosy and homelike.

For eight years past lectures have been given weekly during the winter by the medical staff, to the nurses, assisted by the lecturers of the training school of the medical and surgical department of the hospital, instructing them in the special subject of nursing the insane and caring for the sick.

So gratifying have been the results derived from this course of teaching, that after mature deliberation it was decided to organize a Training School for Nurses, and which was formally opened October first, 1895, in an introductory lecture by the President Mr. John A. Harper. The scope of our lectures has been materially enlarged, and the requirements made obligatory upon all attending this course of instruction cannot fail to be productive of the greatest good in the efficient and thorough service we hope to obtain from those whose care so largely determines the recovery of the patient.

A great deal has been accomplished during the year in the way of improvements to our buildings, particularly so in protecting them from the danger of fire. In two male wards, iron ceilings were put on, while all the dumb waiters and clothes chutes, which were formerly of wooden construction were torn down and rebuilt with brick, and the doors to the same were also lined with tin, as required by the Board of Underwriters. Better ventilation of the hospital was also secured by the opening of additional windows in the main stairways. All the buildings also have been kept in thorough repair as well as painted on the outside.

The report of the Farmer shows this department of the hospital to be in a most satisfactory condition, the farm products more than realized his anticipations, were of excellent quality, and more than sufficient to supply the demands of the household.

The statement of the Treasurer shows in so clear and concise a manner the financial condition of the hospital during the year that it is quite unnecessary for me to further comment upon it at this time.

It is my pleasure to gratefully acknowledge the many kindnesses shown our patients by those whose sympathy and thoughtful care has led them to contribute so generously during the year to their comfort and happiness. These acts but serve to cheer and brighten the lives of those whom fate has seen fit to afflict with one of earth's greatest misfortunes.

To the editors of the many newspapers sent regularly to the Hospital my thanks are due; also for the packages of reading matter including papers, magazines and illustrated weeklies so frequently sent us by Mr. Henry G. Hale, Mr. John M. Chaplin, Mrs. James Gilliland, Colonel William A. Herron, Mrs. Darlington, Mr. James R. Mellon, Mr. T. H. B. McKnight, Rev. Dr. McMillan, the Christian

Endeavor Society of the Bellefield Presbyterian Church, Rev. D. R. Imbrie, Hon. Charles C. Townsend, Mr. John A. Harper, Mrs. John G. Holmes, Messrs. Follansbee, Dr. C. B. King, Mr. Thomas Lane, Miss Euwer, Hon. Henry M. Long, Miss Jessie Black, Messrs. Spang, Chalfant & Co., Miss Mattie Fleming, Mr. T. F. Dennings, Miss Elizabeth Eyster, Mr. Frank Shipman, Mrs. E. T. Yearsley, Mrs. George M. Kunkle, Mr. H. W. Rhodes, Mr. D. L. Gillespie. Mrs. French, and Mrs. S. C. Armstrong.

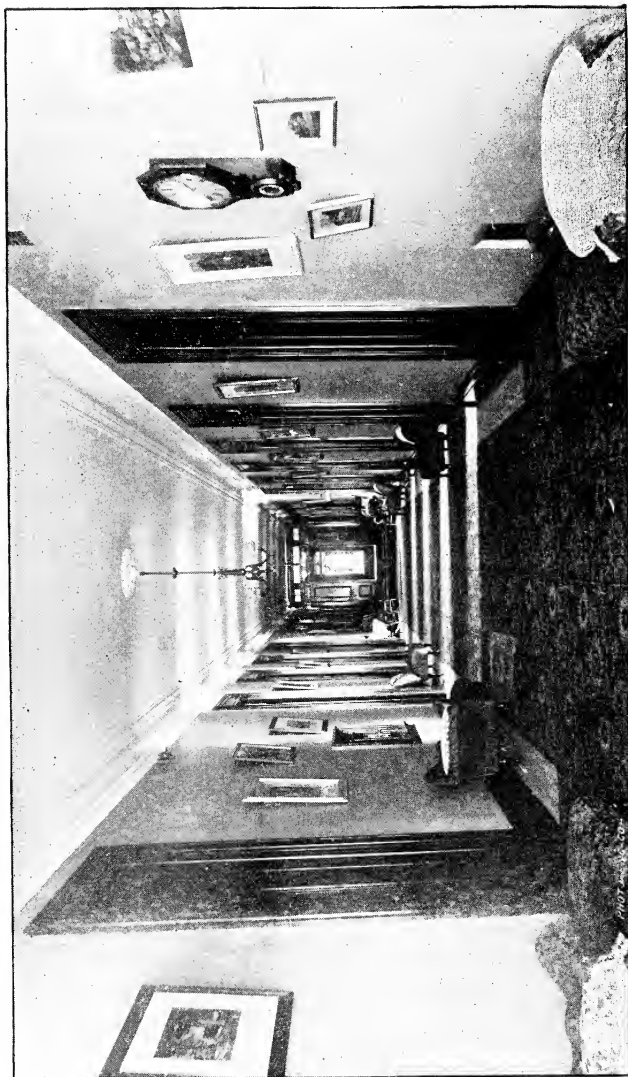

Concerts were given us by the Glee, Banjo and Mandolin Clubs of the Western University, by Dr. Frank Todd and friends, by Miss Edith Batchelor and Mr. Samuel Severance, Jr., by Professor Stevenson and Metropolitan Concert Company, by Professor Louis Zittebart and friends, by Mrs. Addison Courtney, the Misses Courtney and Mr. Stoner, by the Lyric Quartette, by Miss Jean Hamilton and by the young ladies of the Pittsburgh Female Seminary.

Mr. George E. Little gave us a very amusing "Chalk Talk," and to Colonel John A. Danks we are indebted for a thrilling account of the Battle of Gettysburg, Miss Marie Kinbloe, Mr. G. Stuart Brodock and the ladies of Curry Institute and Professor Pray gave a series of dramatic entertainments. The New York Stars under the direction of Mr. Harry Williams, of Pittsburgh, gave us a most excellent variety entertainment.

The regular weekly dances and parties held in the chapel were especially attractive, and we are under many obligations to Mr. George Toerge for the beautiful music furnished on these occasions.

Messrs. Reymer Brothers, Messrs. Dilworth Brothers, and Messrs. Haworth & Dewhurst each sent to the hospital a barrel of candy for Christmas. From the Allegheny County Bible Society we received fifty Bibles for general distribution in the wards. Rev. Mr. Imbrie gave one dozen ornamental trees, and Mr. Wm. Knoderer fifty choice cherry trees.

The officers of the hospital remain the same, and to them I would express my thanks for their, at all times, cordial co-operation with me in the administration of the affairs of the hospital. To the physicians who so kindly assisted us in our lecture course, I am also thankful. I would also express my appreciation of the valued assistance rendered by the nurses, upon whom so largely must depend the success of the hospital.

SECOND WARD.—DIXMONT.

In concluding this report may I thank you gentlemen, the President, and Board of Managers, and members of the Executive Committee whose wise counsel throughout the year has done so much for those confided to our care. Your weekly visits and keen oversight over the interests of the hospital in all its departments has been of untold value to me in carrying on the work of relieving unfortunate and suffering humanity. The prosperity and growth of the hospital under your guidance has been uninterrupted, its aims and responsibilities broadened and may the same kind Providence so freely vouchsafed to us in the past guide us in all our future relations and care for the great interests of this noble monument erected in the cause of the afflicted and distressed

HENRY A. HUTCHINSON.

DIXMONT, PA., October 1, 1895.

BEAVER,	GREENE,	LAWRENCE,	WESTMORELAND,
BUTLER,			

Admission of Patients to Insane Department.

1. Preparatory to the admission of a patient, unless when committed by order of a court, the Superintendent shall be furnished with the certificate of two physicians, who have been in practice for five years or more, that they have separately seen and examined the individual within two weeks of the date of admission, and believe him or her to be insane, and these certificates shall be sworn to before some alderman or judicial officer, with the order of near relative or friend that the patient may be received into the Hospital, with a statement as required by law, and a bond with satisfactory security, for the payment of board and other expenses while in the institution. All private patients thus received shall make a payment of thirteen weeks' board in advance, when brought to the Hospital, no part of which shall be refunded; and if taken away uncured, and against the advice and consent of the physician, in any succeeding quarter, no part of the payment shall be refunded.

2. Whenever a patient is sent to the Hospital by order of the Court, the order or warrant, or a copy thereof, or, if sent by the Directors of Poor, an order sent by the Directors or their agent accompanied by the Certificate of Insanity, as required by law, shall be lodged with the Superintendent of the Hospital.

3. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

4. Each male patient shall be provided with at least three new shirts, a new and substantial coat, vest and pantaloons, three pairs socks, two pairs drawers, two undershirts, a hat or cap, cravat, collars, handkerchiefs, shoes, and one pair of slippers.

5. Each female patient shall have three calico dresses, four chemise, three pairs drawers, three pairs hose, three nightgowns, two flannel skirts, one Balmoral skirt, two muslin skirts, six handkerchiefs, four collars, two pairs shoes, one shawl or cloak, and one hat or hood.

6. It is very desirable that extra and better apparel should be sent with those accustomed to it, that when their health is improved, or when they attend religious worship, walk or ride out, their self-respect may be preserved.

In all cases the patient's best clothing should be sent ; it will be carefully preserved and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, knives, &c., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

All clothing, if not taken away at the time of patient's removal, or within three months afterward, will be disposed of as the officers of the Hospital may think best, and no compensation whatever will be made therefor.

7. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him or her to Hospital, and from whom minute, but often essential particulars may be learned.

8. The price of board, including washing, mending, and attendance for all who are supported at the public charge, is four dollars per week. For private patients, or those supported by themselves, or their friends, the price varies from five to ten dollars, according to the trouble and expenses incurred, and according to their ability to pay. Higher prices are paid by special agreement with the physician, for extra attention and accommodation.

Payments are to be made quarterly, in advance.

9. A bond, with satisfactory sureties, will be required for the payment of the board and expense, and for the removal of the patient when discharged, of all persons, excepting those sent at the expense of the counties or townships.

Those who bring friends should be prepared to give a bond, and, if strangers, furnish evidence of their responsibility.

10. All bills remaining unpaid one month after date of presentation, are placed in the hands of the Solicitor of the Hospital for collection.

11. As the diet of the patient is under the absolute control of the Superintendent, no nuts, candies, cakes or other edibles shall be given to the patients, by their friends or visitors, without his express permission.

12. Visitors are admitted to inspect the institution on any day (except Sunday,) between the hours of 10 A. M. and 12 M., and between 2 and 4 P. M. ; but no visitor shall be admitted to the wards occupied by patients, without express permission from the Superintendent ; and especial care is to be taken that no amount of visiting is permitted that shall prove injurious to the patient. No visitors shall be admitted on holidays.

Visitors will please not intrude on the grounds used by the patients, or give to or receive anything from patients.

13. The Hospital is located eight miles west of Pittsburgh, on the Pittsburgh, Fort Wayne & Chicago Railway, at Dixmont, and can easily be reached by cars, there being ten trains (east and west) each day, except (Sunday,) stopping at the Hospital Station.

14. Applications for the admission of patients, and all communications in regard to the condition, health, bills, &c., of those who are in the Hospital, shall be made to the Superintendent.

15. As Dixmont Station has now an Adams Express office, all goods may be sent to the Hospital direct by express or freight, as may be preferred.

The friends of patients can communicate with the Institution by telegraph and telephone.

Forms of Commitment.

The following forms have been prepared by the Committee on Lunacy, to be used in all cases (except those sent by order of Court) for the commitment of insane patients by their friends or by Directors and Overseers of the Poor, to the Hospital for the Insane at Dixmont, Pa. No such patients will be received unless the forms as given are fully complied with.

.....[SEAL.]

Commitment at Request of Party Interested, after Finding of the Insanity
of the Patient.

THE COMMONWEALTH OF PENNSYLVANIA,

*To the Sheriff of.....County, and to the Western Pennsylv-
ania Hospital:*

[SEAL.]

WHEREAS, at the.....Sessions, 18....., of the Court of.....in and for said County of.....held at....., on theday of.....18....., the same being a Court of record in Western Pennsylvania, and having jurisdiction of offenses that are punishable by imprisonment for the term of ninety days or longer, the petition ofwas presented, applying to our said Court for the commitment to the Western Pennsylvania Hospital of.....alleged by said petitioner to be insane, and resident within the said county of.....

And whereas, on the.....day of.....18...., a jury was called, elected by ballot, duly accompanied and sworn according to law, to inquire into the fact of the insanity of said....., in the manner provided by law ; and said inquest did, upon their several solemn oaths or affirmations respectively find that the said.....is insane :

And whereas, our said Court being satisfied that the said.....is, by reason of such insanity, *unsafe to be at large, or is suffering under unnecessary duress of hardship*, did, on the.....day of.....18..., adjudge and decree that the said.....be committed to the Western Pennsylvania Hospital to be treated according to the rules and regulations of said Institution, and the laws of the Commonwealth, and there be detained until the further order of said Court, or of one of the Judges thereof ; and further, that the expense of the care and maintenance of said....., and of his removal to and from said Hospital shall be paid by the said county.....according to law.

And whereas, it was made to appear to our said Court, that the saidhad, at the time of the finding of said inquest, *a legal settlement in the.....in said county* all of which facts our said Court has given due notice to the constituted authorities having charge of the poor in said.....of.....;

Now, therefore, these are to charge and command you, the said Sheriff, forthwith to convey and deliver into the custody of the Western Pennsylvania Hospital, in the county of Allegheny, in this Commonwealth, the body of said.....and you, the said Western Pennsylvania Hospital, are hereby required to receive the said.....into your custody, care and keeping in the said Hospital, and there to keep *him* safely, to be treated according to the rules and regulations of said Institution and the laws of this Commonwealth in such case made and provided, until the further order of our said Court, or of one of the Judges thereof.

✂ The Committees to choose their own Chairmen and Secretaries.

ANNUAL REPORT
OF THE
MANAGERS
OF THE
Western Pennsylvania Hospital.

*To the Honorable President and
Members of the Board of Public Charities:*

GENTLEMEN:—As the Institution is about entering upon the semi-centennial year of its existence, a brief outline of its history is an appropriate preface to the report for the fiscal year ending September 30, 1896, which I herewith submit, referring to accompanying papers and tables for particulars and details.

HISTORICAL.

The subscribers to a fund for the establishment of a hospital in or near the city of Pittsburgh, held a meeting on March 10, 1847, in the "Odeon" building on Fourth street, (now Fourth avenue.) It was organized by Dr. H. D. Sellers taking the chair, and John Harper and Thomas M. Howe acting as secretaries. The subscriptions amounted to nearly \$30,000,—“a sum sufficient to insure a hospital on a scale creditable to the philanthropy of our city and vicinage,” but it was deemed expedient to increase the subscription fund to at least \$50,000. A committee to report upon a suitable location for the hospital, and another to prepare and submit a form of charter to be obtained from the Legislature were appointed; and before adjourning the following resolution was unanimously adopted:

“RESOLVED, That in establishing a hospital we desire to make it a general one. We disclaim all sectarian preferences, and cordially invite all of every sect and denomination to unite with us in founding one

general hospital which shall be worthy of our city and vicinity and the age in which we live.

On April 10, 1847, the contributors again met at the "Odeon," and at this meeting the Articles of Association submitted by Hon. William Wilkins, were adopted.

The name chosen for the institution was THE WESTERN PENNSYLVANIA HOSPITAL, and it was founded as per the Articles of Association :

"For the reception and relief of lunatics, and the infirm, helpless, and sick poor, as the funds and conditions of the establishment may justify. It shall be an asylum for the afflicted of that class who may be able to become pay patients, and persons receiving accidental injuries may be admitted for the purpose of obtaining surgical aid and relief.

* * * * *

"In deciding upon the admission of patients there shall be no discrimination as to religious denominations, and clergymen shall have access to patients of their persuasion, subject to the general rules in reference to the admission of patients."

* * * * *

"The institution is intended to be a hospital for the relief and cure of disease and wounds and not a permanent asylum for poverty or decrepitude.

* * * * *

"Those whose conditions and diseases render them objects of the charity of the institution may be received from any part of Pennsylvania without preference or partiality."

An election was held and the following Board of Managers was chosen, viz: Messrs. Michael Allen, Thomas Bakewell, John Bissell, Robert Beer, George Breed, Neville B. Craig, Jesse Carothers, R. S. Cassatt, William Ebbs, John Graham, George Hogg, William Holmes, George B. Jackson, S. R. Johnston, Sylvanus Lothrop, James K. Moorhead, Jacob Painter, John H. Shoenberger, William J. Totten, William Wilkins, and W. W. Wallace. Thomas Bakewell was made President, George Breed and John Graham were the first and second Vice-Presidents; and John Harper was elected Secretary and Treasurer.

The form of an Act of Incorporation was submitted and adopted on January 27, 1848, and the same was passed by the Legislature and approved by Governor Frs. R. Shunk, on March 18, 1848. And at the same time the Act to incorporate the *Western Pennsylvania Hospital Society and Pittsburgh Board of Trade* passed 3rd of April,

1837, was repealed, so far as related to the hospital society. (The Western Pennsylvania Hospital Society was never effectually organized, but was finally abandoned.)

Thus the Western Pennsylvania Hospital was founded by an association of public spirited citizens half a century ago, upon such a broad and liberal basis that we, their successors, in this age of progress and toleration cannot extend the objects and purposes of the institution beyond the boundaries forecast by them.

The first annual meeting under the Charter was held in the rooms of the Board of Trade on April 18, 1848. Progress towards the future welfare of the hospital had at this time been instituted, but the site for the building had not been selected. Several valuable properties ranging in price from \$100 to \$2,000 per acre had been offered to the Board; especially were the properties of James Anderson in Manchester (now in Allegheny,) and that of James S. Craft in Oakland (now in Pittsburgh), considered. A portion of the well known "Springfield Farm" was offered upon liberal terms by Harmer Denny, Esq., who upon learning that a favorable opinion of the location was entertained, generously donated a lot of about eleven acres to the Institution. This property adjoined the 9th Ward of the City of Pittsburgh, and was deeded to the hospital by its owner. Subsequently upon being apprised that William Croghan, Esq. desired to make a similar donation of land in the name of Captain and Mrs. Schenley, (his daughter,) Mr. Denny made a proposition to the Board to exchange the lot which he had transferred to the hospital for an adjacent property, somewhat larger in extent, and which adjoined the Croghan tract. The Board availed itself of the proposals, both of which were carried into effect, and the property now owned and occupied by the medical and surgical department of the hospital came into the possession of the institution.

During the year 1849 plans and specifications had been prepared for a hospital building by J. W. Kerr, architect, and the contract for the erection of the same was allotted to J. and A. Patterson for the sum of \$32,653, including the fencing of the grounds. In 1851 the building was finished but water had not been introduced into the house, requisite heating apparatus had not been constructed, nor had the apartments been furnished.

Great efforts were accordingly made to awaken public attention to the importance of providing these requisites for the operation of the

hospital. The ladies of Pittsburgh and Allegheny were appealed to, and they responded by organizing "The Helping Hand Society," the managers of which were appointed a committee to receive subscriptions of money and goods to furnish the house. So effectively did they accomplish their work that comfortable accommodations for fifty patients, and for officers and nurses were provided.

The hospital was opened for the reception of patients in 1853, and began practical work. During the year ended 1854, 172 patients had been under treatment; 26 of these were insane. The following year more insane were received, and the Board was compelled to extend the accommodations for this class of patients. While the hospital was general in its character, the increasing demands for the treatment of the insane gave the Managers much concern, and required an outlay of money beyond the means of the institution. The facts were laid before the Legislature, and a benefaction was granted to construct increased accommodations for the insane. On the 8th of May, 1855, the charter was modified by a supplement, so that the Western Judicial District of the Supreme Court (embracing 21 counties) became a district, whose insane were authorized to be committed to the hospital, and the Governor, Judges of the several Courts of Record, and members of the Legislature were made *ex-officio* visitors. Power was given the Courts to commit to the hospital the criminal insane, to certify to their place of residence and the mode of payment for their care. The constituted authorities having charge of the poor in Western Pennsylvania were made chargeable with the maintenance of their patients, and in the order of admission recent cases had precedence to those of long standing, and the "indigent insane" had precedence to the "rich."

In 1856, Governor Pollock recommended to the Legislature "the establishment of a new and entirely distinct Western Insane Hospital," and in case of that body declining to provide for the construction of one, he asked that an adequate appropriation be made to the Western Pennsylvania Hospital to increase its accommodations for the care of the insane in a manner as distinct as practicable from its other class of patients and inmates.

The original charter provided for keeping separate, and distinct, the insane patients from the other classes of the afflicted where, "experience and general impressions would indicate the measure to be expedient, and conduce to humanity," and, "to the benevolent object in view;" and it empowered the Managers to make the separation,

and erect distinct establishments for the two classes of patients, provided that such a procedure be first approved and sanctioned by the contributors.

Instead of providing for a new insane hospital, as suggested by the Governor, the Legislature further supplemented the charter by authorizing the Governor to annually appoint three Managers on behalf of the State, and appropriated money to aid in "extending and perfecting accommodations for the insane of Western Pennsylvania, conditioned upon the erection of new buildings," &c.

A general meeting of the contributors was therefore called and held on August 6th, 1856. The Board represented that it had become satisfied that cases of insanity could not be successfully treated in a hospital open for the admission of other patients; that another building in a more retired and rural location, and of sufficient extent to admit of the adoption of better remedial means for the care of the insane should be erected, and to which the insane patients remaining in the hospital should be ultimately removed. In this very proper and commendable movement the contributors were largely influenced by the advice of that distinguished lady, Miss Dorothea L. Dix, whose noble life was devoted to improving the condition of her fellow beings bereft of reason.

In 1856, a farm of some 168 acres on the Monongahela river, about where Homestead is now located, was purchased for \$8,400, but owing to its inaccessibility, was subsequently sold without loss, and the proceeds were applied towards the purchase of the "Backhouse Farm," on the Ohio river, in 1858. This locality was visited by Miss Dix and the Managers, and was especially recommended by that lady as peculiarly adapted for the purpose in view. In her honor, that farm and the adjacent tracts subsequently purchased by individual contributors, comprising in all nearly 400 acres, with the railroad station and improvements upon them were named "*Dixmont*."

A plan of buildings was prepared by Dr. Curwin and approved by Governor Pollock, and work proceeded, though the enterprise was discouraged by some timid Managers. However, the majority was hopeful, and aided by Miss Dix's co-operation and the approval of the Legislature, the work undertaken was carried out.

The ceremonies of laying the corner stone of the Department for the Insane at Dixmont, occurred on July 19th, 1859, and in the fall

of 1862, the buildings were ready for the reception of the patients, and they were safely transferred from the hospital in the city to the new establishment. This was accomplished by Dr. Joseph A. Reed, who had been chosen Physician and Superintendent for the Department for the Insane in 1857, and he continued in charge at Dixmont till his death, which occurred in November of 1883, when Dr. H. A. Hutchinson, the present incumbent, succeeded him.

We have now arrived at the dark hours of our national history, and an important epoch in the history of the Medical and Surgical Department of the hospital. After the removal of the insane to Dixmont, only two patients remained in the city building. Wounded, sick and broken soldiers of the Union army returning from the front found poor accommodations in the city, or even in the homes of many of them. The cry of their sufferings appealed to the Managers, and the Board tendered to Mr. Stanton, the Secretary of War, the building and premises for military uses. The Secretary received them with thanks in December of 1862, and after directing extensive repairs and alterations, converted them into a military hospital. During the period of occupancy by the Government, the Board maintained an officer in the hospital to attend to the preservation of its property, and at the same time provide for sick and injured patients as required by its charter. Happy results flowed from this disposition of the property. The records of the War Department show that 2,963 soldiers of the Union army received treatment in the hospital during the war, and when it closed in 1865, the property was returned to the management in fairly good condition.

When repossessed of the property, the Board set about rearranging the hospital by placing it in the immediate charge of an Executive Committee, of which the late Hon. J. K. Moorhead was Chairman. Dr. Cyrus B. King was made "Curator," but he soon resigned the office, though he continued in charge of the medical and surgical patients. There was at this time an organization of individuals in the city who had control of a considerable fund saved from the earnings of the great "Sanitary Fair," which was held in Allegheny during the war. This organization, with the consent of the Board of Managers, established a "Soldier's Home" at the hospital, and provided for a large number of disabled soldiers in a portion of the building, while in other parts of the building, the "sick, injured and infirm" continued under the hospital management.

Later on, the building and opening of National Soldier's Homes throughout the land reduced the number of soldier patients in the hospital, and the discontinuance of the "Home" was determined upon.

The labors of the association had been patriotic, and its integrity as exhibited in the preservation of the funds which had come into its possession was most commendable. It felt that its work was nearly done and to perpetuate the fund, and dedicate it to charitable purposes by unanimous consent transferred the whole, amounting to \$198,383.71, to the hospital for the endowment of the medical and surgical department and especially for the care of all soldiers of Western Pennsylvania requiring treatment under the rules for the admission of patients into the institution.

The "Home" also contributed its furniture and supplies within the building, which were appraised at \$4,735.86. Fifteen gentlemen composing the Board of the "Soldier's Home" were constituted life managers of the hospital, and five of their number in conjunction with a like number of the hospital Board were created an Executive Committee to take charge of the establishment.

The departments of the hospital have done their separate, and distinct work for suffering humanity, under the management of two Executive Committees, which report their acts to the Board of Managers for its approval, and advice in all matters of more than ordinary import. For facility and convenience in transacting the business of the institution the books and accounts are kept at the respective departments, though the general care of the funds belonging to the departments, and to the endowments, and trust funds, are in charge of the Treasurer of the institution.

This history would not be accurate without a record of the death of Thomas Bakewell, its first President, who lived to see the completion and establishment of the great hospital, of which he was a founder. He died in March of 1866, and was succeeded in office by John Harper, a Life Manager, and the Secretary and Treasurer of the hospital at its inception, and for many years afterwards. Mr. Harper, died in April of 1891, and at the next general election the undersigned was honored by promotion to his place in the Board of Management.

Pursuing an established order I will first refer to the

DEPARTMENT FOR THE INSANE AT DIXMONT.

The number of patients in the hospital on September 30, 1896 was 776. The number under treatment during the year was 1,099 and the number of new patients admitted was 356. The average daily number in the hospital was 746½. The highest number in the hospital was 786 the lowest 708. Of the discharged 101 were restored, 129 were improved, 7 unimproved and 86 died. The total number of patients admitted since 1856, was 7,902, and of the discharged 2,261 were restored, 2,142 were improved, 810 were unimproved and 1,913 died.

The number of cures effected was large, taking into consideration the character of patients in general received into the hospital, and its overcrowded condition, nor are the deaths excessive for the same reasons. This overcrowded condition of the hospital, perhaps, need hardly be referred to, as it is a condition not peculiar to Dixmont alone, but I do refer to it again for the purpose of emphasizing the fact of its dangerous and harmful character to the lives and welfare of the patients, and to the great responsibility thrust upon the officers and attendants, which cannot be appreciated by the public or even by the friends of the patients. Into rooms intended for single persons, two and often three persons are forced at night to sleep or not—One homicide, and at least one cruel and serious assault occurred and were reported. They occurred between roommates who were considered quiet and inoffensive persons. In the first case, the homicide, and his victim had roomed together for a year and a half, and the cause of the quarrel was never discovered.

The general health of the patients during the year was good. I ascribe it to the salubrious air and pure drinking water afforded by the location of the hospital, to the good food and clothing provided, as well as to the watchfulness and attention of the physicians in charge.

The hospital maintains its own dairy and supplies the people with pure milk, while the farm is thoroughly cultivated and yields abundance of fruit and vegetables. In cultivating the farm, and laboring upon the roads and grounds, patients are lightly employed in a manner conducive to their pleasure and diversion.

In the way of improvements and repairs I would call your attention to the introduction into the boilerhouse of a Wilson & Snyder Duplex

Pump, to return condensed water from the buildings to the boilers ; the replacing of the worn out and leaky gas tank by a new one, and repairs to the gas purifiers ; the planting of more than two hundred ornamental trees about the property, and some three hundred fruit trees in the orchards ; the piping of a spring in the rear part of the farm to the reservoir spring, which supplies the hospital with its drinking water,—mainly accomplished by the labor of patients ; the stretching of new six-wire fences along roads and about the farm ; thorough repairs to all tin work and tin roofs of buildings ; the laying of new maple floors in the chapel, certain wards and apartments. The Executive Committee also made an advantageous purchase of a gas well, drilled on the farm by the Vincent Company, which, together with the old gas well, supplies the institution with fuel.

By instruction from the Board to provide a new laundry for the department, the Executive Committee proceeded to consider the propriety of adapting to the purpose the large stone building which formerly contained the steam boilers and coal bins. An architect was employed to make plans and specifications to cover the desired improvement, and the work will proceed to execution. This undertaking, which will be an expensive one, is necessary, as the laundry in use is worn and in far from a sanitary condition. Some of the machinery, it is thought, will be utilized in the new building, though considerable new appliances will be required. Nearly sufficient money to complete the work has been provided by the foresight of the Committee, and they see their way to carry out the measures without appealing to the State for aid.

Last April, Dr. John W. Elder, assistant physician, was granted a leave of absence of two months on account of illness, but in July the Committee was compelled to accept his resignation, as there had been no improvement in his condition, and it had become necessary for him to go into another climate to preserve his life. In his place Dr. H. F. McDowell, late of the house staff of the medical and surgical department, was appointed and continues to serve very acceptably. Later in the year, in August, the first assistant physician, Dr. J. Moorhead Murdoch left us to become the Superintendent of the State Institution for Feeble Minded Children, at Polk, Pa. The Committee tendered his position to Dr. William K. Walker, of Philadelphia, the gentleman having formerly been an assistant at Dixmont, and well known to us. He accepted, but desired the privilege of visiting Europe for two months for study and recreation, before entering into the hospital's service. His wish was granted and in the

meantime Dr. Henry H. Doan, of Philadelphia, came to the hospital to assist in looking after the patients.

I am glad to report that no further change in the Hospital staff occurred, and that Dr. Elizabeth C. Mallison continues in charge of the female side of the hospital, and faithfully and efficiently performs her duties.

It is a matter of congratulation that our farmer, Squire William Knoderer, who had long been a sufferer from a painful and dangerous ailment which threatened his life, was, by a skillful surgical operation, relieved, and possibly restored to health and usefulness.

Our sincere thanks are due Dr. Hutchinson, the Superintendent, for his zeal and industry on behalf of the Department over which he presides with distinguished ability.

Every part of the Institution at Dixmont was frequently visited and inspected by members of the Executive Committee, and all the operations of the department were transacted at the hospital. Every visit made by the gentlemen occupied nearly a day's time, and an absence from the city and from their places of business. Without their interest and co-operation in managing the affairs of the hospital, my services would have been of no avail, and I feel under deep obligations to them for enabling me to perform at all the duties of the office which I have the honor to hold.

THE MEDICAL AND SURGICAL DEPARTMENT

IN PITTSBURGH.

The number of sick and injured persons received into the hospital and placed under treatment during the past year was 2,339. Of this number 1,109 paid in full or in part; 1,089 were charity patients, or paid nothing, and 141 were soldiers. The average daily number was 182.42, representing 65,886 days of hospital occupancy. The highest number in the hospital at one time was 235, and the lowest number was 135. The cost of maintenance was \$84,977.16, being \$1.30 $\frac{47}{100}$ per day per patient. The amount of expenditures was \$90,306.06. The debt of the hospital at the end of the year, as represented by warrants drawn by the Executive Committee upon the Treasurer, and not issued, \$22,253.18 but in as much as the payment from the State "on account of maintenance" for the last quarter was received immediately after the books were closed for the year, the amount of it, viz. 9,169.71

may be deducted from the outstanding warrants, leaving the debt for maintenance for the year reduced to	\$13,083.47
Add, the debt due the Pennsylvania Railroad Company, representing money generously advanced to the hospital in 1885 to pay for maintenance in previous years,	<u>50,000.00</u>
and the actual indebtedness of the department at the end of the past year was	- - - - - \$63,083.47

The Board, with your approval, will ask the Legislature at its next biennial session, for a continuance of the usual grant of \$90,000 for maintenance, for the succeeding two years; and for a special appropriation of \$50,000, or at least a portion thereof, to lift or reduce the debt due the Pennsylvania Railroad Company, which for years, like a horrible *incubus* has clung on the shoulders of the hospital, and has cost the State \$31,500 for interest. (The interest on this loan, being of course part of the cost of maintaining the hospital and preserving its property, is paid each year in June and December, out of funds derived from the State.)

The bequests and donations received during the year were, \$ 7,235.90 to which amount I add another payment received on account of the residuary estate of the late Miss Jane Holmes, of Pittsburgh, and which came into the treasury a few days after the books were closed, - - - 7,500.00

Increasing the total to - - - \$14,735.90

Included in the receipts was a bequest of \$1,000 received from the executor of the estate of Mrs. Eliza J. Duncan, for the support of a cot in the hospital, in memory of her little daughter, Bessie Foster Duncan. The bequests were promptly invested by direction of the Finance Committee, and will appear in the detailed statement of the investments of the Endowment Fund furnished by the Treasurer. There will also appear in the Treasurer's report an acknowledgment of the receipt of \$300 from the Misses Julia and Maggie Nelson, of Allegheny, being one year's interest on \$5,000.00, which principal these good ladies propose to transfer to the hospital hereafter, for the perpetual endowment of a bed in memory of their parents, William Nelson and Caroline, his wife. And in the same report, will be seen an acknowledgment of \$1,205, the proceeds of the annual benefit given in the Alvin Theatre, in February, by members of the theatrical profession, for the support of two rooms for actors and actresses, respectively, who happen to need hospital care

and treatment. These rooms are very comfortable ones, and are occupied much of the time by sick or injured players wherein they receive the best of medical or surgical treatment.

In April, Mr. W. A. Cowan, the Superintendent, tendered his resignation, to take effect on July 15th. It was accepted, and Mr. M. J. House was elected to take his place, and assumed the duties of the office on July 1st. The new Superintendent came to us highly recommended for his executive ability and business capacity. It is not too much, to expect of him a better administration of the hospital's affairs, and a considerable reduction in its running expenses.

The Training School for Nurses is now an integral part of the hospital. There are on its rolls the names of 48 nurses, exclusive of the Superintendent, to-wit: 1 night superintendent, 4 head nurses, 30 nurses in course of training, and 13 probationers. The Commencement exercises were held in June, at which time 14 women and 7 men were graduated and received diplomas. Miss Katherine Emory, the Superintendent of the School, resigned on September 1st to accept the Superintendency of the Training School in the West Philadelphia Hospital for women; whereupon, Miss Emma Church, the head night nurse at the hospital, and a graduate of our Class of '95, was promptly promoted to the position. The appointment has already proved to be a happy one, and we trust will be of lasting good to the school.

For several years past only such repairs as were absolutely necessary have been done at the hospital, as all the income was required for the maintenance of the establishment, and for the reduction of accumulated indebtedness. Many parts which required attention were consequently neglected for the time being, till at length in the opinion of the Executive Committee certain essential improvements in the sanitary arrangements, in the laundry and its machinery, in the gas fitting and steam heating apparatus, etc., could no longer be postponed. Knowing that the sum required to pay for these things would be large, the matter was laid before the Board of Managers, and an appeal made to them, and to friends for contributions towards the especial objects in contemplation. Assured that liberal responses would follow, the work needed was ordered and will be completed before the cold weather sets in.

These betterments to the old building by no means indicate an abandonment of the project for erecting a new and modern hospital of greater capacity and requirements; the Managers have had special

meetings to confer with the new-building committee, and to deliberate upon measures looking towards that accomplishment. Several eminent architects have kindly aided by contributing suggestive plans for buildings, grouped to conform to the topography of the grounds, and they have been duly considered, and as well has the very important financial aspect of the question been taken into consideration; but now I can only "report progress" towards the needs and aspirations of the Institution.

No more intricate problem can be submitted to an architect than to design a modern hospital; nor can a more perplexing scheme come before a board of governors for approval and adoption. Great changes in the principles of hospital construction, equipment and arrangements are now demanded; even the purposes of such establishments are enlarged and extended. The hospital for the present time, and for the future, must be an educational establishment in which diseases will be studied, as well as treated, and surgery perfected as well as practiced. Therefore the cost, and extent, of a modern hospital is far beyond the estimate that any person is likely to make, who has not given the subject very careful investigation. Appreciating these facts it seemed almost impossible to acquire by a general subscription sufficient money to rebuild, and substitute for the hospital in use, another worthy of the institution and this rich and growing community. Another plan was tried, and it met with such favor that several persons have agreed to furnish the means to erect as "memorials" parts of the group of buildings that go to form a "Pavillion Hospital," such an one as was suggested by each of the architects. Though these subscriptions, or rather promises were very liberal, there were not enough of them, and they did not aggregate sufficient to enable the Managers to fix upon a definite plan of hospital, nor justify them in proceeding with actual work.

I cannot close my report without gratefully acknowledging the services rendered this branch of the Institution by the Chairman and members of the Executive Committee, and testifying to their fidelity and painstaking labors in its interest, and in the welfare of the patients.

In like manner I desire to thank the gentlemen composing the Medical and Surgical Staffs and all their assistants.

ENDOWMENT AND TRUST FUNDS.

THE ENDOWMENT FUNDS consist of investments amounting \$23,000 belonging to the Department for the Insane at Dixmont, the earnings of which are applied each year for the purchase of seeds, plants, flowers and shrubbery, for the conservatory, and the adornment of the grounds.

And investments aggregating \$312,616.67, belonging to the Medical and Surgical Department, the earnings of which annually go towards the support of patients and general maintenance.

THE TRUST FUNDS are the Brewer Fuel Fund of \$77,367.30 and the Crawford Fuel Fund of \$15,000. Both funds are kept invested in good securities, and their earnings buy coal for the "worthy poor" of Pittsburgh and vicinity. The coal is contracted for each year by a Committee of the Managers and distributed as judiciously as possible by the individual members of the Committee throughout districts assigned to each.

46,750 bushels of coal were distributed last year.

In Memoriam.

I record with regret the deaths of Mr. John H. McKelvy and Captain Charles W. Batchelor, of the Board of Managers, and Dr. James B. Murdoch, of the Medical and Surgical Staff.

MR. JOHN H. MCKELVY, was born in Pittsburgh on August 2d, 1837, and died in the city on May 13th, 1896. He was prominent in mercantile, manufacturing, and financial circles, widely known, and highly esteemed. He was a member of the Executive Committee of the Medical and Surgical Department of the hospital, and took a deep interest in its affairs, bringing to the discharge of his duty on the committee, the rare qualities which distinguished him as one of our foremost, and successful business men.

CAPTAIN CHARLES W. BATCHELOR, was born in Steubenville, Ohio, in the month of September, 1823, and after a brief illness died at his home in this city on June 29th last. Between the years 1841

and 1855, he was intimately connected with navigation interests on the Ohio and Mississippi Rivers. In 1861 he was appointed by President Lincoln Surveyor of the Port of Pittsburgh, and placed in charge of the United States Depository. While this was the only political office the Captain ever held, he was for many years identified with nearly every public movement in the city. He became a Life Manager of the hospital through his connection with the great Sanitary Fair held during the late war, and was one of the association which transferred the balance of the "Sanitary Fair Fund," to the hospital, as a permanent Endowment Fund. He was a broad-minded, genial, companionable gentleman. His heart was ever open to appeals of charity, and was as tender as a woman's. His departure was an irreparable loss to many friends who hold his memory in grateful and loving esteem.

DR. JAMES B. MURDOCH was a native of Glasgow, Scotland. He graduated at the College of Physicians, and Surgeons, in New York; served as a surgeon during the war, and practiced his profession in Oswego, N. Y., before coming to Pittsburgh. He was appointed upon the Medical and Surgical Staff of the hospital in 1872, and until his fatal illness was active, sincere, and diligent, in performing his duties. We regarded him as a surgeon of distinguished ability, and skill, valued him as a friend, and honored him as a gentleman.

Respectfully submitted,

November, 1896.

JOHN A. HARPER,

President.

REPORT

OF THE

Physician and Superintendent

OF THE

Department for the Insane at Dixmont.

REPORT
OF THE
Physician and Superintendent
OF THE
HOSPITAL FOR THE INSANE AT DIXMONT,

To the President and Board of Managers:—

GENTLEMEN :—I appreciate the honor I have in presenting for your consideration and approval the annual report of this department of the Hospital for the fiscal year ending September 30th, 1896. In the subjoined statistical tables and reports of departments will be found the movement of our population, the admissions, recoveries, discharges and deaths and many other interesting facts relating to the care of the insane and the management of an institution of this character.

Again I would direct your attention to the very greatly overcrowded condition of our hospital, which has now assumed such proportions as to be a menace to its welfare and safety. Our wards are all crowded and it is impossible to longer afford our patients the individual care many of them actually demand for their happiness and restoration. Indeed, I fear the Hospital is losing much of its home-like character that endears it to those who have sought its care and protection, and those of our aged patients to whom it is their only home. Owing to the closing of the doors of some of the other hospitals in the State, we have recently been compelled to receive patients who were non-residents of this district. In many instances the friends of private patients have been denied admission and advised to commit them to other institutions less crowded, and where they could receive the treatment their case required.

It is now almost fifty years since the promoters of the Western Pennsylvania Hospital first met to decide upon the formal opening of this institution, destined to assume a prominent place among the great

charities of our State, and in the report made to your Honorable Board at the following annual meeting but twenty-six patients were resident of the then existent Insane Department. Since that time the department for the insane alone has received seven thousand nine hundred and two patients, of whom but two thousand two hundred and sixty-one were restored.

With the increasing crowded state of the Hospital, from year to year, the now large number of aged and feeble patients under its care, the constantly increasing number of those incurably insane, the Hospital is no longer able to accomplish those high purposes for which it was designed by its founders, who cherished the hope of making it a hospital rather than an asylum.

It is a matter of congratulation, however, that the good work done in a hospital cannot be accurately measured by the statistics presented or the percentages derived therefrom. To those who have the responsibility of caring for so large a number of our fellow-beings bereft of reason, hospital life presents many bright and cheering assurances of the comfort and happiness the kindly relations of the physicians and the sympathetic ministrations of the nurse can give to those whose lives are saddened by gloom and misfortune and to whom the hospital is the only hope for restoration or whatever of pleasure there may be in store for them.

To hear the expressions of gratitude and appreciation of the convalescent whose recovery is assured, after it may be months of despondency, is a pleasure known only to those in daily association with the insane.

At the beginning of the present year, seven hundred and forty-three patients occupied our wards, while three hundred and fifty-six were admitted, making a total of one thousand and ninety-nine patients under custodial care and treatment, the largest number in the institution's history.

Of those there were discharged, one hundred and one as restored, one hundred and twenty-nine as improved, seven as unimproved, and eight-six died, leaving at the close of the year seven hundred and seventy-six, again the highest number recorded in our annual report.

Of those received during the year forty-seven were private cases and committed upon request of their friends, one hundred and ninety-

six were committed by the various authorities of the Poor, eighty-eight by order of the Courts, and twenty-five upon an order of transfer issued by the State Committee of Lunacy of the Board of Public Charities. One hundred and ninety-eight were born in this country of whom one hundred and sixty-five were natives of Pennsylvania, fifty-eight were foreigners, and the nativity of ninety-one is unknown. Thirteen were under twenty years of age, seventy-nine were under thirty years, while one hundred and thirty-five were between the ages of thirty and forty years, seventy-two were less than fifty years old, and thirty-four were less than sixty years old, twenty-one were aged from sixty to eighty years and two male patients were admitted over eighty years old.

As in former years many were brought to the Hospital hand-cuffed and presenting evidence of abusive and rough treatment. A number of female patients were sent to our care in the custody of male attendants only, while others were committed, whose untidy condition was a shame and reproach upon the authorities having them in charge. Three male patients were received from the Western Penitentiary, making at the present time twenty-five insane criminals in our care.

Twenty-three patients were returned to the Hospital from the Asylum for the Chronic Insane, at Wernersville, Penn'a.

Of those admitted also, but one hundred and eight could be regarded as acute cases; of the remainder many have been insane for periods varying from two years to thirty years and over. Two hundred and ninety-eight patients were suffering from the initial attack of mental disease while in only fourteen cases was it their second attack. Four patients were admitted as having been insane for the third time, in two patients the disease had returned the fifth time, and in one female patient it was the eleventh admission after having previously made a good recovery in this Hospital following each former attack.

Referring to the statistics showing the causes of death for the year, it will again be found the dread disease consumption caused more deaths than any other malady—fourteen in number. Ten patients died from that other incurable disease so frequently encountered in hospitals—paresis. Eight patients died from the exhaustion following epileptic mania. Eight patients died from the exhaustion of chronic mania, five deaths from acute mania, four deaths followed an

attack of acute melancholia, and three patients died from the exhaustion of chronic melancholia. Seven deaths resulted from dysentery. In the remaining number of cases death resulted from the various diseases as shown in the mortuary report. Almost at the very close of the year a sad accident occurred to mar and disturb the quietude of our Hospital, an old and feeble patient was assaulted by his roommate, a paretic, and so abused that he died the next morning. The friends of the patients were notified, as also the coroner, who, after hearing the evidence, returned a verdict exonerating the officers of the Hospital from all censure. The occurrence of this fatality, while most distressing to every one, is one of those unfortunate affairs incident to hospital life, and more particularly so while the wards are so crowded, that a single sleeping apartment is shared by two and even more patients and we should be most thankful under the circumstances this accident does not occur oftener.

During the year, sixty-four male and fourteen female patients were discharged from the Hospital and sent to the Asylum for Chronic Insane, at Wernersville, Pennsylvania, by order of the Committee of Lunacy of the Board of Public Charities.

The health of the patients throughout the year has been good, owing in large measure to so many of them being out of doors every day. Diphtheria made its unwelcome appearance in three of our male attendants, but the cases were promptly recognized and isolated at once, and all made a good recovery with no further outbreak of the disease. Two or three mild cases of typhoid fever also occurred. The importance of making the Hospital homelike and attractive, the removal of all appearance of restraint and yet preserving discipline and quiet order, is a feature in the care of the insane the consideration of which should receive the most thoughtful attention of those having them in charge. The wisdom of engaging patients in some out-door occupation is now universally appreciated. It is superior to medicine or amusements in the promotion of their health and happiness. Many patients owe their recovery alone to this simple yet most effective measure and to others, whose malady may be an incurable one, their residence at the Hospital is made cheerful in their improved condition and contentment and the interest taken by them in their varied occupations. Where prudent and practicable therefore, the men patients were urged during the year to take part in our improvements and repairs and, under the supervision of the nurses, much of the work upon the farm and garden, and of the lawns and driveways was accomplished. The female patients were also engaged in the

laundry department and in household duties, sewing, etc., and all were kept in the open air in so far as possible. Their evenings were occupied in various entertainments given in our amusement hall, such as concerts, plays, lectures and parties. The wards were supplied with current reading matter, games, and a large number of books were purchased for our libraries. Many of the patients with their attendants were permitted to visit the city, the theatres, and other amusements, and on Sunday a number of them attended our neighboring churches.

A word may be said at this time in regard to the medical service in addition to the moral and hygienic measures already alluded to. It has been thorough and the physicians have been most observant in prescribing all needed medical aid. All the insane are diseased, not only mentally, but their physical health also is impaired and all require a physician's care, and with the efficient services of our nurses, many of whom have been with us a long time, I feel the patients have received every attention that thoughtful men and women could bestow.

During the year the Hospital was visited officially by members of the Board of Charities and by other public spirited and philanthropic citizens interested in this department of charitable work. Over four thousand people also visited the wards, many of whom came to see their friends.

Recognizing the necessity of certain changes and improvements owing to constantly increasing demands upon some of the departments of the Hospital, the Executive Committee directed that at the gas house, the retorts be rebuilt and the old gas holder replaced by a new and much larger one. A duplex return pump was placed in the boiler house. New hardwood floors were laid in our chapel and in one of our male wards. The outbuildings were painted and placed in thorough repair, as well as making as many minor improvements as were required.

The financial condition of the Hospital is fully set forth in the Treasurer's statement, and further comment from me is quite unnecessary. The farm and dairy products were fully up to those of former years and we enjoyed an abundance of vegetables and fruits of excellent quality. The beautiful appearance of the farm, its productiveness and order, its well kept roads and fences, are a credit to the Hospital and to our farmer.

The tedium of hospital life has been brightened and our long winter evenings passed most pleasantly by the many friends of the Hospital, who have so kindly contributed reading material, by those who have given concerts, lectures, and various other amusements. These entertainments have all been of a high order of merit and were thoroughly enjoyed and appreciated.

A number of changes have taken place in the medical staff since the last annual report. On account of failing health, Dr. John Wilson Elder, upon his return after a prolonged vacation, resigned July 1st, and the vacancy was filled by the temporary appointment of Dr. Harry F. McDowell, of Pittsburgh, who was elected to the position of Second Medical Assistant, September 10th.

By his devotion and earnestness in the discharge of his duties, his sympathetic care for his patients and his high attainments as a gentleman and physician, Dr. Elder won the esteem and friendship of all, and he left the Hospital with sincere regret and best wishes for his early restoration to health.

Dr. J. Moorhead Murdoch, the First Medical Assistant, resigned September 1st, to accept the Superintendency of the Institution for the Feeble-Minded, at Polk, Pennsylvania, and was succeeded upon the staff by the appointment of Dr. William K. Walker, of Philadelphia, September 10th.

In the promotion of Dr. Murdoch, the Hospital lost an efficient officer and I congratulate his Board upon their wise selection. By a resolution of the Executive Committee it was decided to aid the medical work of the Hospital by the appointment of a pathologist, this position was given to Dr. Henry H. Doan, of Philadelphia, who reported for duty the beginning of September.

To Dr. Walker, Dr. McDowell, Dr. Doan, and Dr. Mallison, I express my appreciation of their ability and zeal in the performance of their duties and also for their uniform kindness and assistance to me.

To Miss Hope, our faithful Supervisoress of the women's wards for so many years, and her assistant, Miss Elizabeth Scott, to Mr. Alexander W. Morrow, Supervisor of the men's department, to Miss Martha F. Black, our Housekeeper, Mr. Robert K. Allen, Clerk, and Mr. James H. Mann, Purchasing Agent, I also desire to express to your Board my feeling of gratitude for their kindly and efficient management of their respective departments. Mr. Wm. Knoderer

still holds the very responsible position of farmer, Mr. Gray that of engineer, Mr. George M. Kunkle, second engineer, and Miss McCrumb, laundress, each of whom I would at this time thank most earnestly for their painstaking care and competent manner in which they have conducted the affairs of the Hospital entrusted to their care and keeping. I also acknowledge my obligations to the attendants and nurses whose efforts have contributed toward the success attained during the past year.

In concluding my annual report for the year 1896, I may say it has been a progressive one characterized by earnest endeavor and harmony upon the part of the officers to promote the interests of the Hospital, and to you, Mr. President and Gentlemen of the Board of Managers and Members of the Executive Committee I am under renewed obligations for your official, as well as at all times, personal and individual counsel and advice in the administration of its affairs. Commending the Hospital into the care of an All-wise Providence for the coming year, I close this report.

HENRY A. HUTCHINSON.

DIXMONT, PA., *October 1st*, 1896.

BEAVER,	GREENE,	LAWRENCE,	WESTMORELAND,
BUTLER.			

Admission of Patients to Insane Department.

1. Preparatory to the admission of a patient, unless when committed by order of a court, the Superintendent shall be furnished with the certificate of two physicians, who have been in practice for five years or more, that they have separately seen and examined the individual within two weeks of the date of admission, and believe him or her to be insane, and these certificates shall be sworn to before some alderman or judicial officer, (the oath before a notary public is illegal) with the order of near relative or friend that the patient may be received into the Hospital, with a statement as required by law, and a bond with satisfactory security, for the payment of board and other expenses while in the institution. All private patients thus received shall make a payment of thirteen weeks' board in advance, when brought to the Hospital, no part of which shall be refunded; and if taken away uncured, and against the advice and consent of the physician, in any succeeding quarter, no part of the payment shall be refunded.

2. Whenever a patient is sent to the Hospital by order of the Court, the order or warrant, or a copy thereof, or, if sent by the Directors of Poor, an order sent by the Directors or their agent accompanied by the Certificate of Insanity, as required by law, shall be lodged with the Superintendent of the Hospital.

3. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

4. Each male patient shall be provided with at least three new shirts, a new and substantial coat, vest and pantaloons, three pairs socks, two pairs drawers, two undershirts, a hat or cap, cravat, collars, handkerchiefs, shoes, and one pair of slippers.

5. Each female patient shall have three calico dresses, four chemises, three pairs drawers, three pairs hose, three nightgowns, two flannel skirts, one Balmoral skirt, two muslin skirts, six handkerchiefs, four collars, two pairs shoes, one shawl or cloak, and one hat or hood.

6. It is very desirable that extra and better apparel should be sent with those accustomed to it, that when their health is improved, or when they attend religious worship, walk or ride out, their self-respect may be preserved.

In all cases the patient's best clothing should be sent; it will be carefully preserved and only used when deemed necessary for the purpose above mentioned.

Jewelry, and all superfluous articles of dress, knives, &c., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

All clothing, if not taken away at the time of patient's removal, or within three months afterward, will be disposed of as the officers of the Hospital may think best, and no compensation whatever will be made therefor.

7. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him or her to the Hospital, and from whom minute, but often essential particulars may be learned. All women patients must be accompanied to the Hospital by some female friend as required by law.

8. The price of board, including washing, mending, and attendance for all who are supported at the public charge, is \$3 75 per week. For private patients, or those supported by themselves, or their friends, the price varies from five to ten dollars, according to the trouble and expense incurred, and according to their ability to pay. Higher prices are paid by special agreement with the physician, for extra attention and accommodation.

Payments are to be made quarterly, in advance.

9. A bond, with satisfactory sureties, will be required for the payment of the board and expenses, for the removal of the patient when discharged, of all persons, excepting those sent at the expense of the counties or townships.

Those who bring friends should be prepared to give a bond, and, if strangers, furnish evidence of their responsibility.

10. All bills remaining unpaid one month after date of presentation, are placed in the hands of the Solicitor of the Hospital for collection.

11. As the diet of the patients is under the absolute control of the Superintendent, no nuts, candies, cakes or other edibles shall be given to the patients, by their friends or visitors, without his express permission.

12. Visitors are admitted to inspect the Institution on any day (except Sunday,) between the hours of 10 A. M. and 12 M., and between 2 and 4 P. M.; but no visitor shall be admitted to the wards occupied by patients, without express permission from the Superintendent; and especial care is to be taken that no amount of visiting is permitted that shall prove injurious to the patient. No visitors shall be admitted on holidays.

Visitors will please not intrude on the grounds used by the patients, or give to or receive anything from patients.

13. The Hospital is located eight miles west of Pittsburgh, on the Pittsburgh, Fort Wayne & Chicago Railway, at Dixmont, and can easily be reached by cars, there being ten trains (east and west) each day, (except Sunday,) stopping at the Hospital Station.

14. Applications for the admission of patients, and all communications in regard to the condition, health, bills, &c., of those who are in the Hospital, shall be made to the Superintendent.

15. As Dixmont Station has now an Adams Express Office, all goods may be sent to the Hospital direct by express or freight, as may be preferred.

16. The friends of patients can communicate with the Institution by telegraph and telephone.

Forms of Commitment.

The following forms have been prepared by the Committee on Lunacy, to be used in all cases (except those sent by order of Court) for the commitment of insane patients by their friends or by Directors and Overseers of the Poor, to the Hospital for the Insane, at Dixmont, Pa. No such patients will be received unless the forms as given are fully complied with.

Order for the Reception of a Patient.

Bond for Private Patients.

Know all Men by these Presents, that we,.....of
in the county of.....and
 State of Pennsylvania, are held and firmly bound unto the WESTERN
 PENNSYLVANIA HOSPITAL, its successors or assigns, in the sum of One
 Thousand Dollars, for the payment of which we jointly and severally
 bind ourselves, our heirs, executors and administrators, firmly by these
 presents : (And.....do hereby empower.....or
 any attorney of any Court of Record within the United States or else-
 where to appear for....., and after one or more declarations
 filed, to confess judgment or judgments against.....in favor of
 the WESTERN PENNSYLVANIA HOSPITAL, as of any term for the above
 penalty, with costs of said suit, and attorney's commission for collection,
 viz : Five per cent. in case payment has to be enforced by process of
 law ; hereby waiving inquisition and condemnation of any property
 that may be levied upon by virtue of any execution, which execution
 may issue forthwith, on failure to comply with any of the conditions
 thereof, and hereby waiving the right of exemption from levy and sale
 of any and all property that now is, or hereafter may be, exempted from
 levy and sale, under any Act of Assembly for such purpose, and with
 release of all errors, &c. And it is further agreed and provided that
 execution and alias, and pluries executions may issue at any time, and
 from time to time, and as often any amount shall be due and owing
 to said WESTERN PENNSYLVANIA HOSPITAL, and that the books of
 said Hospital shall be evidence, and a liquidation of the amount to be
 collected on said executions.

Witness.....hand and seal.....the.....day of.....in
 the year of our Lord One Thousand Eight Hundred and

Whereas....., of....., in the County
, and who is insane, has been admitted as a patient
 WESTERN PENNSYLVANIA HOSPITAL, at Dixmont, Pa.

Now, therefore, the condition of the obligation is, That if the said
 obligors shall pay to the said WESTERN PENNSYLVANIA HOSPITAL, its
 successors or assigns, the sum of.....Dollars and.....
 Cents per week, for the Board of said patient, so long as.....shall

continue in said Hospital, with such extra charge as may be occasioned by.....requiring more than ordinary care and attention, and shall provide for.....suitable clothing ; and shall pay for all such necessary articles of clothing as shall be procured for..... by the said Hospital ; and shall remove.....from the said Hospital whenever required to do so by the Superintendent, and if the said obligors shall also pay, not exceeding Fifty Dollars for all damages the said patient may do to the furniture, or other property of the Hospital, in any one quarter, and for reasonable charges in case of.....death ; and in case the said patient shall be removed from said Hospital by, or at the request of us, or either of us, or by any other person or persons, before the expiration of three calendar months after.....reception, then if the said obligors shall pay the board of said patient for thirteen weeks, and all other charges on the books of said Hospital, all payments for board and clothing to be made in advance, quarterly, on the fifteenth day of March, June, September and December in each year, and at the time of removal, with interest on each bill from and after the time it becomes due—then this obligation to be void, otherwise to remain in full force and virtue.

Signe I, sealed and delivered in presence of us.

.....[SEAL.]

Commitment at Request of Party Interested, after Finding of the Insanity
of the Patient.

THE COMMONWEALTH OF PENNSYLVANIA,

[SEAL.] *To the Sheriff.....County, and to the Western Pennsylv-
ania Hospital:*

WHEREAS, at the.....Sessions, 18....., of the Court of.....in and for said County of.....held at....., on theday of.....18....., the same being a Court of record in Western Pennsylvania, and having jurisdiction of offenses that are punishable by imprisonment for the term of ninety days or longer, the petition ofwas presented, applying to our said Court for the commitment to the Western Pennsylvania Hospital of.....alleged by said petitioner to be insane, and resident within the said county of.....

And whereas, on the.....day of.....18 .., a jury was called, elected by ballot, duly accompanied and sworn according to law, to inquire into the fact of the insanity of said....., in the manner provided by law ; and said inquest did. upon their several solemn oaths or affirmations respectively find that the said.....is insane :

And whereas, our said Court being satisfied that the said....., by reason of such insanity, *unsafe to be at large, or is suffering under unnecessary duress of hardship*, did, on the.....day of.....18....., adjudge and decree that the said.....be committed to the Western Pennsylvania Hospital to be treated according to the rules and regulations of said Institution, and the laws of the Commonwealth, and there be detained until the further order of said Court, or of one of the Judges thereof; and further, that the expense of the care and maintenance of said....., and of his removal to and from said Hospital shall be paid by the said county.....according to law.

And whereas, it was made to appear to our said Court, that the saidhad, at the time of the finding of said inquest, *a legal settlement in the.....in said county* all of which facts our said Court has given due notice to the constituted authorities having charge of the poor in said.....of.....;

Now, therefore, these are to charge and command you, the said Sheriff, forthwith to convey and deliver into the custody of the Western Pennsylvania Hospital, in the county of Allegheny, in this Commonwealth, the body of said.....and you, the said Western Pennsylvania Hospital, are hereby required to receive the said.....into your custody, care and keeping in the said Hospital, and there to keep *him* safely, to be treated according to the rules and regulations of said Institution and the laws of this Commonwealth in such case made and provided, until the further order of our said Court, or of one of the Judges thereof.

Witness the Honorable....., the President Judge of our said Court, this.....day of..... A. D. 18.....

ANNUAL REPORT

OF THE

MANAGERS

OF THE

Western Pennsylvania Hospital.

To the Honorable President and

Members of the Board of Public Charities:

GENTLEMEN:—I herewith submit a statement of the affairs of the Western Pennsylvania Hospital for the fiscal year ended September 30, 1897, and beg to refer you to the accompanying reports of officers and statistical tables for details.

A marked event in the history of the Institution occurred on the evening of Tuesday, April 20, 1897, when the semi-centennial of its founding was observed. In my report of last year a concise history of the Hospital was incorporated, and I direct your attention to it rather than repeat myself on the occasion. The Hospital therefore, having passed its fiftieth birthday, may be justly classed among the senior institutions of charity of the country; and from its extent and comprehensive character merits a foremost place. At no time in its long career of usefulness has its condition been better than at the present.

THE DEPARTMENT FOR THE INSANE AT DIXMONT.

The number of patients in the Hospital on October 1st, 1896, was seven hundred and seventy-six; two hundred and forty-five were admitted during the year, making the number under treatment during the year one thousand and twenty-one. Of the two hundred and thirty-four who were discharged, eighty-four were restored, forty-nine were improved, twelve were unimproved, and eighty-nine died. The number in the Hospital at the end of the year was seven hundred

and eighty-seven. The highest daily number under treatment was eight hundred and twenty; the lowest, seven hundred and seventy-three, making a general daily average of seven hundred and ninety-nine and $\frac{81}{100}$.

The number of insane admitted since 1856, was eight thousand one hundred and forty-seven. Of these, two thousand three hundred and forty-five were restored; two thousand one hundred and ninety-one were improved; eight hundred twenty-two were unimproved, and two thousand and two died.

At one time the population of the Hospital had assumed such an alarming growth in proportion to the accommodations afforded, that the Managers were compelled to request the Courts and public authorities to refrain from sending more patients to it, and in consequence a slight relief to its congested condition followed. Still the Hospital is much overcrowded, so that the comfort of the patients is restricted, the safety of the buildings and its inmates menaced, and the opportunity for successful treatment and results limited. As I am informed that the other hospitals for the insane in the State are likewise overcrowded, I would urge upon the Legislature at its next session, to provide fully and liberally for all the insane, who are the most pitiable and dependent of its wards.

As long ago as in 1855, authority was given to the Courts to commit the criminal insane to the Hospital. It was then thought that the new institution, with its contemplated extensions would amply provide and care for all the insane of Western Pennsylvania, including the criminal insane. Since that time the State Asylum at Warren has been built and filled. The hospital at Dixmont extended to the limit, a large annex erected, also several smaller buildings, and all are packed with patients. A new and much larger State penitentiary has been substituted for the old one that occupied a prominent place on the "Commons" in Allegheny, yet the Courts continue to exercise their privilege of committing insane criminals to Dixmont. There are twenty-seven such patients in the Hospital now, whose removal from it would afford a grateful relief; nor is it unreasonable to believe that they cannot be cared for like the other sick patients in the prisons, where means of restraint and defense are fully provided. Of the twenty-seven criminal inmates mentioned, twelve have accomplished homicide, and all but two of the balance have shown decidedly vicious and dangerous tendencies, and constantly menace those who have them in charge. Special provisions for the criminal insane is

needed, that they may be removed from proximity to, and association with patients whose lives have been innocent of crime.

The health of the community at Dixmont was very good during the past year. No contagious diseases occurred, only two or three cases of typhoid fever, and at no time were more than eight confined in bed by acute sickness.

Two cases of sudden death were reported, to which the Coroner was summoned, and his investigations proved that they resulted from natural causes.

In May, Dr. H. F. McDowell resigned from the medical staff to accept a position on the staff of the Institution for Feeble-Minded Children, at Polk, Pa. No successor was chosen, but Dr. Henry H. Doan was assigned to the duties which had been acceptably performed by Dr. McDowell, and does them in addition to his pathological work.

The Commencement Exercises of the Training School for Nurses were held on May 7th, at which thirteen women and four men graduated and received diplomas. Unlike the procedures of most training schools, the Dixmont graduates are encouraged by increased rank and compensation, to remain on duty in the Hospital. This course is practical and conducive to better discipline, and a higher appreciation of duty.

The adaptation of the old machinery and boiler house into a new laundry was successfully accomplished. It is commodious, convenient, well lighted and ventilated. All apparatus which had been in use and available for further use, was retained and refitted, but the greater part of the machinery is new, and of the most modern and improved description.

An important adjunct to the laundry, especially, is a crib filter, sixteen by ninety feet in extent, contracted for and to be placed below the bed of the Ohio river, from which clear water free from most impurities, will be pumped to the reservoirs for general use. The drinking water, however, is supplied by copious springs upon the farm.

During the summer the Managers became satisfied that the water supply between the reservoirs and the buildings would hardly suffice in case of a fire—so new and larger pipes were bought and laid.

Much better sanitary conditions will be afforded in all the wards by the removal of the bathrooms and closets from their present locations to outside apartments. With this purpose in mind, an experimental tower-like addition was built at the end of the eastern wing, and into it modern plumbing and conveniences will be introduced at once. If this answers satisfactorily, all wards will be similarly treated hereafter.

Many other improvements and betterments of minor importance were made during the year, and all parts of the buildings and premises were maintained in good repair and condition.

The improvements specified and referred to in a general way, cost much money, but none of them were undertaken without anticipating ways and means to pay for them. No indebtedness was contracted, neither were the supplies for the maintenance and comfort of the patients reduced in quantity or quality; nor was any appeal made to the State for special aid. In fact, no special State appropriation has been asked for by this department of the Hospital since 1885.

It is due the Superintendent and all his assistants that public acknowledgment be made of their efficiency in the various departments of service; and this I do most cheerfully, thanking them on behalf of the Board of Managers, and personally too.

To the Executive Committee I am under deep obligations for uniform courtesy and support in my administration; but particularly for their supervision and diligence in directing the management of the Hospital.

THE MEDICAL AND SURGICAL DEPARTMENT OF THE HOSPITAL IN PITTSBURGH.

This department of the Institution is now under the immediate charge of Mr. Charles S. Howell, who succeeded Mr. M. J. House as Superintendent upon the latter's resignation last spring. He is a capable man of great energy and possessed of tact and manner necessary in an office beset with many difficulties, having divers elements to reconcile and keep in line.

The number of patients in the Hospital at the beginning of the year, October 1st, 1896, was one hundred and sixty-one; the number admitted during the year was nineteen hundred and forty-four, making the whole number under treatment twenty-one hundred and five.

The number discharged during the year was nineteen hundred and fifty-three, and on September 30th, 1897, when the year ended, there remained in the Hospital one hundred and fifty-two.

Of the patients treated the numbers and proportions were :

Cured.....	1,518=72 $\frac{240}{2105}$
Improved.....	384=18 $\frac{510}{2105}$
Unimproved.....	88=04 $\frac{380}{2105}$
Died.....	115=05 $\frac{475}{2105}$

Nine hundred and ninety patients, representing twenty-three thousand four hundred and eighty-two days of hospital occupancy, paid in whole or in part for their keeping ; nine hundred and sixty-one patients, representing twenty-seven thousand four hundred and thirty-nine days of hospital occupancy, were free or paid nothing, and one hundred and fifty-four patients were soldiers of the late war, and their days of hospital occupancy were five thousand and four. They were freely admitted and cared for. The highest number in the Hospital at any one time was one hundred and eighty-eight ; the lowest number was one hundred and nineteen, and the average daily number in the Hospital throughout the year was one hundred and fifty-three and $\frac{16}{73}$. The average number of days for each patient in the Hospital was $26\frac{59}{21}$.

The total expenditures of the Hospital during the year were eighty-seven thousand four hundred and seventeen and $\frac{70}{100}$ dollars, an average cost per day for each patient of one dollar and $\frac{563}{1000}$, (\$1.563.) But the cost of conducting the Hospital was seventy-four thousand two hundred and ninety-seven and $\frac{16}{100}$ dollars, reducing the cost per day per patient to one dollar and $\frac{328}{1000}$ =\$1.328.

The difference between these amounts, or the sum of thirteen thousand one hundred and twenty $\frac{54}{100}$ dollars, a little more than liquidates the current indebtedness of the department, which existed when my last annual report was rendered.

That perplexing encumbrance of fifty thousand dollars, which the Hospital owes to the Pennsylvania Railroad Company remains unsatisfied, however. It bears interest and impairs our Endowment Fund to the extent of the principal. This debt was incurred, you remember, in 1885, when the railroad company generously advanced money to pay off accumulated and threatening accounts, whose non-payment by reason of the failure to receive expected aid from the State, imperiled the usefulness of the Hospital. With your concurrence, application

was made to the legislature at the last session for a specific grant to free the Hospital from this burden, but the proposition was not entertained owing to the complicated financial situation and the reduced revenues of the State. The usual appropriation for maintenance for the two years ensuing from June, 1897, was granted, however, and insures a continuance of the good work which has characterized the operations of the Hospital in the past.

The special fund of contributions made by managers and friends, amounting in all to seventy-two hundred and thirty-five dollars, (of which sum thirty-one hundred and eighty-five dollars was acknowledged in the Treasurer's report of last year), was used for needed improvements, repairs and equipments to-wit: the erection of an addition to the west wing to accommodate new bath rooms, lavatories and closets, involving a thorough renovation of plumbing and sewerage, the purchase of new laundry machinery and the relaying of steam heating lines. These, with sundry refurnishments in contemplation, will place the Hospital in fairly good condition, and enable it to pursue its purpose till times are more propitious. For the meantime the Executive Committee asked authority of the Board of Managers to erect a new building to contain sufficient heating, lighting and laundry machinery, general, private and diet kitchens and employes' dormitories, to meet immediate requirements; and such authority was given provided the building be of fireproof construction, and so located and arranged that it may be utilized in case the talked-of new hospital shall be erected. Mr. Charles Lockhart, of our Board of Managers, signified his approval of this measure by paying into the treasury twenty-five thousand dollars to be applied toward the cost of the new structure. Under the direction of a sub-committee of the Executive Committee, plans were prepared and adopted and the contract let, and as a preliminary to the prosecution of the work the Phipps' Dormitory was moved two hundred and ten feet to the rear of its original location. The foundations of the new building have been completed, and the superstructure will be pushed to a finish as expeditiously as can be done.

No further subscriptions for the contemplated new Hospital were secured during the past year, and the same conditions therefore exist which prevailed a year ago, though plans which met with favor by the Board, were presented and are still under the consideration of the Building Committee.

By a gift of five thousand dollars, Mrs. Eliza Thaw Edwards endowed a bed in perpetuity in memory of her husband, the late George B. Edwards. This graceful and well-directed act of charity is most exemplary.

The services of the Medical and Surgical Staff and their assistants are supplemented by the labors of the corps of Resident Physicians, and these by trained nurses and pupil-nurses of the training school. Six Resident Physicians are annually chosen by the Executive Committee from candidates for the positions who have successfully competed in examinations conducted by a committee from the Hospital's staff. They must be graduates from reputable medical colleges, and before entering upon active service secure from the State Board of Examiners license to practice their profession. They reside in the hospital, serve without pay aside from their boarding and washing, wear a prescribed uniform while on duty, and are in honor bound to be diligent and faithful.

The nursing force of the Hospital consists of twenty-seven women and twelve men in course of training, together with the Superintendent of the Training School and six graduates of the school. The commencement of the class of 1897 was held on May 13th; thirteen women and four men were graduated.

I bear testimony to the skill, care and attention of the Medical and Surgical Staff, and to their untiring labors in promoting the cure or relief of the patients, and the success of the Institution; to the Superintendent, and all who have assisted him, our thanks are also due, and hereby heartily extended. To the members of the Executive Committee, who have labored zealously throughout the year in supervising and directing the accounts and the affairs of the Hospital, I am under deep and lasting obligations.

THE ENDOWMENT AND TRUST FUNDS.

The invested funds belonging to the department at Dixmont were unchanged; they amount to twenty-three thousand dollars. The investments of the Medical and Surgical Department were increased eleven thousand and fifty dollars by the special gift of Mrs. Edwards of five thousand dollars, and by a profit derived from the sale of the Hospital's holding of Monongahela Navigation Company Stock. The fund now amounts to three hundred and twenty three thousand six hundred and sixty-six and $\frac{67}{100}$ dollars. One hundred thousand dollars of this fund is invested in the bonds of the Mercantile Library Hall Company of Pittsburgh. Owing to litigation between

that company and the Mercantile Library Company, the interest due upon the bonds on April 1st and October 1st, was not paid, and accordingly the principal was matured. The Solicitor of the Hospital has instituted proceedings tending to a foreclosure of the mortgage. The property covered by the mortgage is improved real estate in the city, and ample. Money was realized upon the defaulted coupons, (\$5,000), and used for current expenses.

The Brewer Fuel Fund is seventy-seven thousand three hundred and sixty-seven and $\frac{30}{100}$ dollars. The Crawford Fuel Fund is fifteen thousand dollars.

Sixty-three thousand four hundred bushels of coal were purchased out of the earnings of these funds and judiciously distributed among "the worthy poor of Pittsburgh and vicinity."

In Memoriam.

With feelings of deep sorrow I record the deaths of three members of our Board. Maxwell K. Moorhead and Col. James Andrews passed away within the limits of the year for which this report is made, and while engaged upon its preparation, the intelligence reached me of Major Joseph F. Denniston's demise.

MAXWELL KENNEDY MOORHEAD, a Life Manager, was born in Huntingdon, Pa., on September 6th, 1832, and died at his home, in Pittsburgh, on January 14th, 1897, after a long period of broken health. He was the eldest son of Hon. James K. Moorhead, a founder and life manager of the Hospital, and one of our city's most eminent citizens. Most of Mr. Moorhead's life was spent in Pittsburgh, and during the greater portion of it he was actively engaged in the promotion of its iron and steel industries. In 1884, he became President of the Monongahela Navigation Company, and of late years devoted his whole time and attention to its service. His genial nature and kindly disposition rendered him very popular among his acquaintances, and attracted to him hosts of friends who loved him for his worth and honorable and manly traits.

JAMES ANDREWS was born in New Abbey, Scotland, October 7th, 1825, and died at his residence in Allegheny, on June 6th, 1897.

Upon the death of his mother, when fourteen years of age, he came with his father to America, settling at once in Allegheny. He was permitted to acquire only the rudiments of an education in the public schools of his native land, but the world's dear school of experience, gave him habits of thought and resources that endured throughout his long life, and fitted him to perform feats of engineering skill that rendered him famous. When twenty-two years of age he took the contract for building the old Custom House and Post Office in Pittsburgh, a work of magnitude in its day. Afterwards he built bridges and tunnels for the Pennsylvania Railroad Company. In connection with Captain James Eads he constructed the great bridge across the Mississippi River at St. Louis; and the Jetties at the mouth of the Mississippi river which opened the port of New Orleans to the commerce of the world; and then they undertook the gigantic project of constructing the Tehuantepec Ship Railroad, but the sudden death of Captain Eads, while plans were maturing, together with the jealousies of speculators and politicians who were interested in the Panama and Nicaragua canals, hampered the movement, and checked its fulfillment. He was also one of the projectors of the North River Bridge, New York. He was elected a member of the Board of Managers in 1894, and was appointed upon the Executive Committee of the department at Dixmont. Immediately he became interested in hospital work, and was earnest and diligent as a Manager of the institution. I have not space to recount all his personal qualities and virtues, his honesty, his sincerity, his cheerfulness, his strong good sense, his delightful companionship, his wit and humor, his simple mode of life and temperance, his loving, tender and affectionate home life.

MAJOR JOSEPH F. DENNISTON, died on November 24th, 1897. He was born September 10th, 1837, within the shadow of the present hospital building. He worked on his father's farm while not attending the public schools, and later was employed as a clerk till the outbreak of the war, when he was among the first to enlist as a private soldier in his country's service. Though wounded in several battles, losing his right leg, and the use of his right arm, he served continuously till the close of the war, having been promoted from grade to grade to the rank of Major. His military record was one of the best attained by any soldier from this community. He was an active Grand Army man, belonged to Post 117, was a member of the Veteran Legion and the Military Order of the Loyal Legion. As a recognition of his services the county honored him by making him its Treasurer in 1867, and re-elected him two years

later to the same office, where, having acquitted himself with such integrity, diligence and faithful attention to public business, he was chosen Treasurer of the City of Pittsburgh, in 1881, and successively re-elected in 1884, 1887, 1890 and 1893. When he had been constituted a manager he took upon himself the duty of looking after the soldier's interest in the Hospital, and in the double capacity of a manager, and "the Soldier's friend," served both fairly and justly. For many years he was the Secretary of the Executive Committee of the Medical and Surgical Department, and missed few of its meetings. His minutes were full and accurately kept and distinctly written with his left hand, his right having been put out of service by a rebel's bullet. He was benevolent in disposition, upright in his dealings, sincere in his friendships, and cheerful in his conversation.

Respectfully submitted by order of the Board,

JOHN A. HARPER,

November 24th, 1897.

President.

M. W. McMILLAN, *Treasurer*.

NOTE.—In order to issue and pay Warrants of the preceding month, the accounts of the Treasurer are not closed until October 15th, 1897.

We, the undersigned, the *Finance Committee*, appointed for the purpose, have carefully audited the accounts of Mr. M. W. McMillan the Treasurer of the Western Pennsylvania Hospital. (Department for the Insane at Dixmont,) and found them to be correct and satisfactory as above presented, showing the balance on hand October 15th, 1897, was nine thousand five hundred and eighty-nine and $\frac{57}{100}$ dollars, (\$9,589.77.)

JOHN B. JACKSON,
GEO. A. BERRY,
WM. ROSEBURG,
ALEX. NIMICK,
C. ZUG.

Statement of the Treasurer

OF THE WESTERN PENNSYLVANIA HOSPITAL, (MEDICAL AND SURGICAL DEPARTMENT,) FOR THE YEAR ENDING OCTOBER 15TH, 1897.

RECEIPTS.

BALANCE in the Treasury at the time of the last Annual Statement, October 15th, 1896.....\$ 4,574 78

APPROPRIATIONS OF THE COMMONWEALTH by Act, 1895 :

	\$158,893 00

I have to report that the Mercantile Library Hall Company defaulted in payment of the interest due on April 1st and October 1st, 1897, on one hundred of its bonds of one thousand dollars each, which compose a portion of the Endowment Funds. The obligation of the Institution, with the defaulted coupons to secure its payment, was negotiated and the proceeds used for general purposes in maintaining the Hospital. Legal proceedings are instituted by the Solicitor to recover both principal and interest without unnecessary delay. And I have also to report a default of \$1,635 in payment of interest due on the J. C. Zweidinger Mortgage of \$44,500. This too was placed in the hands of the Solicitor to collect, &c.

M. W. McMILLAN, *Treasurer*.

NOTE.—In order to issue and pay warrants of the preceding month, the accounts of the Treasurer were not closed until October 15th, 1897.

We, the undersigned, the *Finance Committee*, appointed for the purpose, have carefully audited the accounts of Mr. M. W. McMillan, the Treasurer of the Western Pennsylvania Hospital, (Medical and Surgical Department,) and find them correct and satisfactory as above presented, showing a balance on hand October 15th, 1897, to be twenty-six thousand one hundred and seventy-four and $\frac{72}{100}$ dollars.

REPORT

OF THE

Physician and Superintendent

OF THE

Department for the Insane at Dixmont.

REPORT
OF THE
Physician and Superintendent
OF THE
HOSPITAL FOR THE INSANE AT DIXMONT.

To the President and Board of Managers:—

GENTLEMEN:—With the expiration of another year it again becomes my duty, in accordance with the Rules and By-Laws governing this Institution, to lay before you for your consideration a detailed statement of its operations, showing you the movements of our population, the condition of the patients, what changes or improvements have been made in its management, and the necessary expense connected therewith. These facts are all concisely set forth in the accompanying reports of the various departments.

The year just closed has been a most eventful one in the Institution's history—a progressive one in keeping pace with the advances made in all the study of insanity, and in aiding and bettering the equipment of our buildings. Dixmont is now very justly known as one of the older hospitals for the care of the insane. Its style of architecture belongs to a period in itself conservative, and far antedating the present and more modern ideas of hospital construction, but it was founded upon those fixed principles of humanity and broad philanthropy, that, to day, characterize its government, and from the time of its inception has enabled it to stand forth an honor to the State and a constant benediction to those who, through sickness and misfortune have sought its sheltering care. I am not unmindful of our shortcomings and difficulties in attaining a still higher degree of excellence and efficiency which advantages would seem to warrant, favorable comparison, however, can not but be drawn with the results of former years.

At the beginning of the year, September 30th, 1896, the Hospital had a population of seven hundred and seventy-six patients, and, during the year two hundred and forty-five patients were admitted, making the total number under treatment one thousand and twenty-one. Two hundred and thirty-four patients were discharged, leaving seven hundred and eighty-seven patients remaining in the house September 30th, 1897. Of those admitted, twenty-eight were upon request of their friends; one hundred and thirty-six by the various authorities of the poor; sixty-six upon the order of Court; and fifteen upon an order of transfer issued by the State Committee of Lunacy. One hundred and seventy-three were residents of this county, of whom one hundred and twenty-five were natives of Pennsylvania, forty were foreigners, and the birth place of thirty-two was unknown.

Of those discharged, eighty-four were restored, forty-nine improved, twelve unimproved, and eighty-nine died. Of the deaths reported, in fourteen instances it was the result of exhaustion following chronic mania; six deaths followed the exhaustion of acute mania; in three patients the exhaustion of chronic melancholia, and three patients the exhaustion of acute melancholia; seven died from the exhaustion of the epileptic form of insanity, four deaths are due to exhaustion following chronic dementia, six deaths occurred as the result of apoplexies, six male patients died of paresis, and twelve deaths are ascribed to consumption. Pneumonia, Brights' disease, typhoid fever, valvular heart disease and dysentery account for the remaining deaths.

As additional information in the mortuary tables, I would state eighteen patients were over fifty years of age at the time of death, twelve were aged sixty years or over, three were seventy years, and three had passed eighty years. One patient had been a resident in the Hospital thirty-seven years, one thirty-four years, one twenty-eight years, two for twenty-five years, two twenty-four years, one twenty-three years, and one for seventeen years.

The percentages of recovery for the year based upon the total number under treatment is 8.4 per cent. and upon the number admitted during the year 34.3 per cent.

When the greatly over-crowded condition of our wards is remembered, the constantly increasing number of our aged and infirm patients, the large number of patients admitted yearly who are brought to us as a "place of last resort," and their acute or possi-

bly curable stage of their mental disease passed, their wretched and broken down bodily health, and old age, and the fact that but thirteen cases of those received during the past year could be re-regarded as acute forms of insanity, it is not surprising that our percentage of recovery is lower than the casual observer would expect to find.

Eight men and five women were returned to the Hospital from the Asylum for the Chronic Insane at Wernersville, Pa., and two male convicts were received upon order of the Court of Allegheny County from the Western Penitentiary. The Hospital at the present time has twenty-seven convicts confined within its walls, and from necessity, a number of these patients are distributed in several wards, and associate and mingle with the other patients, which fact, in itself, is much to be regretted, although we are powerless to prevent it. Many of them are homicidal, and thereby exceedingly dangerous and difficult to control. It is a matter of congratulation, that under every wise precaution no serious accident thus far has occurred. Our buildings were not originally constructed to care for this class of insane or afford security against their escape. Ours is a Hospital, and not a prison or jail. Humanity demands the convict insane should receive every care and medical attention, but the State should make suitable provision for their custody and treatment in some separate building especially designed or devoted to that purpose alone.

The Hospital, at the present time, has thirty-one epileptics; these patients we are also compelled to care for in the various halls, where they are in constant contact and association with the other patients. This is a most pernicious system, as this form of insanity is well known to be the most troublesome and dangerous encountered in hospitals; their violent outbreaks of mental excitement are apt to endanger the lives of those around them as well as exert a most depressing influence upon those who need quiet and freedom from all such influences. Over three hundred epileptics are reported in the hospitals of the State, and the demands for their keeping and detention in an institution of their own cannot be too urgent.

During the year the Coroner was asked to visit the Hospital upon two occasions and make inquiry into the death of two patients. In the one case, the patient was found dead in bed, and, upon examination, it was ascertained death had resulted from an epileptic seizure; the other case was that of a male patient whom, it was thought had been scalded while in the bath. Careful inquiry, however, failed to

confirm our suspicions as to the exact character of the injury, and while death may have been thus hastened, the patient died from apoplexy, he being a paretic in the advanced stages of the disease. Owing to the fact of there being some conflicting testimony, all the attendants associated in the care of this patient were discharged. In both instances the Coroner rendered a report relieving the officers from all censure.

As in former years, the Hospital has been open to the reception of visitors during suitable hours, and the interest of the general public in our work and patients has been unabated. The greatest care was exercised by the officers that the visits of friends were permissible only at such periods as would ensure comfort and pleasure to the patient, and, at the same time, not prove detrimental to their happiness or recovery. The proper regulation of this privilege is an important one, and in a hospital of this character, cannot be too carefully guarded.

The medical care of our patients has been practically the same as in former years. Their health, comfort and happiness received the united energies of the physicians to promote their physical and moral well being, and each individual case received such attention as its demands required; their wards and accommodations were closely inspected daily, and cleanliness, order and discipline enforced upon their attendants. They were encouraged, also, under the supervision of the nurses, to take part in light, out-door work, as not only a means of recreation, but for the benefit to be derived from systematic employment and occupation. The female patients, in so far as possible, were employed in the laundry department, in housework, and in out-door exercise—walking and driving. Kindness, sympathy and earnest devotion in all their ministrations were also urged upon their nurses, and any departure from this rule was rewarded with prompt dismissal.

The Pathological work of the Hospital has been under the able direction of Dr. Henry H. Doan, whose detailed work in this department is annexed in the tabular report.

For nine years it has been our custom to deliver lectures upon general nursing to the nurses and attendants, and so successful have been our efforts in this direction that two years ago a Training School was established with the expressed purpose of graduating trained or skilled nurses. In addition to the lectures delivered by its staff, a

number of medical gentlemen from Pittsburgh kindly consented to assist us, and we have thereby been enabled to give a most excellent and thorough course of instruction. The advantages to the Hospital are so far reaching, that I feel it is impossible for me to adequately express them in this report. On May 7th, 1897, the first graduating exercises of the school were held in the chapel, and the President delivered diplomas to seventeen graduates, thirteen young women and four young men. I am glad to note at this time, with but one exception, these nurses are still in the employ of the Institution.

The improvements and renewals to the Hospital plant, during the year, are most satisfactory ; most prominent among them is the completion of our new laundry. This structure is fitted up with every modern convenience, and has the most approved machinery and a capacity of from 12,000 to 15,000 pieces per week. The frame building, known as the cottage, was greatly ornamented, and additional comfort afforded its inmates by the construction of two large porches. Along the station road, the old and dilapidated stone wall was replaced by a new one, greatly beautifying this portion of the grounds. In the wards a number of hard wood floors were laid, and in several bath rooms new plumbing and modern bath room appliances took the place of the oldfashioned fixtures which had become much worn. A beautiful tile floor was also laid in one bath room, and in the officers' kitchen a new range was placed. A most important change was also made in our system of river water supply to the buildings. This necessitated the laying of a new eight inch water pipe from the basins to the main buildings. It is now completed, and the increased facilities it affords for all house purposes and greater protection against fire amply justified this large expenditure. During the summer the contract was given Wm. F. Trimble & Sons for the erection of a brick tower, three stories in height, situated at the end block of the main building, for the use of male patients, and to contain on each floor approved modern bath and sanitary accommodations. It is now nearing completion, and will go further than any other improvement made in years past to place Dixmont in the front rank of modern hospitals.

The construction of a crib, in the Ohio, begun just before the close of the year, for the purifying of our river water, is progressing satisfactorily, and when completed, will also prove a most decided benefit in giving us a cleaner and purer water supply in our laundry department, and for house purposes. The mere mention of these important changes and additions does not give one an estimate, either of their

cost or the amount of time and labor required to properly superintend the work of their construction, and hurry them forward to completion ; and too much praise can not be given the members of the Executive Committee, who had them in charge.

The tedium of hospital life has been broken by amusements and entertainments, in so far as our facilities would permit ; the holidays of the year were appropriately observed, and parties, dancing classes, concerts and lectures given in our chapel were largely attended. The wards were as usual liberally supplied with games, music and reading matter ; many illustrated papers and magazines. The different libraries were also enlarged by the addition of new volumes. Chapel services were conducted every Sunday and rendered more attractive by the purchase of a large and beautiful organ.

The statement of the Treasurer, Mr. McMillan, accompanies this report and is prepared with its usual accuracy. The report of the Farmer show this department to be in a most satisfactory condition and the products of the farm fully up to the standard.

But few changes occurred among our nurses, there being few dismissals or departures for other reasons. Many have been in the service of the Hospital for years and their attachment to their patients and earnest devotion to the work and good of all has won for them the appreciation of their value and experience by the officers. Long association with the insane teaches one to become more and more conservative in the removal of attendants—frequent dismissals are subversive of good discipline, and a needed reproof is better than to incur greater risks of accidents and infraction of rules by the employment of inexperience.

Your venerable Supervisoress, Miss Eliza H. Hope, is still faithful to the trusts reposed in her keeping and her keen oversight is undimmed by the labor of more than thirty-three years in the Hospital, and to the heads of all the varied departments I would at this time express my faith and confidence in their ability and zeal to promote the highest aims and responsibilities of the Hospital.

The Medical Staff remains unchanged, with the exception of Dr. H. F. McDowell, who resigned his appointment May 1st, 1897, to accept a similar position in the new Institution for the Feeble-Minded at Polk, Pa. In the resignation of Dr. McDowell, the Hospital lost an efficient officer, and his many friends follow him with their best wishes

for his future. To the other members of the Staff for their individual efforts in contributing to the good work of the year I am deeply grateful.

Finally, it is my duty and pleasure to express to you, Mr. President, Gentlemen of the Board of Managers, and Members of the Executive Committee, my appreciation of the many kindnesses received from you individually and in your official capacity, nor am I unmindful in my estimation of the value of your advice and wise counsel in contributing to the successful administration of the Hospital during the year now closed, and asking the guiding hand of a kind Providence upon the year we now enter, this report is respectfully submitted.

HENRY A. HUTCHINSON.

DIXMONT, PA., *October 1st, 1897.*

Acknowledgments.

To the many friends of our patients who through the year have contributed to their pleasure in so many different ways, in making their lives brighter and the Hospital more home-like in its character, to them I would at this time make this public acknowledgment. To The Hayden Mandolin Club, Mr. Edward S. Holiday and friends, Mr. Charles F. Workmaster and friends, the Sheridan Sabre and Mandolin Company, Miss Wallace and Mr. Winn B. Morris, Professor Wm. S. Stevenson and friends, the Schubert Club and Mr. and Mrs. Porter we are indebted for a number of most excellent concerts.

Mr. A. Y. Lee, Mr. Leon French, and Miss Virginia Mercer gave us a series of "Chalk Talks" and impersonations. Through the kindness of Mr. Benjamin H. Lightfoot, of Pittsburgh, the Bible Association of Friends in America, sent to the Hospital ten Bibles and twenty-five Testaments and Psalms.

Reading matter, books, magazines, etc., were sent to us from Mr. C. B. Shea, Hon. E. H. Stowe, Mess. Demler and Schenk, Miss Maud McCrumb, Mess. Spang, Chalfant & Co., Mr. Samuel Severance, Jr., Mr. Thos. H. Lane, Mr. A. C. Knox, Mr. J. K. Davis, the King's Daughters of the Sixth U. P. Church, Pittsburgh, Pa., Mr. Stoner, Mrs. E. Reno, Mr. T. Dale Jennings, Miss Elizabeth Eyster, Mrs. Blaine, Mrs. Rose, Mr. Jos. Adair, the American S. S. Union, Mrs. James Marshall, Mr. T. H. B. McKnight, Mrs. Geo. M. Kunkle, the Y. M. C. A. of Pittsburgh, Hon. Chas. C. Townsend, Mr. John A. Harper, Prof. B. A. Meckels, Miss M. J. Ellis, Mr. D. E. Alexander and Dr. H. M. Shallenberger.

To Mr. C. B. McLean, Mr. F. Linke, Hon. Judge Agnew, Mess. Reymer Bros., Mess. Dilworth Bros., Mess. Haworth & Dewhurst, and Miss Pauline Moller all kindly remembered our household at Christmas.

To Prof. Brooks we are greatly indebted for his presence and assistance at a number of our parties, and to Messrs. Toerge Bros. for their beautiful music on these occasions.

A fancy dress ball was given us by Miss Jean Hamilton.

To Rev. D. R. Imbrie, the Hospital is under obligation for a large number of evergreens for the ornamentation of our grounds, and to Dr. T. M. T. McKennan also, who sent us sixty maple trees for the same purpose.

Under the direction of Mrs. Rose, the Sewickley Valley Club gave us their presentation of the play "Esmeralda."

Messrs. Arbuthnot, Stephenson & Co. sent to the Hospital a beautiful flag.

Mr. Wm. Metcalf presented the Institution with two trees known as the *Sequoria Giganti*.

Mr. Samuel Hamilton donated the sum of \$50.00 in the purchase of an organ, and Mess. Heerin Bros. a like sum in the buying of a Regina music box.

Report of Pathological Department.

To the Medical Superintendent:

The establishment of this distinct department in the work of the Institution has relieved the other house physicians of some tedious and exacting duties and left them free to devote all their energy and time to clinical work and a closer supervision of everything pertaining to hygiene and ward administration has resulted. There have been but two deaths from dysentery, twelve of pulmonary tuberculosis, and none from enteric fever during the year. With a population of nearly a thousand (including employes), and with a large proportion of chronic invalids and old persons among the patients, this may be regarded as a most satisfactory showing.

Owing to the fact that our patients are drawn from an extensive district, many of them from places not within easy communication, it has been impossible in a large proportion of cases to obtain from their friends, in cases of death, the requisite permission for the performance of a necropsy. We have made comparatively few during the year. This is a matter for regret, but perhaps nothing can be done to improve our opportunities and records in this field.

The bulk of our work has been of a routine character; the daily analysis of secretions, excretions, or blood; the cutting and staining of sections; the examination of sputum, and other bacteriological work.

We tender our thanks to the Board of Managers for their liberality in equipping the laboratory, and to the Superintendent for his interest and co-operation in the work of this department.

Respectfully submitted,

HENRY H. DOAN, M. D.,

Assistant Physician.

BEAVER,	GREENE,	LAWRENCE,	WESTMORELAND,
BUTLER.			

Admission of Patients to Insane Department.

1. Preparatory to the admission of a patient, unless when committed by order of a court, the Superintendent shall be furnished with the certificate of two physicians, who have been in practice for five years or more, that they have separately seen and examined the individual within two weeks of the date of admission, and believe him or her to be insane, and these certificates shall be sworn to before some alderman or judicial officer, (the oath before a notary public is illegal) with the order of near relative or friend that the patient may be received into the Hospital, with a statement as required by law, and a bond with satisfactory security, for the payment of board and other expenses while in the institution. All private patients thus received shall make a payment of thirteen weeks' board in advance, when brought to the Hospital, no part of which shall be refunded; and if taken away uncured, and against the advice and consent of the physician, in any succeeding quarter, no part of the payment shall be refunded.

2. Whenever a patient is sent to the Hospital by order of the Court, the order or warrant, or a copy thereof, or, if sent by the Directors of Poor, an order sent by the Directors or their agent accompanied by the Certificate of Insanity, as required by law, shall be lodged with the Superintendent of the Hospital.

3. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

4. Each male patient shall be provided with at least three new shirts, a new and substantial coat, vest and pantaloons, three pairs socks, two pairs drawers, two undershirts, a hat or cap, cravat, collars, handkerchiefs, shoes, and one pair of slippers.

5. Each female patient shall have three calico dresses, four chemises, three pairs drawers, three pairs hose, three nightgowns, two flannel skirts, one Balmoral skirt, two muslin skirts, six handkerchiefs, four collars, two pairs shoes, one shawl or cloak, and one hat or hood.

6. It is very desirable that extra and better apparel should be sent with those accustomed to it, that when their health is improved, or when they attend religious worship, walk or ride out, their self-respect may be preserved.

In all cases the patient's best clothing should be sent; it will be carefully preserved and only used when deemed necessary for the purpose above mentioned.

Jewelry, and all superfluous articles of dress, knives, &c., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

All clothing, if not taken away at the time of patient's removal, or within three months afterward, will be disposed of as the officers of the Hospital may think best, and no compensation whatever will be made therefor.

7. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him or her to the Hospital, and from whom minute, but often essential particulars may be learned. All women patients must be accompanied to the Hospital by some female friend as required by law.

8. The price of board, including washing, mending, and attendance for all who are supported at the public charge, is \$3.75 per week. For private patients, or those supported by themselves, or their friends, the price varies from five to ten dollars, according to the trouble and expense incurred, and according to their ability to pay. Higher prices are paid by special agreement with the physician, for extra attention and accommodation.

Payments are to be made quarterly, in advance.

9. A bond, with satisfactory sureties, will be required for the payment of the board and expenses, for the removal of the patient when discharged, of all persons, excepting those sent at the expense of the counties or townships.

Those who bring friends should be prepared to give a bond, and, if strangers, furnish evidence of their responsibility.

10. All bills remaining unpaid one month after date of presentation, are placed in the hands of the Solicitor of the Hospital for collection.

11. As the diet of the patients is under the absolute control of the Superintendent, no nuts, candies, cakes or other edibles shall be given to the patients, by their friends or visitors, without his express permission.

12. Visitors are admitted to inspect the Institution on any day (except Sunday,) between the hours of 10 A. M. and 12 M., and between 2 and 4 P. M.; but no visitor shall be admitted to the wards occupied by patients, without express permission from the Superintendent; and especial care is to be taken that no amount of visiting is permitted that shall prove injurious to the patient. No visitors shall be admitted on holidays.

Visitors will please not intrude on the grounds used by the patients, or give to or receive anything from patients.

13. The Hospital is located eight miles west of Pittsburgh, on the Pittsburgh, Fort Wayne & Chicago Railway, at Dixmont, and can easily be reached by cars, there being ten trains (east and west) each day, (except Sunday,) stopping at the Hospital Station.

14. Applications for the admission of patients, and all communications in regard to the condition, health, bills, &c., of those who are in the Hospital, shall be made to the Superintendent.

15. As Dixmont Station has now an Adams Express Office, all goods may be sent to the Hospital direct by express or freight, as may be preferred.

16. The friends of patients can communicate with the Institution by telegraph and telephone.

Forms of Commitment.

The following forms have been prepared by the Committee on Lunacy, to be used in all cases (except those sent by order of Court) for the commitment of insane patients by their friends or by Directors and Overseers of the Poor, to the Hospital for the Insane, at Dixmont, Pa. No such patients will be received unless the forms as given are fully complied with.

Know all Men by these Presents, that we,.....of
in the county of.....and
 State of Pennsylvania, are held and firmly bound unto the WESTERN
 PENNSYLVANIA HOSPITAL, its successors or assigns, in the sum of One
 Thousand Dollars, for the payment of which we jointly and severally
 bind ourselves, our heirs, executors and administrators, firmly by these
 presents : (And.....do hereby empower.....or
 any attorney of any Court of Record within the United States or else-
 where to appear for....., and after one or more declarations
 filed, to confess judgment or judgments against.....in favor of
 the WESTERN PENNSYLVANIA HOSPITAL, as of any term for the above
 penalty, with costs of said suit, and attorney's commission for collection,
 viz : Five per cent. in case payment has to be enforced by process of
 law ; hereby waiving inquisition and condemnation of any property
 that may be levied upon by virtue of any execution, which execution
 may issue forthwith, on failure to comply with any of the conditions
 thereof, and hereby waiving the right of exemption from levy and sale
 of any and all property that now is, or hereafter may be, exempted from
 levy and sale, under any Act of Assembly for such purpose, and with
 release of all errors, &c. And it is further agreed and provided that
 execution and alias, and pluries executions may issue at any time, and
 from time to time, and as often any amount shall be due and owing
 to said WESTERN PENNSYLVANIA HOSPITAL, and that the books of
 said Hospital shall be evidence, and a liquidation of the amount to be
 collected on said executions.

Witness.....hand and seal.....the.....day of.....in
 the year of our Lord One Thousand Eight Hundred and

Whereas....., of....., in the County
, and who is insane, has been admitted as a patient
 WESTERN PENNSYLVANIA HOSPITAL, at Dixmont, Pa.

Now, therefore, the condition of the obligation is, That if the said
 obligors shall pay to the said WESTERN PENNSYLVANIA HOSPITAL, its
 successors or assigns, the sum of.....Dollars and.....
 Cents per week, for the Board of said patient, so long as.....shall

continue in said Hospital, with such extra charge as may be occasioned by.....requiring more than ordinary care and attention, and shall provide for.....suitable clothing ; and shall pay for all such necessary articles of clothing as shall be procured for..... by the said Hospital ; and shall remove.....from the said Hospital whenever required to do so by the Superintendent, and if the said obligors shall also pay, not exceeding Fifty Dollars for all damages the said patient may do to the furniture, or other property of the Hospital, in any one quarter, and for reasonable charges in case of.....death ; and in case the said patient shall be removed from said Hospital by, or at the request of us, or either of us, or by any other person or persons, before the expiration of three calendar months after.....reception, then if the said obligors shall pay the board of said patient for thirteen weeks, and all other charges on the books of said Hospital, all payments for board and clothing to be made in advance, quarterly, on the fifteenth day of March, June, September and December in each year, and at the time of removal, with interest on each bill from and after the time it becomes due—then this obligation to be void, otherwise to remain in full force and virtue.

Signed, sealed and delivered in presence of us.

[SEAL.]

Commitment at Request of Party Interested, after Finding of the Insanity
of the Patient.

THE COMMONWEALTH OF PENNSYLVANIA,

[SEAL.] *To the Sheriff.....County, and to the Western Pennsylv-
ania Hospital:*

WHEREAS, at the.....Sessions, 18....., of the Court of.....in and for said County of.....held at....., on theday of.....18....., the same being a Court of record in Western Pennsylvania, and having jurisdiction of offenses that are punishable by imprisonment for the term of ninety days or longer, the petition ofwas presented, applying to our said Court for the commitment to the Western Pennsylvania Hospital of.....alleged by said petitioner to be insane, and resident within the said county of.....

And whereas, on the.....day of.....18 .., a jury was called, elected by ballot, duly accompanied and sworn according to law, to inquire into the fact of the insanity of said....., in the manner provided by law ; and said inquest did, upon their several solemn oaths or affirmations respectively find that the said.....is insane :

And whereas, our said Court being satisfied that the said....., by reason of such insanity, *unsafe to be at large, or is suffering under unnecessary duress of hardship*, did, on the.....day of.....18....., adjudge and decree that the said.....be committed to the Western Pennsylvania Hospital to be treated according to the rules and regulations of said Institution, and the laws of the Commonwealth, and there be detained until the further order of said Court, or of one of the Judges thereof ; and further, that the expense of the care and maintenance of said....., and of his removal to and from said Hospital shall be paid by the said county.....according to law.

And whereas, it was made to appear to our said Court, that the saidhad, at the time of the finding of said inquest, *a legal settlement in the.....in said county* all of which facts our said Court has given due notice to the constituted authorities having charge of the poor in said.....of.....;

Now, therefore, these are to charge and command you, the said Sheriff, forthwith to convey and deliver into the custody of the Western Pennsylvania Hospital, in the county of Allegheny, in this Commonwealth, the body of said.....and you, the said Western Pennsylvania Hospital, are hereby required to receive the said.....into your custody, care and keeping in the said Hospital, and there to keep *him* safely, to be treated according to the rules and regulations of said Institution and the laws of this Commonwealth in such case made and provided, until the further order of our said Court, or of one of the Judges thereof.

ANNUAL REPORT

OF THE

MANAGERS

OF THE

Western Pennsylvania Hospital.

To the Honorable President and

Members of the Board of Public Charities :

GENTLEMEN :—On behalf of the Board of Managers of the WESTERN PENNSYLVANIA HOSPITAL, I respectfully submit the report for the year ending September 30th, 1898.

On undertaking this duty, and casting a retrospective glance over its operations during the period stated, no event or incident of conspicuous importance occurs to me. I believe that the purposes of the Founders, and the wishes of the Managers were carried out as far as practical, and in a manner that will meet with your commendation. The greatest possible comfort and relief were rendered to all the unfortunate victims of mental and physical afflictions committed to the Institution, its property was conserved, its financial credit upheld, and its good name unsullied by the breath of scandal or complaint.

I have received from the Superintendents of the two departments, most excellent reports, which, together with the statements of the Treasurer accompanying them, render it unnecessary for me to catalogue details and quote statistics ; they do this, besides being replete with interest, thought, and suggestions, acquired through experience and intimate contact with the work we are all endeavoring to promote.

THE DEPARTMENT FOR THE INSANE AT DIXMONT.

The average daily number of patients in the Department for the Insane, at Dixmont, throughout the year was $768\frac{36}{100}$, or nearly one-third more than its designed capacity. This excess, and consequent over crowding has long been a matter of deep concern to the Officers and Managers and a serious discomfort and danger to many of the inmates, from which we pray to be delivered. A grateful and present relief might be effected by the return of 32 insane criminals to the State's prison. Their presence in Dixmont is a great wrong. These treacherous and homicidal maniacs cannot be entirely isolated from the other patients innocent of criminal acts. Surely if the prison authorities could appreciate the evil that the Hospital suffers from the menace of their presence, they might easily provide for their own insane within the prison's walls. The occasional transfer of able-bodied workers to the institution, at Wernersville, affords only a temporary relief, and is for evident reasons an undesirable one. Nor is the removal of indigent insane to city and county almshouses other than a retrogression on the part of our grand old Commonwealth, which used to be foremost of all her sister republics in charity and benevolence to her wards, the insane, the blind, and the deaf and dumb. The establishment of another hospital for the Insane, in Southwestern Pennsylvania, appears to me to be the proper remedy, and especially so, because an extension of the buildings at Dixmont, or the erection of additional buildings there, is not practical on account of the topography of the land, that portion of it unoccupied by buildings being for the most part precipitous hillsides, having a tendency to *slide* if the surface be broken, and the weight of buildings be superimposed.

Good health in general prevailed among our people, the premises continue in that excellent order which has characterized them hitherto, and the administration of the whole establishment is deserving of the highest praise.

THE MEDICAL AND SURGICAL DEPARTMENT.

This department admitted 2,537 patients during the year, a considerable increase over the number provided for the year before. No applicant eligible to treatment under the rules was turned away from the doors, and the service was diligent, active and skillfully rendered.

The management was the first to anticipate the Governor's application for extension of hospital care to soldiers of the army then and now on active duty in the Spanish War. Shortly after the breaking out of hostilities, it instructed the Superintendent to receive such soldiers on the same terms and as freely as he is required to do for veterans of the War of the Rebellion. In no manner did the nation, the state, or the community lack that aid which they have the right to expect at our hands, and therefore we ask your approval of the application which will be made to the Legislature at its ensuing biennial session, for the usual appropriation of ninety thousand dollars on account of maintenance for two years. We also ask for the additional sum of fifty thousand dollars, or a portion thereof, to pay off, or reduce the long standing indebtedness to the Pennsylvania Railroad Company, for money generously advanced to the Institution in 1885, when by reason of the failure of the Legislature, (through a misunderstanding,) to appropriate, the Hospital was financially prostrated, and in such dire straits, that the Managers, well knowing that their first duty was to preserve the property, were forced to pledge a portion of the Endowment Fund to enable the Institution to go on with its charitable work. We therefore earnestly ask your re-approval of our appeal to the Legislature for this especial relief, and we solicit your co-operation in our efforts to procure it.

Aside from the embarrassment just referred to the Hospital is on a sound financial basis, and is enabled to make all of its purchases and payments for maintenance on the most favorable terms, or for cash. It is practically out of debt. The average daily cost for keeping patients was \$1.71, a little higher rate than that reported the year before, yet below the general average of other large institutions of the country, but the increase is accounted for when the unusual amount of repairs and replacements accomplished are taken into consideration.

In my previous reports references were made to the worn and dilapidated condition of the main building, and to the consequent initiation of a noble scheme of improvement and expansion. Reasonable as that project appeared to us from every point of view—and for that matter still appears—it proved to be premature and did not crystallize. Accordingly numerous delayed repairs were made this year when hardwood floors were laid throughout the wards and private rooms, ceilings and walls were renovated by fresh plaster and paint, and iron bedsteads and modern refurnishments replaced the wooden antiques

already too long in vogue. An atoning transformation was wrought, alike pleasing to the eyes and to the comfort of the patients and attendants and visiting friends.

I cannot report the completion and occupation of the new building authorized by the Board of Managers, and under the supervision of the Executive Committee. It is, however, built, under roof, nearly finished, and partly equipped. I quote the following description furnished to me by Mr. Thos. D. Evans, the architect :

“The Annex to Western Pennsylvania Hospital is a red brick building 111 feet 8 inches front by 55 feet 8 inches deep.

It is five stories high, and the first four floors are on the same level as the corresponding floors of the main building ; and each floor, except the first and fifth floors, is connected with the main building by covered and enclosed bridges with slate floors supported by iron beams.

The different floors and the roof of the new building are supported with steel joists and concrete arches, and the finished floor in the second-story is cement and asphaltum, in the third-story it shall be encaustic tile, and in the fourth and fifth floors the main floors shall be finished and varnished hard maple.

The roof is of cement.

The partitions throughout are built of steel studs and hard plaster.

The boilers, bakery, storeroom and electric light plant are located on the first or ground floor, the laundry on the second floor, the kitchens, pantries, dining-rooms and storeroom are located on the third floor, the help on the fourth floor and the nurses on the fifth floor.

There are toilet and bathrooms on each floor, and there is a passenger elevator from the first to the fifth floor.

The stairs throughout are fire-proof, being built of iron and slate enclosed in brick walls and carried up to the roof.”

Its use will greatly favor the administration of the Hospital in many ways, increase its capacity for both public and private patients, induce quiet and order in the house, in a large degree remove the element of danger from fire, and should reduce the cost of conducting it. The estimated cost of the building and connections complete is \$83,340.10. This is more than was originally contemplated. The money paid on account by the Treasurer, as per his report, was \$37,851.07, which amount has been increased since the date of his statement, and at present is \$43,086.07, all of which was subscribed

by Managers and friends, and I publicly credit Charles Lockhart, Esq., with the gift of \$25,000, and Messrs. James R. Mellon, Thomas A. Mellon, A. W. Mellon, R. B. Mellon, H. C. Frick, Fredk. Gwinner, Sr., S. S. Marvin, and Thomas M. Armstrong with \$1,000 each, and J. B. and M. L. Jackson with \$500. Most of these persons were already liberal contributors to the Hospital, and with Mr. Samuel Hamilton, have by their subscriptions of \$1,000 and upwards constituted themselves Life Managers of the Institution having "the right to nominate and send one patient to the hospital, *provided* the person so nominated shall be of the condition, and fall within, and comply with the rules that may be established for the government of the institution."

Several years ago the late Mrs. Anna R. Aspinwall conveyed to the Hospital in lieu of a gift of money, a piece of land in the 13th ward of the city of Pittsburgh, to be sold or used at the pleasure of the Board of Managers for the improvement or extension of the buildings. Accordingly the Board by resolution in May last directed the proper officers to execute a mortgage and negotiate a loan by which \$15,400 was made available towards the completion of the annex building.

Other contributions received by the Treasurer aggregated the sum of \$6,589.93, included in which amount was \$5,000 from Miss Julia and Miss Maggie Nelson to endow a bed in the Hospital in perpetual memory of their parents, William Nelson and Caroline, his wife. The impulse to honor the memory of the departed by monuments of bronze and stone is common to all mankind, but that impulse which establishes a memorial fund like this, which rests not night nor day in doing good to fellowmen in sorrow, and distress, partakes of the divine.

The Endowment Funds belonging to the Department for the Insane at Dixmont, are unchanged, and amount to \$23,000, but to them may properly be added the sum of \$3,000 held for investment, and which arose from the sale of a house and lot in Emsworth, given to the Hospital some years ago by Andrew Carnegie, Esq., in lieu of \$1,000 to constitute him a Life Manager of the Institution.

The Endowment Funds belonging to the Medical and Surgical Department of the Hospital were increased \$5,000, by the gift of the Misses Nelson, before referred to, and now amount to \$328,666.67. Owing to the maturing of certain investments, and for other reasons

deemed expedient by the Managers, sundry changes in the funds were made, all of which may be ascertained by an examination of the Statement of the Finance Committee prepared by the Treasurer and submitted with this report. Owing to litigation still existing between the Mercantile Library Hall Company and the Pittsburgh Library Association, the Hospital, which holds \$100,000 in bonds of the Mercantile Library Hall Company is an innocent sufferer by "law's delays" and its income has been cut off by the non-payment of nearly two years' interest, or \$10,000. Foreclosure proceedings were instituted more than a year ago, and judgment was secured, and the property covered by the bonds is up for sale in February next. It is considered ample security. I might also state that included in the aggregate of the funds above enumerated is the bond of the Pennsylvania Railroad Company for \$66,666.67, which bond was hypothecated to the Railroad Company as security for \$50,000 advanced to the Hospital in 1885, which transaction has been repeatedly explained in these reports till I presume it is now clearly understood. As some uncertainty exists as to the realization of this sum by legislative enactment—to which source alone the Hospital can properly look—an impairment of the funds to the extent indicated may ensue.

The Trust Funds of which the Hospital is the almoner are The Brewer Fuel Fund, \$77,367.30, and The Crawford Fuel Fund, \$15,000. Out of the earnings of these, 57,475 bushels of coal were purchased and distributed among the worthy poor of Pittsburgh and vicinity during the inclement weather of last winter.

It affords me great pleasure to acknowledge the valuable services rendered to the Institution by Dr. H. A. Hutchinson, the Superintendent of the department for the insane at Dixmont, and by Mr. C. S. Howell, the Superintendent of the medical and surgical department, in the city of Pittsburgh. Their administrations were marked by diligence and earnestness in the performance of all their duties; and I likewise recognize the services of their assistants, and also those of the Medical and Surgical Staff whose professional character, knowledge and skill go so far in establishing the enviable reputation of the Hospital throughout the State. And to the Executive Committee I am under the deepest personal obligations for courtesy and encouragement constantly rendered. No one can appreciate their disinterested labors in supervising and directing the operations of the Hospital as I can, and for the Board over which I have the honor to preside, I sincerely thank them.

In Memoriam.

With sorrow I chronicle the deaths of two members of our Board of Managers which occurred during the year.

HON. FELIX R. BRUNOT, a Life Manager and 1st Vice President, was born in Newport, Kentucky, on February 7th, 1820 ; died at his home in Allegheny, Pa., May 9th, 1898. When only a year old he was removed to Pittsburgh and the remainder of his life was identified with the history and growth of this community. He was a man of courtly bearing, dignified manner, tall and erect of stature, low voiced and undemonstrative, of disposition kind and genial ; an earnest christian and an evangelical churchman ; a leader in educational movements and in matters of moral reform ; a patriot who risked his life, endured hardships, suffered from disease and underwent imprisonment for his country's sake ; a sympathizer with the wronged, he served for four seasons as chairman of the United States Indian Commission and labored among the various tribes to correct their grievances and render them justice. He was a director in many institutions, and corporations, and was largely interested in the iron and steel industry. But as a philanthropist, his deeds of charity and benevolence blessed this world of ours.

In his will he bequeathed "To the Western Pennsylvania Hospital the sum of forty-five thousand dollars to build a separate department in the proposed new hospital building."

JAMES P. HANNA, another Life Manager, passed away on September 24th, 1898. He was born in Guernsey county, Ohio, but had been in Pittsburgh and in business since 1830. He was a conscientious, intelligent and successful merchant. Unobtrusive in manner, of a retiring disposition, a sympathetic nature possessed of generous impulses he bountifully distributed kindnesses and charities in his daily life, choosing to see the fruits of his unselfish philanthropy practically directed.

Since the close of the year and while engaged in preparing this report, information comes to me of the unexpected death of Mr. JOSEPH ALBREE in London, England, on November 7th. His home was in Allegheny, Pa., but he had been abroad in search of restora-

tion to health by the diversion of foreign travel. He became a Life Manager through the transfer to the Hospital of the Sanitary Soldiers' Home Funds of which he was a trustee, and he was active in establishing and conducting "the Home," and later in the reorganization of the Medical and Surgical Department of the Institution after its relinquishment by the United States government.

Very respectfully submitted,

JOHN A. HARPER,

PITTSBURGH, *November*, 1898.

President.

In regard to the J. C. Zweidinger mortgage of \$44,500, I have to report that it has been sold and assigned to the Bank of Pittsburgh, as authorized by resolution of the Board of Managers of October 7th, 1898, and the proceeds reinvested for the Endowment Fund.

The obligation of the Hospital, Bond and Mortgage, has been given to Susan E. Stoner, conditioned for the payment of \$15,400 in two years, with interest at the rate of five per cent. per annum, on that certain lot or piece of ground situate in the 13th Ward of the City of Pittsburgh, conveyed to the Western Pennsylvania Hospital by Anna R. Aspinwall. This was in accordance with the resolution of the Board of Managers of May 21st, 1898, authorizing the Executive Committee to borrow enough money to complete the new building for the Medical and Surgical Department, 12th Ward.

The investments of the Trust Funds have been changed on account of the City of Pittsburgh redeeming the Water Loan Bonds of \$12,000 belonging to the Brewer Fuel Fund, and \$12,000 to Crawford Fuel Fund. The same amount has been reinvested for each, with the ap-

proval of the Finance Committee, in the bonds of the Hostetter Connellsville Coke Company, as will appear in the list of securities belonging to the Brewer Fuel Fund and Crawford Fuel Fund.

M. W. McMILLAN, *Treasurer*.

NOTE.—In order to issue and pay warrants of the preceding month, the accounts of the Treasurer were not closed until October 15th, 1898.

We, the undersigned, the Finance Committee, appointed for the purpose, have carefully audited the accounts of Mr. M. W. McMillan, the Treasurer of the Western Pennsylvania Hospital, (Medical and Surgical Department,) and find them correct and satisfactory as above presented, showing a balance on hand October 15th, 1898, to be eighteen thousand seven hundred and eighty-five and $\frac{76}{100}$ dollars, (\$18,785.76.)

Endowment Funds.

*To the Board of Managers of the
Western Pennsylvania Hospital:*

GENTLEMEN :

We have examined and counted the securities belonging to the Endowment Funds of the Western Pennsylvania Hospital, in the possession of the Treasurer, Mr. M. W. McMillan, and found the same to be correct.

These consist of securities belonging to—

The Department for the Insane at Dixmont.

One Bond of the Allegheny Valley Railroad Company.....	\$ 1,000 00
Nine Bonds of \$1,000 each, of H. C. Frick Coke Company, First Mortgage Five per cent. Bonds.....	9,000 00
Thirteen Bonds of \$1,000 each, of Pittsburgh Junction Railroad Company.....	13,000 00
	\$23,000 00

Securities belonging to—

The Medical and Surgical Department of the Hospital.

One hundred Bonds of \$1,000 each, of the Mercantile Li- brary Hall Company of Pittsburgh.....	\$100,000 00
Two Bonds of \$1,000 each, of the Federal Street and Pleas- ant Valley Railroad Company.....	2,000 00
Six Bonds of \$1,000 each, of the Pittsburgh Traction Com- pany.....	6,000 00
Six Bonds of \$1,000 each, of the Citizens Traction Company,	6,000 00
	\$114,000 00

Amount brought forward.....	\$114,000 00
Eight Bonds of \$1,000 each, of the Borough of New Brighton, Pa., (Street Improvement).....	8,000 00
Five Bonds of \$500 each, of the Minersville Sub-School District.....	2,500 00
Twenty Bonds of \$500 each, Highway and Bridge, City of Johnstown, Pa.....	10,000 00
Three Bonds of \$1,000 each, Allegheny County Five per cent. Compromise Bonds.....	3,000 00
One Bond of Bessemer Steel Company.....	5,000 00
Bond and Mortgage of Wm. Roseburg, et al.....	10,000 00
Loan to Isabella Furnace Company.....	15,000 00

BANK OF PITTSBURGH STOCK :

One hundred and forty-five shares bequeathed, at the rate of of, say \$69 per share.....	10,000 00

REPORT

OF THE

Physician and Superintendent

OF THE

Department for the Insane at Dixmont.

REPORT
OF THE
Physician and Superintendent
OF THE
HOSPITAL FOR THE INSANE AT DIXMONT,

To the President and Board of Managers:—

GENTLEMEN :—In presenting to your Honorable Board, the report of the Hospital for the year ending September 30th, 1898—the forty-second annual report published of the Institution—I do so, fully appreciating the honor in being its Superintendent and the responsibilities attendant upon the fulfilment of so important a trust, and, it is with a confident hope that the information here given you may contrast favorably with the records of the Hospital for former years. Though the number of recoveries falls below that of other years, it has been most gratifying to the officers to note their progress and return to health and reason, and also the improved condition of so large a number who left our care, and more especially is this feeling intensified when we recall the large percentage of unpromising cases received, the greater number being brought to the Hospital when all other aid failed and the patient had abandoned all hope and fallen into that profound melancholy, tortured by merciless delusions—a victim of abject misery and despair. To witness from day to day, returning health and the joy of life and prospect of happiness spring up in their minds,—to see the gradual decline and disappearance of the many vagaries of a disordered reason followed by a healthy, normal intellectual condition is a coveted reward for the physician and the devoted and sympathetic nurse, and is one of the many incidents that go to make life among the insane attractive, and incite the noblest purposes of mankind towards his fellow man.

With the exception of a single casualty—a suicide—the usual quietude of the house has been uninterrupted. A few minor accidents, from time to time, have occurred, but, we have been spared the existence of any acute, contagious or infectious disease. The general health of the household has been remarkably good; this is more apparent when we consider the character of the admissions, many of them belonging to the chronic forms of insanity—some of them very aged and feeble and suffering also with various bodily diseases.

At the beginning of the year there were remaining under treatment in the Hospital, four hundred and fifty men and three hundred and thirty-seven women, or a total of seven hundred and eighty-seven patients. During the year two hundred and eighteen patients were admitted, of whom one hundred and twenty-one were men and ninety-seven women. The total number under treatment for the year was one thousand and five—five hundred and seventy-one men and four hundred and thirty-four women. Two hundred and twenty-five patients were discharged, leaving four hundred and forty-two men and three hundred and thirty-eight women, or seven hundred and eighty patients remaining in the Hospital at the close of the year. The average number of patients during the year was seven hundred and sixty-eight, the lowest number in the house seven hundred and twenty eight, and the highest number is recorded as being seven hundred and ninety-six.

Of those admitted, forty were upon request of friends, one hundred and three by order of the directors or overseers of the poor of the counties and townships, seventy-two upon order of the court, and three upon request of the State Committee of Lunacy. One hundred and sixty-eight were natives of this country, of whom one hundred and forty were born in Pennsylvania, forty-eight are of foreign birth and the nativity of two is unknown. Four patients were admitted under twenty years of age, thirty-three were between the ages of twenty and thirty years, sixty-two aged from thirty to forty years, fifty-two patients were between forty and fifty years, forty-three were from fifty to sixty years of age, the large number of eighteen patients were received over sixty years of age, three were over seventy, and three aged eighty years or over. One female patient was admitted for the eighteenth time.

In fifty-one cases some form of mental disturbance had been observed for a period of three months before the patient was brought to

the Hospital for treatment, in seventeen cases the duration of insanity is recorded as having existed for about six months prior to admission, in seventeen admissions the patients were reported as having been insane one year, while fifty-two patients were received who had been insane for periods varying from two to five years, twenty-five admissions show insanity as having been present from ten to twenty years, and in two cases the patients had been insane for thirty years or longer before being brought to our care. From these facts it would appear only sixty-eight admissions could safely be considered as acute forms of insanity, presenting, in some instances, the early or initial evidences of mental alienation, while in others the disease was well advanced and the prospect of recovery more difficult and remote. It is greatly to be regretted so many patients are kept at home through prejudice, and under the mistaken idea they can be better cared for there than in a hospital. This belief and fatal error upon the part of anxious friends has led to so many cases being deprived of all hope of recovery, and, in the end, consigned them to a life where simply custodial care and occasional medical advice is all their case would indicate. Thus, in one way, is the yearly increasing number of the chronic insane accounted for. Hospitals for the insane are primarily curative institutions and all proper methods should be employed in permitting the patient to receive from them those advantages which experience and skill teaches, particularly so in insanity as in no other disease should they be given early treatment.

One hundred and twelve patients, at the time of their admission, were suffering from one of the forms of mania, in eighty-five cases the varying degrees of melancholia were represented, eight patients were in a demented condition, eleven male patients were general paretics when admitted and two patients were classed as imbeciles.

Two hundred and twenty-five patients were discharged from the Hospital during the year, of whom forty were returned to their homes as restored, one hundred and fifteen as improved, four as unimproved, and sixty-six died.

Of the causes of death, it may be stated nine male patients died from the exhaustion of paresis, seven deaths are attributed to the exhaustion of chronic mania, six deaths resulted from the exhaustion of chronic dementia, four deaths followed the exhaustion from epileptic mania, in three cases death resulted from the exhaustion of chronic melancholia, and four patients died from exhaustion due to old age. Among the acute diseases may be mentioned four deaths

resulting from enteritis, one death following a severe attack of acute mania, two deaths occurred from the exhaustion following attacks of acute melancholia, two deaths from pneumonia and one death from apoplexy. Four women and three men died from consumption. Eight patients were over fifty years of age at the time of death, eight were aged sixty years or over, three were seventy years, and two patients aged respectively eighty-two and eighty-eight years. One patient had been a resident of the hospital twelve years, one sixteen years, two twenty-three years each and one thirty-three years.

It is my unpleasant duty to report one death by suicide—a male patient—who was found in his room in the evening lying upon the floor under the bed. Every effort was made to revive him but death followed in a few moments. While the patients were assembling for service in the chapel, he succeeded in eluding the vigilance of the attendants and cut his throat with a small piece of tin, severing the carotid artery. The Coroner and friends were immediately summoned and the fullest explanation given and a verdict was rendered by the jury in accord with the facts.

As an additional matter of interest regarding the character of those received during the year, may be mentioned the commitment to the Hospital, upon order of court, of four convicts from the Western Penitentiary and four convicts from the Allegheny County Workhouse. These men truly represent the dangerous classes of the insane, possessing robust health, and with that daring, cunning sagacity whose insane impulses are aggravated by their low and depraved moral instincts and combative natures which has rendered them most objectionable associates among innocent patients and a constant source of anxiety in their frequent breaches of discipline to the lives and security of their attendants. In a former report to your Board the question of caring for this class of patients and their detention in some suitable building designed solely for their accommodation, also the evils resulting from the present methods employed to which the Hospital is compelled to submit, by the courts, was freely commented upon, and I yet hope that those into whose hands the charities of this State are intrusted, may soon place Pennsylvania, at least in this particular, upon an equal footing with the more progressive States.

A distressing case received was that of a male patient from Westmoreland County, who had been chained to the floor of his room for sixteen years.

On November 10th, 1897, eight men and three women were discharged from this Hospital by order of the State Committee of Lunacy and transferred to the Asylum for the Chronic Insane, at Wernersville, Pa.

Under the "County Care Act," thirty-three men and twenty-three women were discharged from the Hospital February 23rd, 1898, by order of the State Committee of Lunacy and taken to the Department for the Insane of the City of Pittsburg, at Marshalsea, Pa. Also two male convicts, chargeable to the City of Pittsburg, upon request of the State Committee of Lunacy, were by order of court, March 21st, 1898, transferred to the same department.

I have to report but two escapes during the year, both male patients, who, presuming on the liberties given them by their attendants, escaped from their care while out walking in the grounds. Both of these were convicts, one had quite recovered and was awaiting an official order from the court for his release, and the other a harmless man, though possessing sufficient intelligence to permit him to make his way in the world. Considering the fact that during the summer months, more than three hundred men are daily engaged in some occupation upon the farm and grounds surrounding the buildings, very frequently being a mile or more away from the house, it is a matter of surprise how few escape and how few accidents really occur. In both these instances the fault lay in the neglect and carelessness of the attendants in exercising proper vigilance, as the rules of the Hospital provide.

From the date of the opening of the Hospital and the reception of the first patient within its doors, April 7th, 1856, eight thousand three hundred and sixty-five patients have been admitted, of this large number, two thousand three hundred and eighty-five were discharged restored, two thousand three hundred and six as improved, eight hundred and twenty-six unimproved, and two thousand and sixty-eight died. The question is frequently asked, "How many of these patients are returned to the hospital?" and, while the records are conflicting and do not show accurately the number of those returned who were formerly discharged cured, they do show but a small proportion, particularly of those who upon their first admission were undergoing their first attack of acute insanity. One thousand and fifty-eight patients therefore, have been readmitted to the hospital once, one hundred and eighty-two for the second time, and forty-three for the third time. A number also have been returned to our care, several times each. Of

those remaining in the house at the close of the year but one hundred patients, it is believed, can safely be regarded as curable cases. To those interested in this great charitable work, whose sole aim is one of love and sympathy in their affliction, whose noble purpose is to elevate and brighten their darkened lives, and lend those influences that tend to their restoration of health of body and the appreciation of their moral obligations in life and the exercise of those highest attributes of the human mind, which through abasement, it may be, and disease have fallen into a state of degeneracy; to the student, whose cold research and earnest desire for information and a more intimate knowledge of the subject is prompted by the dictates of science alone, and to the citizen and taxpayer, whose attention is directed purely to the financial management of such institutions, the statistical tables and statements connected with this report present not only those questions which have thus far been commented upon, but also many other items of more than passing notice. The records of the Hospital have been kept with much care and are as accurate in their compilation as the history of each individual case would warrant and, to the careful reader, therefore, they are most interesting and instructive.

The broad and liberal spirit, so characteristic in the management of the Hospital in former years, has again prevailed during the year just closed. With an untiring energy those gentlemen, to whom your Board entrusted its oversight, have exercised the greatest possible care in their supervision of its every department, every question relating to the policy of its administration has received from them thoughtful consideration and the benefit of their business training and mature judgment. With that singleness of purpose before them, they have sought to place the Hospital upon that high plane of usefulness, with its standard of efficiency and power for good an example of the modern equipment, intelligence and experience can bestow upon the insane. In addition to their many duties of a purely business character, as the work of devising and directing the many improvements continually going on require, their time has been freely given to visiting the wards, conversing with the patients and interesting themselves in all that pertains to the promotion of their happiness and welfare.

The training school established two years ago has been continued with unabated enthusiasm by the medical staff, the lectures have been prepared with much care and the course of instruction and teaching made as comprehensive, and the requirements for graduation as

exacting as our facilities would permit. We have also been aided by a number of physicians from Pittsburg and vicinity, who cheerfully consented to assist us, and whose lectures have contributed largely to the success of the school. On the evening of May 6th, 1898, the Second Graduating Exercises were held, and diplomas awarded by the President to seven successful candidates—six young women and one young man. The many advantages to the Hospital from this feature of its management become more apparent each year; its influences are seen and felt in every department—they cannot be overestimated—and it is most gratifying to the officers to feel the expectations so confidently predicted in its establishment are now more than realized.

Necessarily the medical and scientific work of the Hospital has been much the same as in former years, though constant endeavor has been made to enlarge the scope and usefulness of these adjuncts in the general treatment, in extending and applying such remedial measures as special cases would warrant and where they were deemed expedient. The system of daily reports and notation of symptoms of all cases requiring, at the time, medical supervision has been conducted in a thorough manner affording the patient a moral restraint in his protection and freedom from the impulses of a disordered will and in bringing into closer personal relations those opportunities for the more careful and detailed study of the case. Experience teaches it is the individual treatment and personal contact of the physician with the patient that accomplishes more than all other means combined to hasten recovery, and it is deplorable the crowded condition of our wards conflict with this method in so large a measure. The various new remedies, those whose qualities and definite physiological action have been thoroughly tested and ascertained were employed and, in the female department, local examinations and a number of important surgical operations conducted in the hope of relieving certain disorders. A most important feature has been the examination for eye troubles and their correction in the proper adjustment of glasses where necessary and the consequent relief of much mental irritation and nervous excitability.

The usual amusements and means of recreation which also fill a most important place in the actual treatment of the insane were encouraged, as well as various occupations for those who could engage in some employment. A large number of men were engaged in outdoor work, caring for the lawns and roads, assisting upon the farm, etc., while many of the women patients were occupied in the general

work of the house, in the laundry and sewing rooms, making fancy work, etc. Those of our patients who were able to so occupy themselves were, during the pleasant weather, kept in the open air, walking and driving and enjoying the beautiful scenery always surrounding them. Within doors, the evenings were passed pleasantly in reading, games, and attendance upon the concerts, plays, lectures and parties given in the chapel. Many of the patients were also given an opportunity of visiting the city to do their shopping or visit the theatres and enjoy some entertainment in which they were particularly interested. The Holidays were appropriately observed, and on Sunday, some form of church service was conducted in the chapel to which the entire household is invited. The exercises are plain in their character and are a source of great comfort to a large number of our patients, especially the older members, and those accustomed to religious training in their homes. I regret, exceedingly, our chapel is so small as to often deprive a larger audience attending these services as well as compelling many to thus remain away from entertainments during the week.

In an institution of this magnitude many improvements, as well as repairs, are continually going on in the house and departments, in order that the buildings, their furnishings and equipments may be preserved from the wear and tear of age, as well as to enable them to meet all the demands upon them by an ever increasing population. The necessity and expense of very much of this work, however, is occasioned by the destructive tendencies of so many of the insane. The year past has been a busy one in this particular, and several important improvements long held in contemplation were pushed forward and finished; the most noteworthy was the construction of a large filter crib in the Ohio river to which the influent pipes leading to our pumps were connected, thus affording an abundant supply of clean river water to the hospital for all purposes; the brick tower, erected for sanitary accommodations, at the end block of the men's department and begun at the close of last year, is now completed and is a most decided addition to the comforts of the patients; the bath rooms are commodious, warm, and well lighted, and the building absolutely fire-proof in its construction with tile and plate-glass floors. The foundations for a similarly constructed building at the west end of the women's wards are completed, and we hope to have the building erected and finished during the coming year. In that portion of the center building occupied by the employes of the laundry and domestic departments, the floors were entirely replaced by new hardwood

floors and the rooms and hall throughout repainted and renewed so they now are very attractive and tasty in their appearance ; also maple floors were laid in three of the wards.

Forty-two new iron beds to replace those worn out, were placed in the women's wards for untidy patients. In the basement of the executive building, a fire-proof room or vault was constructed for the safe-keeping of the records, books, papers, and valuables belonging to the Hospital.

The frame building known as the Infirmary, and situated upon the hill in the rear of the main building, is greatly improved in its appearance by the erection of two spacious porches, thereby permitting the patients an opportunity to go out of the house at all seasons of the year and enjoy the fresh air and to overlook the beautiful valley below.

In order to overcome any possibility of shortage in our spring water supply, the large spring upon the hillside up Tom's run was connected into our spring water system. This work was done at a small cost by the patients and secures to the Institution, its departments and dwellings upon the property a permanent and abundant supply of fresh water for drinking and cooking purposes.

Early in the year it was deemed advisable to drill another well for natural gas with the hope of replenishing our supply of fuel under the boilers and, from the fact, the old wells drilled some years ago on the farm showed evidences of becoming exhausted. At a depth of 1,800 feet, gas in sufficient quantity was found to warrant the piping of it into the mains and, except in extremely cold weather, it is thought our supply is now sufficient, if economically managed. During the year also, the rebuilding of our gas retorts became necessary to replace the old ones which, through time and long continued use had become completely worn out. This work is still progressing though near completion.

Upon the farm a number of fruit trees were planted, also a number of ornamental trees on the lawns and along the driveways.

The total cost of maintenance for the year was \$168,468.97, which you will observe includes every item of expenditure, and is but little in excess of former years, though it must be remembered this sum was very materially increased the past year owing to the unusual number of extensive improvements and repairs, already alluded to, and their necessary large expense.

The principles laid down by the founders of the Hospital at a meeting held April 20th, 1847, "*That the Institution is intended to be a Hospital, and not a permanent asylum for poverty or decrepitude,*" have been severely tried by reason of conflicting laws which tend to discourage and destroy the aims and purposes of those noble men, who, at that day, were living far in advance of the times. The patients committed to the Hospital have received every attention an intelligent and well directed philanthropy could devise to promote their recovery, and economy and prudence in the expenditures have been exercised, so far as may be consistent with the views now held in the modern treatment of the insane. It is hardly probable that patients who under the present enactments of the State may be transferred from the hospital to a self-supporting establishment or to departments of county almshouses can have the same care and medical treatment, and enjoy equal privileges and benefits as those to be had in a specially equipped and organized hospital for the insane.

The report of Mr. Wm. Knoderer, the farmer, shows this department to be in excellent condition. Throughout the season, the farm and grounds presented an inviting appearance, the lawns, roads and fences were kept in order, and the vegetables and fruit were more than sufficient to meet the needs of our large household. The dairy, comprising fifty head of beautiful cattle, yielded an abundant milk supply, and the garden and greenhouse contributed to ornamentation of the grounds and in the beautifying of the wards with cut flowers and plants. My thanks are especially due Mr. Knoderer for his energy and capable business management in this department of hospital work. A no less responsible position has been that of Mr. George M. Gray, so many years our efficient engineer, under whose charge the superintendency of all machinery, including the gas and waterworks, is included and which reflects much credit upon him for their satisfactory condition and excellent discipline of his department.

I am not unmindful of my deep sense of obligation to the nurses whose positions are, at all times, trying and irksome and whose resources of body and mind are often taxed to their utmost in caring for those committed to their care; and to their faithful ministrations must be attributed much of whatever success we have attained the year now past. To the employes, whose duties though less responsible fill an important place in the management of this large Institution, I also return my sincere thanks at this time, for their earnestness in attending to the work assigned them.

During the year the Institution lost one of its most faithful and trusted employes, Mr. James Wallace, whose death occurred quite unexpectedly May 7th, 1898. He had been in the employ of the Hospital for a period of twenty years, and by his interest and devotion to the duties assigned him, made his loss one to be felt by all.

On December 1st, 1897, Mr. George M. Kunkle, who had occupied the position of assistant engineer so many years, resigned, and his place was filled by the appointment of his brother, Mr. Stephen Kunkle.

Mr. James H. Mann still occupies the very responsible position of "purchasing agent" for the Hospital. His duties are at all times, onerous, requiring long hours in attending to the many details of watching the markets and protecting the Hospital at the right moment in the purchase of its supplies. To Mr. Mann, Mr. Robert K. Allen, clerk, Miss Eliza H. Hope, supervisoress, Mr. Alexander W. Morrow, supervisor, Miss Jessie McCrum, laundress, and Miss Martha F. Black, housekeeper, I offer my feelings of gratitude for the able and conscientious manner in which they have presided over their departments.

With one exception, my associates upon the medical staff are the same as last year. On November 14th, 1897, Doctor Elizabeth C. Mallison resigned to engage in general practice and was succeeded by the appointment of Dr. Esther L. Blair, of Philadelphia, November 23d, 1897, who came to the Hospital with the highest testimonials from prominent physicians of that city, and to each of my associates I cordially extend my thanks.

To you, Mr. President, and gentlemen of the Board of Managers, and members of the Executive Committee, I am most of all grateful for your official as well as personal kindness to me at all times in the discharge of my duties, which, without your assistance, would have been doubly laborious.

Again commending the Institution to the watchful care of that same kind Providence that has guided and given to it prosperity in the past, I respectfully submit this report.

HENRY A. HUTCHINSON.

DIXMONT, PA., *October 1st*, 1898.

Acknowledgements.

It is with much pleasure I realize the many friends of our patients have not forgotten our dependent household but so generously remembered them during the year. These acts of kindness are appreciated by the officers and have done much to make the Hospital more home-like and the lives of the patients brighter and happier.

To Prof. W. M. Stevenson and friends; Mr. and Mrs. Jas. Porter; Mr. and Mrs. Beal and Madame Heinsohn; the Misses Bender, Mrs. J. H. Wright and friends; Mr. S. H. Holliday and friends; Prof. Gittings, Mrs. Brennan, and Mr. Von Kunits; The Pittsburg Orchestra and Dr. Todd; The Emsworth Choral Union and Prof. Tidball; Miss Olive Paulin and friends; Mrs. Makinson Godowski and Mr. Paffenbrock; Mr. Robert T. McDowell, Mr. Boyd and friends; Mr. E. H. Dermitt, Mr. and Mrs. Conners, the Misses Reaherd and Miss Etta Kiel; and Mr. Chas. F. Workmaster and friends, we are indebted for many evenings passed most delightfully in listening to their beautiful concerts.

To Mrs. Helen Stuart Richings and Mr. George Kiernan we are under renewed obligations for two entertainments consisting of readings, impersonations, stories, etc.

A large Orchestrome Regina music box was purchased for the Hospital by the Executive Committee and placed in the chapel, and Mr. Samuel Hamilton presented us with a Gramophone. These instruments have been a great source of pleasure and amusement to all.

During the year we received newspapers, books, magazines, illustrated weeklies, &c., from Hon. Charles C. Townsend, Mr. Henry G. Hale, Mr. T. H. B. McKnight, Mrs. Neal, Mr. Samuel Severance, Jr., Mr. A. B. Starr, Mrs. Sauvageot, Mr. Harry Darlington, Mr. Thomas H. Lane, Mrs. George P. Rose, Mrs. J. W. Atcheson, "The King's Daughters" of the Sixth U. P. Church of Pittsburg, Mr. F. E. Schenck, "The American S. S. Union," Mrs. Euwer, Rev. U. S. Greaves, Mrs. Chas. B. McLean, Mr. A. D. Wilson, Mr. Chas. Hays,

Mr. R. G. Smith, Mrs. Oliver Shannon, Mrs. Linhart, Mr. H. Leon Hutchinson, and the United Presbyterian Board of Publication. The Hospital also received a large number of daily and weekly newspapers.

Mrs. Fred. Linke, Col. E. E. Zeigler, Miss Pauline Moller, Messrs. Reymer Bros, and Messrs. Dilworth Bros. remembered the patients in a substantial manner Christmas. To Mr. C. E. Ludwig we are indebted for a large box of cut flowers, and to Mr. John Zimmerman for one dozen Wisterias. Mr. John A. Harper presented the Hospital with a large variety of flower seeds given him by a friend in London.

To Miss Jean Hamilton, of Allegheny, we are especially indebted for a most enjoyable evening in witnessing the fancy dances given by the pupils of her school. Prof. Simeon Bissell also presented the opera "Le Zingarelli" by his class, pupils of Curry University.

From the United Presbyterian Board of Publication, the Hospital received seventy-six bound volumes of "Bible Songs" for use in our chapel services on the Sabbath.

On June 23rd, 1898, a "flag raising" took place, the gift to the Hospital from the Executive Committee.

To our friend, Prof. James P. Brooks, we are again placed under obligations for his valued assistance and patience in conducting our weekly dancing classes during the winter months, and also to Messrs. Toerge Bros. for the beautiful music furnished by them for our parties, and to my assistant, Dr. Blair, in directing the lovely entertainment given us in the presentation of the Minuet and May Pole dances by a number of our young ladies. A number of evenings also were passed most pleasantly in listening to a musical program arranged by the "Artists" of the Hospital, consisting of vocal and instrumental music and recitations.

To the Hon. John B. Jackson, we are indebted for an address given to the nurses at their graduating exercises, May 6th, 1898, and to Hon. Robert D. McGonnigle for addressing the class on the evening of October 4th, 1898.

BEAVER,	GREENE,	LAWRENCE,	WESTMORELAND,
BUTLER.			

Admission of Patients to Insane Department.

1. Preparatory to the admission of a patient, unless when committed by order of a court, the Superintendent shall be furnished with the certificate of two physicians, who have been in practice for five years or more, that they have separately seen and examined the individual within two weeks of the date of admission, and believe him or her to be insane, and these certificates shall be sworn to before some alderman or judicial officer, (the oath before a notary public is illegal) with the order of near relative or friend that the patient may be received into the Hospital, with a statement as required by law, and a bond with satisfactory security, for the payment of board and other expenses while in the institution. All private patients thus received shall make a payment of thirteen weeks' board in advance, when brought to the Hospital, no part of which shall be refunded; and if taken away uncured, and against the advice and consent of the physician, in any succeeding quarter, no part of the payment shall be refunded.

2. Whenever a patient is sent to the Hospital by order of the Court, the order or warrant, or a copy thereof, or, if sent by the Directors of Poor, an order sent by the Directors or their agent accompanied by the Certificate of Insanity, as required by law, shall be lodged with the Superintendent of the Hospital.

3. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

4. Each male patient shall be provided with at least three new shirts, a new and substantial coat, vest and pantaloons, three pairs socks, two pairs drawers, two undershirts, a hat or cap, cravat, collars, handkerchiefs, shoes, and one pair of slippers.

5. Each female patient shall have three calico dresses, four chemises, three pairs drawers, three pairs hose, three nightgowns, two flannel skirts, one Balmoral skirt, two muslin skirts, six handkerchiefs, four collars, two pairs shoes, one shawl or cloak, and one hat or hood.

6. It is very desirable that extra and better apparel should be sent with those accustomed to it, that when their health is improved, or when they attend religious worship, walk or ride out, their self-respect may be preserved.

In all cases the patient's best clothing should be sent; it will be carefully preserved and only used when deemed necessary for the purpose above mentioned.

Jewelry, and all superfluous articles of dress, knives, &c., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

All clothing, if not taken away at the time of patient's removal, or within three months afterward, will be disposed of as the officers of the Hospital may think best, and no compensation whatever will be made therefor.

7. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him or her to the Hospital, and from whom minute, but often essential particulars may be learned. All women patients must be accompanied to the Hospital by some female friend as required by law.

8. The price of board, including washing, mending, and attendance for all who are supported at the public charge, is \$3.75 per week. For private patients, or those supported by themselves, or their friends, the price varies from five to ten dollars, according to the trouble and expense incurred, and according to their ability to pay. Higher prices are paid by special agreement with the physician, for extra attention and accommodation.

Payments are to be made quarterly, in advance.

9. A bond, with satisfactory sureties, will be required for the payment of the board and expenses, for the removal of the patient when discharged, of all persons, excepting those sent at the expense of the counties or townships.

Those who bring friends should be prepared to give a bond, and, if strangers, furnish evidence of their responsibility.

10. All bills remaining unpaid one month after date of presentation, are placed in the hands of the Solicitor of the Hospital for collection.

11. As the diet of the patients is under the absolute control of the Superintendent, no nuts, candies, cakes or other edibles shall be given to the patients, by their friends or visitors, without his express permission.

12. Visitors are admitted to inspect the Institution on any day (except Sunday,) between the hours of 10 A. M. and 12 M., and between 2 and 4 P. M.; but no visitor shall be admitted to the wards occupied by patients, without express permission from the Superintendent; and especial care is to be taken that no amount of visiting is permitted that shall prove injurious to the patient. No visitors shall be admitted on holidays.

Visitors will please not intrude on the grounds used by the patients, or give to or receive anything from patients.

13. The Hospital is located eight miles west of Pittsburgh, on the Pittsburgh, Fort Wayne & Chicago Railway, at Dixmont, and can easily be reached by cars, there being ten trains (east and west) each day, (except Sunday,) stopping at the Hospital Station.

14. Applications for the admission of patients, and all communications in regard to the condition, health, bills, &c., of those who are in the Hospital, shall be made to the Superintendent.

15. As Dixmont Station has now an Adams Express Office, all goods may be sent to the Hospital direct by express or freight, as may be preferred.

16. The friends of patients can communicate with the Institution by telegraph and telephone.

Forms of Commitment.

The following forms have been prepared by the Committee on Lunacy, to be used in all cases (except those sent by order of Court) for the commitment of insane patients by their friends or by Directors and Overseers of the Poor, to the Hospital for the Insane, at Dixmont, Pa. No such patients will be received unless the forms as given are fully complied with.

Order for the Reception of a Patient.

I, the undersigned, hereby request you to receive.....
an insane person, as a patient into your Hospital, believing that such
detention is necessary for his..... benefit. Subjoined is a statement re-
specting the said.....

(Signed)
Occupation.....

Degree of relationship (if any) or }
other circumstances of connection }
with the patient. }

Dated this..... day of....., one thousand eight
hundred and ninety-.....

To.....

Superintendent of Western Pennsylvania Hospital for the Insane, at Dixmont, Pa.

Physician's Certificate.

We, the undersigned, residents of Pennsylvania, hereby certify that
we have within one week prior to the respective dates hereinafter men-
tioned, at*....., in the county of....., separately exam-
ined of†....., and do verily believe that
the said..... is insane, and that the disease is of a char-
acter which in our opinion requires that person shall be placed in a
hospital or other establishment where the insane are detained for care
and treatment.

We further certify that we have been actually in the practice of medi-
cine for at least five years, and that we are not related by blood or mar-
riage to the said....., nor in any way connected as a medical
attendant or otherwise with the hospital or other establishment in
which it is proposed to place the aforesaid.

10. A statement of the time at which the insanity has been supposed to exist, and the circumstances that induce the belief that insanity exists.....
11. Name and address of all medical attendants of the patient during the last two years.....

(Signed) Name.....

(When the person signing the statement is not the person who signs the order, the following particulars concerning the person signing the statement are to be added, viz :)

Occupation, (if any).....

Residence.....

Degree of relationship, (if any), or other circumstances of connection with the patient.

LUNACY LAW OF 1883.

NOTE.—The certificate must be signed by at least two physicians, and made within one week of the examination of the patient, and within two weeks of the time of the admission of the patient, and shall be duly sworn to or affirmed before a judge or magistrate of the Commonwealth of Pennsylvania, and of the county where such person has been examined, and who shall certify to the genuineness of the signatures, and to the standing and good repute of the signers.

And any person falsely certifying as aforesaid, shall be guilty of a misdemeanor, and also be liable civilly to the party aggrieved.

When patients are sent by order of Directors or Overseers of the Poor, they shall, in addition to the foregoing papers, fill up the following Order of Admission as required by the rules of the Hospital :

W. P. HOSPITAL FOR INSANE AT DIXMONT, PA.

Will please admit the within named.....as a patient to the hospital, and charge the..... of the.....Pennsylvania, and we hereby covenant and agree for ourselves and our successors in office, that we will well and truly pay or cause to be paid, to the said Hospital, all the expense of the care and maintenance, and of the removal to and from said Hospital of said patient, quarterly, from this date, and in the event of death, while in said Hospital, we and our successors in office agree to pay the funeral expenses of said patient.

ANNUAL REPORT

OF THE

MANAGERS

OF THE

Western Pennsylvania Hospital.

To the Honorable President and

Members of the Board of Public Charities :

GENTLEMEN—Representing the Board of Managers, I most respectfully submit the report of the “WESTERN PENNSYLVANIA HOSPITAL,” for the fiscal year ending September 30, 1899, a year eventful in the matter of faithful work and good results, in both the Medical and Surgical Departments, Twelfth Ward, Pittsburgh, and the Insane Department, Dixmont. It is safe to say that both departments are in as good if not better shape and condition than any previous time in our history. The work of each has been enlarged and expanded ; the increased duties performed without friction and happily no internal troubles requiring any action on my part.

The medical and surgical department, Pittsburgh, received and treated 2,864 patients at an aggregate cost of \$107,555.12, or a per capita per diem of \$1.84. The number of deaths 196, was an apparent percentage of 7+ but, when you deduct the 88 deaths of persons brought into the hospital in a dying condition (the death of whom occurred within a few hours after their arrival), it is found the actual percentage is only 4+.

The receipts from all sources were \$106,018.16, of which \$38,023.63 were from pay patients. The work of this department was, and is still, hampered by reason of the fact that our appropriation was reduced \$6,000 a year. This reduction comes the harder in view of the

increased demands upon the resources of the hospital by charity patients; also on account of the rapid rise in the cost of provisions and hospital supplies.

Dixmont during the year treated 1,035 patients at a cost of \$175,043.50. The health of patients was unusually good, only 75 deaths taking place, and the work done by those in charge of the patients excellent.

Concerning the details of operation, the incidents of interest, the financial exhibits of each department and such other matters of detail as may be subjects of inquiry, I refer you to the facts and figures assembled by the respective superintendents of the two hospitals.

I am constrained, in view of obtrusive facts, to repeat what my predecessors in office have always asserted: that in the instance of each institution, the provisions for the maintenance and comfort of patients are altogether inadequate and uncomfortable. This is especially true of the medical and surgical department. The buildings in this instance, are those erected a half century ago, which, with the exception of the repairs naturally necessary, remain as they were originally constructed. Notwithstanding the great disproportion between the conditions of population in 1850-51 and those in 1899-1900, the authorities of the hospital have exerted themselves to find compensating factors and have measurably succeeded. There are, however, limits to endeavor, which limit, I fear, we have about reached. Larger and better facilities must be provided as well as the accessories to the work of looking after the sick and injured. The state of Pennsylvania has been liberal but with the increase of patients must come a larger liberality. In this department 1,000 patients have already been taken care of between October 1, and December 31, 1899, and if this ratio continues 4,000 will have to be attended to this year. These are all indoor patients, the hospital not being in a position to maintain an outdoor department, although there are daily, hourly demands for prescriptions and dressings for injuries too slight for hospital confinement.

Dixmont is also crowded and with the criminal insane sent to it by the courts of the counties of Western Pennsylvania, an element of undesirable insanity is thrust upon this institution. The state should by all means take measures to properly provide for the maintenance of this class of criminals.

Early last year the affairs of the Library Hall Company were settled and closed up and about \$100,000, which the medical and surgical department had invested in its bonds, together with an arrearage of interest amounting to \$13,406.64 returned to the custodian of the securities of the institution. By resolution of the General Board \$8,406.64 was placed to the credit of the new building fund and the remainder, \$5,000, was turned into the maintenance fund. The Supreme Court of Pennsylvania having affirmed the validity of the will of Mrs. Aspinwall, who had devised several acres of land in the Thirteenth Ward, to the medical and surgical department, a sale of this land was concluded to R. B. Coyle, Jr., for \$22,000. This sale carried with it the Stoner mortgage of \$15,400, and the right of the hospital to damages consequent upon the encroachment of the Grant Boulevard on this property by the city of Pittsburgh.

In Memoriam.

It is with more than ordinary regret we note the deaths of the following persons, Life Managers and friends of the hospital.

THOMAS A. MELLON, a Life Member, son of Hon. Thomas Mellon, and a member of the banking house of T. Mellon and Sons, died January 26, 1899. Mr. Mellon was one of the unobtrusive members of the General Board but always helpful, resourceful and responsive in the emergencies of the medical and surgical department. The quality of his citizenship was of the purest and most patriotic, and his business methods were characterized by an intelligence and forcefulness rarely encountered. His philanthropy was well considered and always helpful.

SAMUEL MCKEE, one of the earliest contributors and one of the oldest Life Members of the hospital, passed away December 4, 1899. Mr. McKee was born in Ireland, more than 77 years ago, and in youth came to Pittsburgh to duplicate and parallel the history of so many young Irishmen who have become a part of the "web and woof of our citizenship." In his personal life, in his long and useful business career, in his domestic relations, in his intercourse with men,

he typified the ideals in all of them. He was just, generous and philanthropic. His business acumen very early in its history distinguished the Twelfth Ward hospital as one of the proper places for giving expression to his philanthropy, and together with his good wife, he continued this work until death came upon him. Not a ward in the hospital, but bears some memento of Mr. and Mrs. McKee's thoughtful kindness. He was one who in every particular "loved his fellow man," and testified to that love in the most helpful, substantial manner. His wife survives him to continue alone those "labors of love" they so harmoniously carried on together for nearly a half century.

MRS. FELIX R. BRUNOT, herself a benefactress of the medical and surgical department of this institution and wife of the late Hon. Felix R. Brunot, who was connected with it from its very start, died at her residence Stockton Ave., Allegheny, November 2, 1899. This admirable couple, childless, took to themselves as one great family the worthy institutions already existent and cared for them substantially, helpfully, nobly. They went farther—they created new and necessary homes and hospitals, and placed them upon their feet to bless and succor the sick, injured and wayward of humanity. This was the life work of one, of both. They understood not only the genius of philanthropy, of humanity but the genesis as well. They were not hampered by city and country lines. They were examples for the world. The white man, the negro, the indian, furnish examples of their intelligent helpfulness. Mrs. Brunot continued the work she had conducted with her husband in his lifetime scarcely a year until she was called. That year was fraught with results of good for all.

CAPT. JACOB JAY VANDERGRIFT, a prominent citizen, a practical philanthropist and an enterprising and energetic promoter of the material interests of Pittsburgh, passed away suddenly December 27, 1899. He was born in Pittsburgh nearly 73 years ago, and none of its many vigorous and resourceful citizens surpassed Capt. Vandergrift in liveliness of interest and energy of action. His whole life, extending as it did, over three quarters of a century, was passed in Pittsburgh and Western Pennsylvania, and the factories, buildings and visible evidences of his enterprises, remain as monuments to it, and himself.

Capt. Vandergrift was for many years a Life Manager of the medical and surgical department and always had a hearty interest in its progress.

Very respectfully submitted,

ROBERT PITCAIRN,

PITTSBURGH, *January*, 1900.

REPORT

OF THE

Physician and Superintendent

OF THE

Department for the Insane at Dixmont.

REPORT
OF THE
Physician and Superintendent
OF THE
HOSPITAL FOR THE INSANE AT DIXMONT.

To the President and Board of Managers:—

GENTLEMEN:—With the close of another year it again becomes my duty and privilege to present to your Honorable Board a concise statement of the affairs of the Western Pennsylvania Hospital for the Insane, at Dixmont. The report has been prepared with the usual care and shows the present condition of the hospital in all its varied interests and departments and the work it has accomplished. Nothing of an unusual or unpleasant character has occurred to disturb its progress and harmony, its usefulness and sphere in charitable work has broadened and to-day the hospital stands as a mighty power in this community for the relief of those who, bereft of health and reason, are compelled to seek its sheltering care. The patients have been well clothed, comfortably housed and watched over with zealous care by the officers and nurses whose ministrations have in no small degree contributed to their contentment and happiness, in improving the condition of so many and in the return of so large a number restored in health to their homes and friends. No worthy applicant for admission has been turned away and, though the wards are crowded beyond all established rules of hygiene and even, at times, in the sacrifice of personal comforts, the doors of the hospital have stood open to receive the poor from all classes, as well as those more fortunate in this world's possessions, and has afforded them a security and protection from the persecutions of a disordered mind and, in relieving the anxiety and suffering of friends at home. Many patients were brought to us, however, as a place of last resource, suffering from long continued organic mental disease, incurable, and to whom we could

extend no hope. Others were brought to our doors for various reasons whose presence at home, through age and infirmity, had become a burden to their children. These patients but serve to increase our death rate, and while the hospital could bestow upon them only that custodial care their individual necessity required, it could not return them that love and affection which should be theirs from those nearest them. Many of the patients admitted were in a wretched condition of bodily health, suffering from various complications in addition to their nervous troubles,—some were very feeble and aged who with proper care, could have been kept at home. A number came to the hospital from the county jails and lockups, dreadfully bruised and wearing restraint, such as the camisole and hand cuffs, while quite a large number, both men and women, were brought to the hospital under the influence of drugs and intoxicants.

A very large proportion of the patients represent the lower or lowest walks of life. Under these adversities, however, the health of our large household has been remarkably good. We have been spared the presence of any acutely contagious disease and, with a single exception, any serious accident. During the early summer months, when small-pox was so prevalent in this portion of the State, several cases occurring in the neighboring boroughs of Emsworth and Neville Island, a thorough vaccination of all patients and employes was ordered and a rigid quarantine enforced during the period of danger.

The total number of patients in the hospital at the beginning of the year was seven hundred and eighty; since then two hundred and fifty-five patients were received, making the total number under treatment during the year one thousand and thirty-five. Two hundred and thirteen were dismissed or died, there remaining in the hospital at the close of the year eight hundred and twenty-two patients. The daily average number of patients in the house was seven hundred and ninety-five, the lowest number was seven hundred and seventy-seven, while the highest number attained was eight hundred and twenty-four. Of those discharged but sixty-five were regarded as restored, which is a very small percentage of recoveries based upon the unusually large number of patients treated. As has been shown you in former reports, the failure to return a larger number of patients to their homes restored, cannot be attributed to the hospital, but the laws which now control and govern the admission of patients. Under the recent enactments of Pennsylvania or County Care Acts, bearing upon this question, the hospital does not receive the same proportion of acute cases as formerly. These cases, together with the

milder or less disturbed forms of insanity, are now treated in the various insane departments of the county almshouses until they become troublesome or pass beyond the period of curability when they are transferred to the hospital. The same is equally true whereby the various poor authorities are permitted to remove or transfer the better class of their patients from this hospital to the almshouses, allowing the untidy and destructive of their number to remain in our care. By this procedure it is thus seen the number of recoveries must, of necessity, fall below that of former years.

I must again direct the attention of your Honorable Board to the admission of four patients during the year, three men and one woman convicted upon the charge of murder, who were sent by the courts to Dixmont on the ground of supposed insanity existing at the time of the commission of the crime. These patients are degenerates, whose base instincts and purposes render them a dangerous and demoralizing element in the wards of an asylum. The hospital has now thirty-five such patients—many of them homicidal and extremely dangerous, requiring the utmost care and vigilance upon the part of their attendants, to avert serious accident, escape and injury. For years past this question has been discussed in the annual reports of this hospital and several plans for the relief of the hospitals so unjustly afflicted have been presented by the Board of Charities to the legislature but, as yet, nothing has been accomplished. The presence of these patients in our wards associating as they necessarily must with those whose refinement naturally shrinks from such contamination and whose malady is not the work of their own hands, has, at least, been the means of great pecuniary loss in compelling private patients to be sent to other institutions. Seventy patients were discharged as improved, four as unimproved and seventy-four died.

From an examination of our mortuary records it will be found but three deaths resulted from acute attacks of brain disease, one from mania and two following melancholia; the deaths from the chronic forms of these disorders are shown in six cases dying from the exhaustion of mania and four deaths following prolonged attacks of melancholia, two patients died from exhaustion following chronic dementia and three very aged patients were classified as senile demented at the time of death. The exhaustion of epileptic mania caused three deaths, puerperal mania one and eight male patients were general paresis, one male presented a typical case of cerebral syphilis at the time of death; three male patients died from apoplexy. To consumption must be attributed the greatest number of deaths from any

one disease, there being fourteen deaths from its various forms during the year, being double the number of deaths from this disease the previous year. In accounting for this alarming increase in the number of consumptives, I believe it can be traced entirely to the overcrowded condition of our wards. These patients should be removed and isolated in a building remote from the wards. The present plan of caring for them, in the main building, while it cannot for the present be avoided, is dangerous and imperils the health as well as comfort of all. Nine patients died from Bright's disease, eight from pneumonia and four from heart troubles.

The only distressing incident occurring during the year was the suicide of a male patient in the evening of August 15, 1899, whose body was found by the nurse suspended by a small cord secured about the neck and attached to the upper hinge of a door. The patient had been in his usual health during the day and had conversed with several of the officers passing through his ward just a few moments before. As is our custom, the friends were quickly notified and the Coroner asked to visit the hospital, who, upon hearing a full report of the case, exonerated the officers from all censure.

On October 19, 1898, the State Committee of Lunacy directed the transfer of four women from the hospital to the insane department of the almshouse at Somerset, Pa., and April 10, 1899, ten male patients were transferred by the same authority to the insane department of Allegheny City Home, at Claremont, Pa. The Committee of Lunacy also ordered the removal of five women to this same institution May 12, 1899. On May 15th, 1899, three men and four women were sent to the Asylum for the Chronic Insane, at Wernersville, Pa., and on May 14, 1899, two men and three women were received from the Wernersville Institution. December 10, 1898, one woman was admitted upon order of transfer from the Institution for the Feeble Minded, at Polk, Pa.

That the general public and particularly visitors interested in charitable work might familiarize themselves with the conduct of a well ordered institution of this character, those who came in a proper spirit to see the hospital were afforded every rightful opportunity to become acquainted with its business management, our methods of treatment and everything pertaining to the care of the patients, their comfort and welfare. Many visitors, however, are mere curiosity seekers whose very presence in the wards is an annoyance and whose demeanor is actuated by feelings of ridicule rather than of sympathy for those

around them. Such ignorant and heartless visitors should be denied admission and where this is impossible the judgment and discrimination upon the part of the usher could at least render their visit brief and unsatisfying. About four thousand persons visited the hospital the past year and, on two occasions, the Institution received official visits from members of the State Board of Charities and from the Committee on Lunacy.

Eleven years ago the first course of lectures upon nursing was delivered before our attendants by the medical staff and so successful did the venture prove in the interest it awakened by its teaching and the favorable results attained, that a training school was formally established in October, 1895, which has steadily grown until now its importance is seen and felt in every department of hospital work. In the evening of May 6, 1899, the third graduating exercises of the school took place, at which time diplomas were awarded by the President to eight graduates—seven young women and one young man. Since the opening of the school thirty-two nurses in all have received diplomas, a large number still remain with us though very many have left to enter other hospitals, engage in private nursing or pursue their studies in general hospital work. That so many of our trained nurses should leave the service of the hospital just at a time when they are capable of rendering efficient service, is a most discouraging feature. While the instruction nurses receive here may not be as advanced or thorough as that given in medical and surgical hospitals, for the reason that an institution of this character is of necessity lacking in clinical advantages, the course of study and its requirements are as comprehensive as the means at our command will permit and it is most gratifying to note the interest in the school is continually growing and better work is seen along the lines of scientific and skilled nursing.

In commenting upon the medical work of the hospital, I am pleased to report the earnestness of the staff in making this department of the hospital so thorough in its detail and in the large measure of excellent clinical work accomplished, in the recording and classification of cases, their examinations and also in pathological work. Recent publications have been added to our medical library, from time to time, and special courses of instruction given to the nurses in massage and physical culture. It is to be regretted we are unable to secure more autopsies, which, in large measure, is due to reluctance upon the part of friends. Reference may very justly be made at this time, in connection with the medical care of the patients, to that portion of

the treatment which relates to providing them some means of diversion and occupation and, in this manner, relieving the tedium of hospital life. The combined efforts of the staff and subordinate officers provided them a number of pleasing entertainments in our amusement hall and in field sports, contests, etc.,—to these also must be added the regular house games—reading, music, parties, dances, lectures, concerts, also tennis, golf and “scientific kite flying.” The stable also afforded a large number of patients much pleasure in driving; while many preferred walking and other out-door exercise. The ward libraries were increased by the addition of one hundred and eighty volumes.

As is our custom, the holidays were appropriately observed and on Sunday the entire household assembled in the chapel in attendance upon divine worship. Under the direction of the attendants a large working force of patients kept the grounds and lawns in order and assisted very materially in our farm and garden work. Naturally, there are some discontented and unhappy patients, whose mental condition alone prevents the appreciation of their own unfortunate condition and the circumstances enforcing their residence within the confines of a hospital, also the many privileges, comforts, and almost entire absence of restraint they are permitted to enjoy. Complaints coming from such patients are but natural, although I feel assured their lot in life is made as bright as the advanced and enlightened ideas of the modern treatment of insanity will permit.

The finances of the hospital are very fully shown in the report of the Treasurer.

The farm and garden under the supervision of our farmer, Mr. Wm. Knoderer, yielded an abundant supply of vegetables and fruit. In addition to the oversight of his department, much of the work of superintending our more important improvements was given into his care. The excellent condition of the farm and buildings and his capable business methods in conducting the other duties imposed upon him deserves my earnest appreciation.

It is my sad duty to report the death of Miss Sabina Cozad, whose death occurred November 28, 1898. For twenty-five years Miss Cozad had occupied the position of nurse in this hospital and during that time her life has been spent in but one ward, where, surrounded by the patients she loved, her entire energy was devoted to their comfort, in relieving them of their distresses and in making their lives

brighter by her cheerful and sunny disposition. She was beloved by her patients and, in her death the hospital lost a faithful employe and the patients a true and sympathizing friend.

Under circumstances peculiarly sad also occurred the death of Miss Mollie Morrow, February 27, 1899. Miss Morrow had been a nurse for a period of three years, during which time her thoughtful care of those entrusted to her charge and christian example commanded the respect of all.

In the death of Mr. M. W. McMillan, our Treasurer, which occurred suddenly February 3, 1899, the hospital lost a valued and trusted officer, whose integrity and long years of devotion to the welfare of the institution and earnest solicitude for the insane had won for him the affectionate regard of all associated with him.

To the nurses whose loyalty to their posts of duty, whose devotion and watchful care of the sick, whose tender regard for the nervous and excitable, whose patience and tact in the care of the untidy and troublesome entrusted to their keeping, have done so much to further the success of the hospital during the year now closed I do at this time offer my heartfelt gratitude. Miss Martha F. Black, who for twenty-three years had been employed in the institution, resigned her position as housekeeper and her place was filled by the appointment of Miss Jennie Weakley, who had been in the service of the hospital twelve years.

The medical staff with a single exception is the same as last year. On April 11, 1899, Dr. Henry H. Doan resigned his position to engage in general practice and was succeeded by the appointment of Dr. Frank S. Post, May 9, 1899. Dr. Post entered upon his duties at once and, fully equipped by his collegiate and thorough medical education, gives promise of becoming a useful officer and assuming a high rank in his chosen profession. To each of my assistants, Dr. Wm. K. Walker, Dr. Esther L. Blair and Dr. Frank S. Post, I offer my feelings of commendation for their earnestness and professional ability in the performance of every duty assigned them. To my other associates, Mr. Wm. Knoderer, Mr. George M. Gray, Mr. Jas. H. Mann, Mr. Stephen Kunkle, Mr. Alexander W. Morrow, Mr. Robert K. Allen, the assistant clerks, and Miss Eliza H. Hope, Miss Jennie Weakley and Miss Jessie McCrum, whose watchful care over the interests of their respective departments contributed so much in the good work of the hospital, I also return this expression of my

deepest gratitude. To my distinguished friend, Dr. Cyrus B. King, I extend this acknowledgment of my obligations to him for his medical and surgical aid so cheerfully given the hospital on several occasions during the past year.

In closing this report I would again express to the President and members of your Board and the Executive Committee, my thanks for the continued confidence and support I have been permitted to enjoy during the year now closed and commending the hospital into the care and keeping of our Great Ruler for his guidance and blessing through the coming year, this report is respectfully submitted.

HENRY A. HUTCHINSON.

DIXMONT, PA., *October 1, 1899.*

Acknowledgments.

I would at this time return grateful thanks, upon the part of our patients, to those friends who, in various ways, contributed during the past year to their personal comfort and pleasure. Such expressions of their interest are most welcome.

Reading matter, consisting of books, magazines, illustrated papers, etc., was received from Miss Millie Ludebuhl, Mrs. Geo. P. Rose, Mr. Samuel Edgar, Mr. Thos. H. Lane, Mrs. E. H. Stowe, Mr. Samuel Severance, Jr., Mr. Thos. M. Jones, Jr., Mrs. Dyer, Mr. Wm. Ramsey, Mrs. Henry K. Chamberlin, The U. P. Board of Publication, Mr. F. L. Shallenberger, Hon. Wm. J. Sawyer, Col. Wm. A. Herron, Mr. Geo. R. Boardman, Mr. F. S. Bissell, Mrs. A. B. Starr, Mrs. Ira F. Johnson, Hon. Wm. H. Graham, Messrs. R. Seidle & Sons, Mrs. Geo. M. Kunkle, Hon. C. C. Townsend, Mr. George Smith, Mr. J. M. Atcheson, Miss Echo Struby, Miss Irene Howe, Miss Emma Cunningham, Mrs. H. W. French, Rev. C. E. Hills, Miss Lulu Mark, Mr. T. H. B. McKnight, Mrs. Sauvageot, Mr. Rhodes, Mr. D. L. Gillespie, Messrs. Follansbee Bros. & Co., The Second U. P. Church, Allegheny, Pa., American Sunday School Union, The Presbyterian Board of Education, Kings Daughters of the Sixth U. P. Church, Pittsburg, Pa., The Union Chapter Junior Epworth League, Oyer Epworth League, Messrs. Demmler & Schenck. To the editors of the many newspapers for copies of their paper sent gratuitously to the hospital, I am also much indebted.

To Mr. Chas. F. Workmaster, Mr. Lawrence, Prof. Love and members of the Allegheny Orchestra; Mr. John Duss and his Economy Band; Miss Neal, Miss Miller, Mr. McCord, Mr. Wilson and friends; Mr. George Toerge, Jr., Messrs. Toerge and Swartz, Mr. and Mrs. Frey; Miss Webster, the Misses Bender, Miss McClain, Miss McClure and Mr. Moore; Mr. John L. High, Mr. Calvert and Mr. Harry Laughlin and friends; and the "Blind Trio," we are also indebted for a series of most excellent and enjoyable concerts. Other entertainments, consisting of lectures, readings, etc., were given by Mr. Archie L. French, Mr. Fred. W. Trueman, Prof. H. L. Braun and his little pupils, Mr. Henning, Mr. Staley, Mr. Maeder and Mr. George Kiernan.

On the evening of the Fourth of July Mr. James Dunne, assisted by Mr. Geo. J. Protzman and Mr. Robert McClure—all connected with the hospital—gave a most interesting performance of "Sleight of Hand" and "Vaudeville."

Mr. Fred Linke, Miss Pauline Moeller, Messrs. Reymer Bros., Mrs. Osborne, Mrs. Alex. Lutz, Messrs. Wm. T. Shannon & Son, and Messrs. Dilworth Bros. kindly remembered our household at Christmas.

From Hon. Wm. A. Herron, the hospital received one hundred volumes of Gospel Hymns for use in our Chapel services, from Hon. Chas. C. Townsend, sixty bound volumes for our ward libraries, and from Mrs. M. F. Reed sixty-seven engravings.

To Supt. Hamilton, of the Allegheny Parks, and to Messrs. Hartman Bros., of Allegheny, I am pleased to acknowledge the receipt of a large lot of cuttings for our green-house, from Hon. Wm. H. Graham the hospital received a valuable collection of seeds and from Mr. Wm. Jackson 5,000 strawberry plants.

From the Wallace Optical Co. we received three large beautiful thermometers.

To Prof. James P. Brooks, Messrs. Toerge Bros. and Mr. Stelzner the patients and employes are deeply indebted for their painstaking efforts in making our weekly dances so pleasant and so thoroughly enjoyed by all.

BEAVER,	GREENE,	LAWRENCE,	WESTMORELAND,
BUTLER.			

Admission of Patients to Insane Department.

1. Preparatory to the admission of a patient, unless when committed by order of a court, the Superintendent shall be furnished with the certificate of two physicians, who have been in practice for five years or more, that they have separately seen and examined the individual within two weeks of the date of admission, and believe him or her to be insane, and these certificates shall be sworn to before some alderman or judicial officer, (the oath before a notary public is illegal) with the order of near relative or friend that the patient may be received into the Hospital, with a statement as required by law, and a bond with satisfactory security, for the payment of board and other expenses while in the institution. All private patients thus received shall make a payment of thirteen weeks' board in advance, when brought to the Hospital, no part of which shall be refunded; and if taken away uncured, and against the advice and consent of the physician, in any succeeding quarter, no part of the payment shall be refunded.

2. Whenever a patient is sent to the Hospital by order of the Court, the order or warrant, or a copy thereof, or, if sent by the Directors of Poor, an order sent by the Directors or their agent accompanied by the Certificate of Insanity, as required by law, shall be lodged with the Superintendent of the Hospital.

3. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.

4. Each male patient shall be provided with at least three new shirts, a new and substantial coat, vest and pantaloons, three pairs socks, two pairs drawers, two undershirts, a hat or cap, cravat, collars, handkerchiefs, shoes, and one pair of slippers.

5. Each female patient shall have three calico dresses, four chemises, three pairs drawers, three pairs hose, three nightgowns, two flannel skirts, one Balmoral skirt, two muslin skirts, six handkerchiefs, four collars, two pairs shoes, one shawl or cloak, and one hat or hood.

6. It is very desirable that extra and better apparel should be sent with those accustomed to it, that when their health is improved, or when they attend religious worship, walk or ride out, their self-respect may be preserved.

In all cases the patient's best clothing should be sent; it will be carefully preserved and only used when deemed necessary for the purpose above mentioned.

Jewelry, and all superfluous articles of dress, knives, &c., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

All clothing, if not taken away at the time of patient's removal, or within three months afterward, will be disposed of as the officers of the Hospital may think best, and no compensation whatever will be made therefor.

7. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him or her to the Hospital, and from whom minute, but often essential particulars may be learned. All women patients must be accompanied to the Hospital by some female friend as required by law.

8. The price of board, including washing, mending, and attendance for all who are supported at the public charge, is \$3.75 per week. For private patients, or those supported by themselves, or their friends, the price varies from five to ten dollars, according to the trouble and expense incurred, and according to their ability to pay. Higher prices are paid by special agreement with the physician, for extra attention and accommodation.

Payments are to be made quarterly, in advance.

9. A bond, with satisfactory sureties, will be required for the payment of the board and expenses, for the removal of the patient when discharged, of all persons, excepting those sent at the expense of the counties or townships.

Those who bring friends should be prepared to give a bond, and, if strangers, furnish evidence of their responsibility.

10. All bills remaining unpaid one month after date of presentation, are placed in the hands of the Solicitor of the Hospital for collection.

11. As the diet of the patients is under the absolute control of the Superintendent, no nuts, candies, cakes or other edibles shall be given to the patients, by their friends or visitors, without his express permission.

12. Visitors are admitted to inspect the Institution on any day (except Sunday,) between the hours of 10 A. M. and 12 M., and between 2 and 4 P. M.; but no visitor shall be admitted to the wards occupied by patients, without express permission from the Superintendent; and especial care is to be taken that no amount of visiting is permitted that shall prove injurious to the patient. No visitors shall be admitted on holidays.

Visitors will please not intrude on the grounds used by the patients, or give to or receive anything from patients.

13. The Hospital is located eight miles west of Pittsburgh, on the Pittsburgh, Fort Wayne & Chicago Railway, at Dixmont, and can easily be reached by cars, there being ten trains (east and west) each day, (except Sunday,) stopping at the Hospital Station.

14. Applications for the admission of patients, and all communications in regard to the condition, health, bills, &c., of those who are in the Hospital, shall be made to the Superintendent.

15. As Dixmont Station has now an Adams Express Office, all goods may be sent to the Hospital direct by express or freight, as may be preferred.

16. The friends of patients can communicate with the Institution by telegraph and telephone.

Forms of Commitment.

The following forms have been prepared by the Committee on Lunacy, to be used in all cases (except those sent by order of Court) for the commitment of insane patients by their friends or by Directors and Overseers of the Poor, to the Hospital for the Insane, at Dixmont, Pa. No such patients will be received unless the forms as given are fully complied with.

Commitment at Request of Party Interested, after Finding of the Insanity
of the Patient.

THE COMMONWEALTH OF PENNSYLVANIA,

To the Sheriff.....County, and to the Western Pennsylv-
[SEAL.]ania Hospital:

WHEREAS, at the.....Sessions, 18....., of the
Court of.....in and for said County of.....held at....., on the
.....day of.....18....., the same being a Court of record in Western
Pennsylvania, and having jurisdiction of offenses that are punishable
by imprisonment for the term of ninety days or longer, the petition of
.....was presented, applying to our said Court for the commitment to
the Western Pennsylvania Hospital of.....alleged by said peti-
tioner to be insane, and resident within the said county of.....

And whereas, on the.....day of.....18 .., a jury was called, elected
by ballot, duly accompanied and sworn according to law, to inquire
into the fact of the insanity of said....., in the manner pro-
vided by law; and said inquest did, upon their several solemn oaths or
affirmations respectively find that the said.....is insane:

And whereas, our said Court being satisfied that the said....., by
reason of such insanity, *unsafe to be at large, or is suffering under un-
necessary duress of hardship*, did, on the.....day of.....18....., adjudge
and decree that the said.....be committed to the Western
Pennsylvania Hospital to be treated according to the rules and regula-
tions of said Institution, and the laws of the Commonwealth, and
there be detained until the further order of said Court, or of one of the
Judges thereof; and further, that the expense of the care and mainte-
nance of said....., and of his removal to and from said Hos-
pital shall be paid by the said county.....according to law.

And whereas, it was made to appear to our said Court, that the said
.....had, at the time of the finding of said inquest, *a legal settle-
ment in the.....in said county* all of which facts our said Court
has given due notice to the constituted authorities having charge of the
poor in said.....of.....;

Now, therefore, these are to charge and command you, the said
Sheriff, forthwith to convey and deliver into the custody of the West-
ern Pennsylvania Hospital, in the county of Allegheny, in this Com-
monwealth, the body of said.....and you, the said Western
Pennsylvania Hospital, are hereby required to receive the said.....
into your custody, care and keeping in the said Hospital, and there to
keep *him* safely, to be treated according to the rules and regulations of
said Institution and the laws of this Commonwealth in such case made
and provided, until the further order of our said Court, or of one of the
Judges thereof.

Witness the Honorable....., the President Judge of our said
Court, this.....day of....., A. D. 18.....

.....Clerk.

COMMONWEALTH OF PENNSYLVANIA, } *Set.*
County of.....

To all whom it may concern :

These presents are to certify, according to
 [SEAL.] law, that.....who was, on the.....day of.....
 A. D. 18...committed to the said The Western Pennsylvania
 Hospital, by the Court of *Quarter Sessions of the Peace* in and for the
 county of....., in said Commonwealth, has a legal settlement in
 the.....

In testimony whereof, I.....President Judge of the Court
 of *Quarter Sessions of the Peace*, in and for the county of..... have
 hereunto set my hand and caused the seal of said Court to be affixed,

Commitment of Party charged with Offenses Punishable by Imprisonment or Death
 after Finding of Insanity.

THE COMMONWEATH OF PENNSYLVANIA,

To the Sheriff of.....County and to The Western Pennsyl-
 [SEAL.] *vania Hospital, Greeting :*

Whereas,.....having been charged with
 the offense of.....at the Sessions of the Court of *Quarter*
Sessions of the Peace in and for the said county of....., was, on the.....
 18....., by verdict of an inquest duly impaneled to try the indictment
 against said.....for the said offense, in the manner provided by
 law, found to have been insane at the time the said offense was com-
 mitted, and that the said.....still continues insane ; and whereas
 the said inquest, upon their solemn oaths or affirmations respectivley,
 did further find that the said.....had *no legal settlement*
in this Commonwealth, but that the place of residence at the time when
said offense was committed, was the township of....., in the county of
.....[or] a legal settlement in the Commonwealth, at the time said
offense was committed, to-wit : in the township of.....the county of.....
; and did further find on their respective oaths or affirmations, as
 aforesaid, that the said.....is in indigent circumstances :

And whereas, our said Court of *Quarter Sessions of the Peace* of the
 said county did thereupon, on....., 18..., adjudge and declare, that
 the said.....be committed to the Western Pennsylvania Hospital,
 to be treated according to the rules and regulations of said Institution,
 and the laws of this Commonwealth, and there detained until *he* is
 thence discharged by due process of law, or the order of our said Court,
 or of one of the Judges thereof ; and further, that the expense of the
 care and maintenance of said....., and of his removal to and from said
 Hospital, shall be paid by the said county of.....according to law :

And whereas, our said Court of *Quarter Sessions of the Peace* in and for said county of..... , did give due notice thereof to the constituted authority having charge of the poor in the said *township of*.....to wit : the *Overscers* of the poor of the said.....

Now, therefore, these are to charge and command you, the said Sheriff, forthwith to convey and deliver into the custody of the Western Pennsylvania Hospital, in the county of Allegheny, in this Commonwealth, the body of said....., and you, the said Western Pennsylvania Hospital, are hereby required to receive the said.....into your custody, care and keeping in the said Hospital, and there to keep *him* safely, to be treated according to the rules and regulations of said Institution and the laws of this Commonwealth in such cases made and provided, until the said.....shall thence be discharged by due process of law, or by the order of our said Court, or of one of the Judges thereof.
